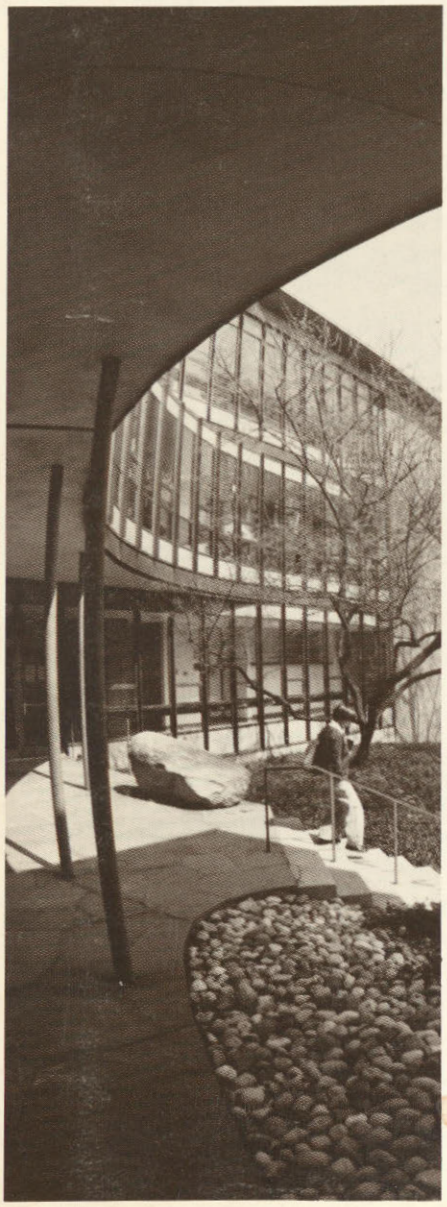
Lake Forest COLLEGE

1978-79 Bulletin



LAKE FOREST COLLEGE CALENDAR 1978-79

TERM I†

September 4	Labor Day
September 9	New Students Arrive
September 12	Registration for New and Returning Students
September 13	Fall Classes Begin
October 23	Mid-term Grade Report Due
November 23	Thanksgiving
November 24	No Classes*
December 1	Classes End
December 2-3	Reading Days
December 4-7	Final Examination
December 8 - January 2	Winter Recess**
January 2	New Student Registration
January 3	Winter Classes Begin
January 26	3½ Week (January) Courses End***

TERM II†

January 30	3½ Week (February) Courses Begin
February 21	Reading Day for 7 Week Courses
February 22-23	Final Examination for 7 Week Courses
February 23	3½ Week (February) Courses End****
February 27-28	No Classes*
March 1	Spring Classes Begin
April 11	Mid-Term Grade Report Due
April 7-15	Spring Recess*****
April 15	Easter
May 25	Classes End
May 26	Reading Day
May 28-31	Final Examinations
June 2	Commencement

*Campus facilities open
**Residence halls and food services closed
***If a final examination is given, it must be administered on January 26 and the previous day must be used as a reading period.
****If a final examination is given, it must be administered on February 23 and the previous day must be used as a reading period.
*****Residence halls open; food services closed

Lake Forest

Bulletin for 1978-79

Volume 56, Number 3, Published four (4) times a year, in February, May, July, and November by Lake Forest College, Lake Forest, Illinois, and entered as second class matter in the Post Office at Lake Forest, Illinois, April 18, 1925, under an act of August 24, 1912.

Drawings by Hugh McMahon, Lake Forest

Lake Forest College — A Resumé

Lake Forest College is a community of people, brought together by choice and circumstance, whose common goal is to acquire, explore and evaluate human knowledge and culture, and whose common commitment is to the development of individuals for lives of leadership, service and personal fulfillment. Among the many elements which help the community to realize its goals are its rich academic offerings in the traditional liberal arts, its location amid the vast educational and vocational resources of greater metropolitan Chicago, and its stimulating human diversity of students and teachers. Lake Forest has chosen to be a small college where personal relationships are possible and often close among faculty and students. It is an environment in which students acquire both general knowledge and fundamental skills. They learn through study and experience to think accurately, to evaluate ideas, and discriminate among values; and they are allowed to direct their studies, if they choose, toward particular careers.

Lake Forest enrolls approximately 1,000 students. It is independently governed, co-educational, and accredited at the undergraduate and the masters level. The 107-acre campus is in the township of Lake Forest on Chicago's North Shore.

While the primary goal of the College is to provide undergraduates with an excellent liberal arts education, Lake Forest has traditionally accepted the challenge of serving the needs of the community. The Continuing Education program and the Master of Liberal Studies program serve the educational needs of the North Shore Community, while the Wood Institute for Local and Regional Studies provides a public forum for the discussion of wider community concerns.

The campus is twenty-five miles north-east of O'Hare Airport via the Tri-State tollway, about an hour on the airport bus, much less by car. Downtown Chicago is roughly the same distance away: the drive south on U.S. 41 and Interstate 94 (Edens and Kennedy expressways) takes less than forty-five minutes; the more scenic route, following Sheridan Road along the lake shore, takes about an hour, as does the superb commuter railroad, The Chicago and Northwestern. The campus is a five-minute walk, or a short cab-ride, from the railroad station in Lake Forest itself.

The college's location gives it therefore the best of the rural and the urban worlds. There is quiet, safety, cleanliness, and natural beauty in Lake Forest, and the additional intellectual, cultural, and educational resources of the nation's third largest city are close by. Students and faculty have easy access to the

libraries and personnel of the Northwestern University, The University of Chicago, Chicago Circle Campus, The Art Institute, The Newberry Library, Chicago Public Library, and nearby Barat College. The Chicago Symphony, Lyric Opera, Goodman Theater, and the Museum of Contemporary Art are merely a few of the best known of literally scores of cultural institutions which make Chicago a national center of music, drama and art, while the Museum of Science and Industry, Field Museum of Natural History, Adler Planetarium, Shedd Aquarium and Argonne National Laboratory are available to our students both informally and for some course work.

The Campus

Founded by visionary Presbyterians as Lind University in 1857, Lake Forest originally contained both a co-educational university and a secondary school. The latter, Lake Forest Academy, became a separate institution in the early 1900's and the university, which had hitherto offered both baccalaureate and advanced degrees, began to concentrate on a traditional undergraduate curriculum of the liberal arts. A number of buildings survive from the late 19th century period of the college's history. Moore Hall on the South Campus, now a residence hall, was then a part of Lake Forest Academy, as was North Hall on the Middle Campus, which is now the main administration building. Also on Middle Campus are Patterson Lodge, the admissions building which was named after the first president, the Reverend Robert Patterson, and College Hall where in 1876 post-secondary education at Lake Forest began. College Hall continues to serve as one of the principal classroom buildings on campus. The North Campus took shape in the 1890's with the building of Durand Institute and the Lois Durand residence hall. Durand Institute, designed by Henry Ives Cobb, opened originally as a branch of the Art Insitute of Chicago but it has been by turns a theater, classroom and administration building. It will shortly return to its original status as an art center, housing a gallery, studios and lecture rooms for the Art Department. Lois, as it is known, remains a residence hall, reserved for women students.

To the beginning of the college's second period of growth, the early 1900's, belong several buildings on the Middle Campus. Two of them have English Gothic exteriors: Reid Hall, the college's library until 1965, now a modernized classroom building; and the Lily Reid Holt Memorial Chapel with its windows of Tiffany glass. The two Middle Campus residence halls, Harlan and Blackstone, were built in the English Tudor style, as was Durand Commons, with its beamed and oak-panelled hall, the setting of the annual madrigal dinners. To this same period belongs Carnegie, a brick building with a Dutch Enlightenment facade, built to house the natural science departments.

In the 1960's a third building drive responded to the needs of an increasingly sophisticated faculty and curriculum, and an expanded student body. On Middle Campus in 1961 the science departments moved into a large new complex, the

Johnson Science Center, which includes the circular Freeman Science Library. 1965 saw the completion of the Donnelley Library, to accommodate the growing collections of books, pamphlets, microfilm and manuscripts in the humanities and social sciences. At the same time a new large dining hall and cafeteria were added to Durand Commons, which became a coffee shop and lounge.

The early sixties also witnessed the development of South Campus, where Moore Hall (vacated by Lake Forest Academy in the 1940's) was joined by two new residence quadrangles, and where a fully equipped Sports Center, complete with Olympic-size pool, basketball arena, racquetball, handball and squash courts, saunas, locker-rooms, and exercise rooms, was built next to its predecessor, now converted into a hockey rink.

Although other renovation projects are underway, notably in Durand Institute, the most recent architectural change has been the refurbishing of the early 20th century Tudor-style Hixon Hall, on South Campus, which now contains a modern, highly flexible studio theater, Hixon Theater, the home of the Garrick Players.

The College continues to be related to the Presbyterian Church in the United States of America and is independently governed by an elected Board of Trustees.

Academic Highlights

A liberal arts school, fully accredited by the North Central Association of Colleges and Secondary Schools, Lake Forest College strives to take advantage of its size in educating students.

Small classes and independent research opportunities allow for maximum exchange of thoughts and ideas between students and faculty. In such an atmosphere of learning, attitudes are challenged, intellectual honesty is preserved, and humanistic values developed. Education at Lake Forest College is characterized by an informal but demanding association between student and professor.

The liberal arts curriculum is enhanced by off-campus study programs in which many students participate. Such options include terms abroad in Greece and Mexico, internships in businesses and governmental agencies, a marine biology program in the Bahamas, Term in America, and the various cooperative study terms offered by the Associated Colleges of the Midwest of which Lake Forest College is a member. Further, cooperative degree programs have been established with Washington University for engineering students, with Rush University for nursing and medical technology, and the University of Chicago in social work.

The College's curriculum is still further enhanced through the establishment of undergraduate institutes which combine traditional liberal arts courses with a heavy emphasis on internship experiences, leading to exploration of specific careers or graduate studies upon graduation. The Robert E. Wood Institute

serves students who plan to pursue careers in public and private planning, public safety, social service, and local government. A second Institute, in Health Services, accommodates students who wish to prepare themselves for careers in various fields of health care and related industries.

The Faculty

Central to the fulfillment of the College's mission is the distinguished Lake Forest faculty. More than eighty-five per cent of the College's full-time teaching faculty hold Ph.D. degrees. They are active as productive scholars, researchers and critics, and many have been recognized nationally as outstanding educators, as Phi Beta Kappa, Fulbright and Woodrow Wilson scholars, as fellows in academic societies and institutions. As scholars they have published many books, numerous articles, and are the recipients of significant awards; as researchers they have earned more than one and a half million dollars in grants since 1966.

More pertinent than these facts is another — Lake Forest faculty members like teaching on the undergraduate level. There is no back-up pool of graduate assistants. There are no arbitrary restrictions that consign freshmen to one set of professors, upperclassmen to another. All faculty are equally accessible.

Smaller class size is important, too. Student/faculty ratio is approximately 13:1, a happy condition that permits informality and flexibility in both content and teaching form. Students participate in a natural way in the give and take of discussion and the interchange of opinion. The opportunity to take part, to be heard, is a valued aspect of the liberal arts at Lake Forest.

All professors also counsel individual students in their curricular programs as faculty advisors. Students, therefore, profit from the teaching skills and personal interest of the faculty, and they also enjoy the benefits of studying under nationally prominent scholars.

The Students

The College seeks diversity within its student body, economically, geographically, and ethnically. More than forty states and twenty foreign countries are represented. But the diversity of the College community is more than the geographic and previous educational background of its students. It is also the broad range of personalities. A student at Lake Forest is accepted as an individual, with particular intellectual and personal talents and needs. For each individual the College is a place to study, work, enjoy and live.

The students participate in a variety of activities. They join the faculty in the governing of the College through participation on committees and representation on the Board of Trustees. Student writers and performers take part in the student FM radio station, student newspaper, literary magazines, yearbook, College Choir and theatre groups. Honorary societies in biology, foreign languages, psychology, chemistry, and physics enjoy active student participation as do other special interest clubs. In athletics, the College provides physical education for interested students and organizes a comprehensive intramural and intercollegiate athletic program complemented by a sizeable sports complex. All have equal opportunity to take advantage of the richness of the College's programs.

The Academic Program

Lake Forest College has opened its curriculum to an imaginative philosophy of education: namely, that no two individuals have the same educational needs and goals, and no two individuals have the same strengths, capacities, motivation or preparation. Each individual wants something distinctly personal from a college education.

Accordingly, there are no specific distributional requirements at Lake Forest College. Each student is expected to compile a total of 32 courses for graduation with the B.A. degree, and to meet the special requirements of a major. In other words, the student's degree program is largely a matter of personal choice and individual planning that arises out of regular discussions with a personal faculty advisor, whose guidance helps the student to develop areas of expertise which challenge and appeal personally, and are consonant with career goals and abilities. Students can choose majors of the traditional type, in one or more of sixteen departmental fields; they can cross departmental lines, combining courses and blocks of courses to give them new comprehensive skills or to capitalize on those they already have. They can create interdepartmental majors of their own or select from a number of formal interdisciplinary majors designed by the College and supervised by faculty committees. In addition to a major, they can also incorporate into their own personal programs one of the various interdisciplinary course sequences, such as Computer Science, Ancient Mediterranean Civilizations or Pre-Management

and Business. Some students are now choosing to participate in cooperative degree programs with professional and graduate schools, spending two or three years at Lake Forest before completing their programs, for example in engineering or nursing, at the cooperating school.

Toward the close of the freshman year the candidate for the degree of Bachelor of Arts is asked to select a department major or, as an alternative, to choose an interdisciplinary major. The departmental majors offered are:

- Art History
- Biology
- Chemistry
- Economics
- English
- French
- German
- History
- Mathematics
- Music
- Philosophy
- Physics
- Politics
- Psychology
- Sociology and Anthropology
- Spanish

The interdisciplinary majors are:

- American Studies
- Area Studies
- Behavioral Sciences
- Comparative and World Literature
- Environmental Studies
- Health Services
- Humanistic Inquiry
- International Relations
- Local and Regional Studies
- Scientific Inquiry

Calendar

Course work at Lake Forest College is scheduled into a calendar which is either a 3-2-3 or a 3-1-1-3. The format provides two twelve-week periods of three courses each, during the fall and spring. The middle period, during the winter months of January and February, may be used for concentrated study of two subjects consecutively for three-and-a-half weeks each (one January course and one February course), or two subjects concurrently for the full seven-week period.

This calendar plan offers the student a great deal of scheduling flexibility. A student may be off campus during January, possibly pursuing course work at another college or university, and return to begin a course in February. Frequently, internships are carried out during the middle period, permitting students to devote their full time to the particular internship project, while accumulating up to two course credits. Some off-campus programs, such as Marine Biology or Term in America, have been planned for the January-February period. An intensive three-and-a-half week course allows for a considerable amount of field work, uninterrupted by the demands of another course.

The billing procedure recognizes and supports the flexibility of the 3-2-3 or 3-1-1-3 calendar. Each billing period covers four courses or equivalents, either the September through January period or the February through May block.

A seven week summer session offers a number of basic and special courses, some seven weeks in length, but many three and one-half weeks. Students may take one or two courses of either type, but not a combination of a seven week course and a three and one-half week course.

Academic Advisement

Great importance is attached to the advising system at Lake Forest College. While a student's special academic needs and objectives determine the precise course of study in a given term or year, it is the advisor's responsibility to ensure that each individual course plan reflects the ideals of a broad liberal arts education.

Each new student is assigned a faculty advisor at the outset who assists with program planning, course selection, registration, academic difficulties, personal problems, and career choices. A freshman student keeps this advisor at least for the duration of the freshman year, but often longer. After choosing a major field of study, the student selects a faculty advisor in the chosen discipline, who assists in drawing up a program of courses in the major field and other relevant areas, and who provides necessary guidance throughout the student's undergraduate career.

FRESHMAN STUDIES

During their first year, Lake Forest students have the option of combining traditional introductory courses in various disciplines with special courses designed mainly for freshman, for the development of important skills. Among these are English Composition, Writing on Special Topics, and Freshman Seminars.

In a Freshman Seminar a small group of students explore with one or more faculty a basic issue in human nature or culture from various intellectual perspectives. The seminars place special emphasis on group discussion, oral and written presentations by students, and research techniques and analytical skills. Courses entitled Writing on Special Topics combine the teaching of a particular subject matter of limited scope with the teaching of writing, providing students with an introduction to a topic of intellectural concern and with practice and guidance in essay composition. English Composition is devoted exclusively to the development of the fundamental skills of written composition.

None of these courses are required; all are for credit. For descriptions of this year's topics, see pages 34 to 36.

INDEPENDENT STUDY

Independent Study, under the guidance and supervision of faculty members, offers challenging opportunities for investigating areas beyond the limits of formal courses. A student may engage in independent study for credit, given

the availability and approval of a faculty member competent in the chosen subject matter. There are various forms of independent study:

A **tutorial** is a directed reading course on a special topic not covered in a listed course; the student discusses the reading with the faculty supervisor at least once a week, and usually writes a number of short reports or papers. One recent tutorial dealt in depth with the decline and fall of ancient Athens; another focused on the Theory of Relativity.

A **Research Project** is more specialized and usually more advanced than a tutorial, requiring greater independence and originality on the part of the student, who conducts scholarly research with a view to producing a substantial report in the form of a term paper or report. Among projects undertaken in 1978 were Multinational Corporations in Japan; Migratory Patterns of Birds; American Portraiture.

A **Senior Thesis** is original, scholarly research undertaken in the student's senior year, usually over more than one term. The research culminates in the presentation of a formal written dissertation, which is evaluated by a committee of faculty, who also examine the student in person. Outstanding theses are awarded Thesis Honors at graduation. Last year students wrote theses on such topics as Illegal Immigration, Auditory Preception, Shakespeare's *The Phoenix and the Turtle*.

A **Creative Project** is an independent course of work, under faculty supervision, in a creative medium such as painting, fiction, sculpture, poetry, photography, or music.

Students may count a total of seven Independent Study programs toward graduation. For the regulations governing the various independent study options, and for application procedures, consult the Student Handbook.

THE COLLEGE SCHOLAR PROGRAM

An independent study experience is the primary component of the College Scholar Program, which enables qualified and motivated students to design and pursue an individual degree program, in the junior and senior year, focusing on a particular topic or theme rather than on a single academic discipline.

In the past, College Scholars at Lake Forest have examined, among other topics, communication theory, psycholinguistics, the science of film, Etruscan art, religious movements in America, and Victorian culture.

The College Scholar Program emphasizes self-determination for its students. The responsibility for initiative in the Program lies with the student, beginning with presentation of his or her case for admission to the Program.

In the Spring term applications are invited from students who will be juniors by the end of the Fall term of the following academic year. Admission is determined by the College Scholar Committee. See Student Handbook.

PRE-PROFESSIONAL AND CAREER PREPARATION

Lake Forest College recognizes the need to integrate the ideals of a liberal arts education with professional and career preparation. The College advises its students about many career and professional options, including:

PRE-MANAGEMENT AND BUSINESS: There is a recommended course sequence designed to offer a basic introduction to business administration for those interested in a career in the private sector. (See page 44.) Students have the option on completion of the sequence of having the fact recorded on their transcripts. Although it may well enhance a student's employment possibilities, this concentration should not be regarded specifically as a preparation for entry into a graduate school of business. Lake Forest College does not offer a major in business administration. Most graduate schools of business are interested more in the overall quality of the student's work than in specific courses taken, although prior work in economics, mathematics, computer science, and the behavioral sciences does have particular relevance for most M.B.A. programs. Good communications ability, both written and oral, is also high on the list of priorities of prospective employers and professional schools. Early in the Fall Term a meeting of all students interested in pursuing graduate work in business is held. Individual advising and descriptive business school materials are also available year-round.

COMPUTER SCIENCE: The departments of Mathematics and Physics offer several courses which provide a strong background in computer sciences. Some students elect these courses to provide a necessary tool for study and research in their major field of concentration. Others use them as preparation for working in computers after graduation (with a Bachelor's degree) and a few go on to study for advanced degrees in this field. The faculty recognizes a sequence of courses in Computer Science, and students who successfully complete this sequence may have this fact recorded on their official transcript. Students interested in Computer Science in general, and in particular those interested in the Sequence in Computer Science, should consult with the Department of Mathematics. (See page 44.)

Besides the Sequence in Computer Science, there are many other opportunities for students to acquire experience and expertise in computer technology and its numerous applications. Certain courses in Biology, Chemistry, Economics, Politics, Psychology, Sociology/Anthropology, and Local and Regional Studies make use of the college's computer facilities, which include thirteen terminals in four buildings. Access is virtually on a twenty-four hour basis. Considerable expansion of computer facilities and instruction is planned for the next three years, the College having just received a $250,000 Federal grant for the purpose.

EDUCATION: Lake Forest College prepares students for careers in teaching

at the primary, elementary, middle school/junior high, and high school levels. Courses leading to Standard Elementary and Secondary Certification in Illinois are offered.

Special emphasis in the Secondary Certification program is being given to the training of effective teachers for middle school/junior high school. Details are given in the Education section under Departmental Majors on page 68.

ENGINEERING: Students who wish to combine a liberal arts education with instruction leading to a degree in engineering may participate in the 3-2 cooperative program between Lake Forest College and Washington University in St. Louis, Missouri. During their three years at Lake Forest College these students will be advised by a member of the faculty in the Physics department and will meet regularly with a representative of Washington University. They will spend the last two years in the program on the Washington University campus. Students successfully completing the program will receive both a B.A. degree from Lake Forest College and a B.S. degree from Washington University. See page 52.

LAW: The pre-law advising program, through close personal attention and advice, and through regularly scheduled meetings with members of the profession, helps students decide whether a legal career is the best profession for them. The pre-law advisor offers counsel on applying to law schools and on the range of law schools most suitable for each student. There is no specific pre-law pattern of course work at Lake Forest College; the basic four-year course of study is appropriate undergraduate training for future lawyers.

MEDICINE: Students preparing for careers in medicine, dentistry, or veterinary medicine may major in any academic field provided their courses of study include the necessary science courses to insure adequate preparation for the professional schools of their choice. Generally, these required science courses include a minimum of one year in biology, two in chemistry, and one in physics. The Health Careers Advisory Committee schedules interviews once each year with every student in this field to assess their programs, their progress, and to advise them on preparing themselves for admission to the appropriate professional schools. In addition, each student planning a career in the medical sciences will be assigned his or her own advisor from the natural sciences faculty, with whom close contact is maintained throughout the undergraduate career.

NURSING: Lake Forest College has recently established a cooperative program with Rush University in the field of nursing. Rush's Medical Center is the central initiating component of a comprehensive cooperative health delivery system serving some 1.5 million people through its own resources and in affiliation with eight community hospitals in northern Illinois. Students entering

this program will spend their first two years at Lake Forest College and their last two years on the Rush University Campus. Upon completion of the program they will receive a B.S. degree in nursing from Rush College of Nursing. See page 53.

MEDICAL TECHNOLOGY: Lake Forest College recently established a cooperative program with Rush University in the field of medical technology. Under this arrangement students spend their first two years at Lake Forest College and their last two years at Rush College of Health Science. Upon successful completion of the four-year program students will receive a B.S. degree in medical technology from Rush College of Health Science. See page 53.

PUBLIC SERVICE: The Wood Institute For Local and Regional Studies was created to enable students to understand the complexities of metropolitan life and more practically for graduate school and professional careers. The Institute program combines the traditional liberal arts courses and a heavy emphasis on internship experiences in a program designed to lead to career opportunities after graduation as well as to graduate work. Students with a major in Local and Regional Studies may pursue careers in public and private planning, public safety, criminal justice, and local government. The major is also a good background for those wishing to take advanced degrees in law, planning, public administration, social work, community development, and business.

SOCIAL SERVICE ADMINISTRATION: Students who wish to become professionals in the fields of social treatment and social development, one option directed more toward counseling and assistance, and the other more toward community program administration, may be able to participate in a Three-Two cooperative program between Lake Forest College and the University of Chicago. In this program students attend Lake Forest College for three years followed by two years in the School of Social Service and Administration of the University of Chicago. The plan enables successful students to earn a Bachelor of Arts degree from Lake Forest College and a Master's degree from the University of Chicago in a total of five years. See page 54.

OFF-CAMPUS STUDY

Study opportunities in off-campus settings have traditionally enriched the curricular and extra-curricular options of Lake Forest students. Those who have been able to take advantage of these opportunities invariably found that they give them new perspectives and teach them valuable facts and ideas. Off-campus study may take a student abroad, to other parts of the United States, or no further than the city of Lake Forest in the case of some internships.

Internships and Practicums

A department or interdisciplinary committee arranges off-campus internships and practicums for up to four course credits, one, two, or three of which may be taken in one term. The internship program is intended primarily for students who have had at least two years of course work, and for whom the internship is a chance to work in a practical professional way at a subject area studied previously on a theoretical level, in academic courses.

Under the internship program, Lake Forest students work for academic credit in Chicago area businesses, social and governmental agencies and other area institutions during the seven-week Winter term and during the Summer term. In recent years, students worked — and studied — for Housing and Urban Development (HUD), the Better Government Association (BGA), a United States Senator, a Chicago alderman, the cities of Lake Forest and Highland Park, and Lake Forest Hospital. One student wrote for publication on work done with pottery collections at the Field Museum of Natural History in Chicago. Another worked with reporters on the staff of the Chicago Tribune investigating corruption in Chicago health systems and to develop a health proposal with a Chicago alderman for the Lakeview area of the city; another developed a disaster plan for the town of Gurnee which was subsequently used during a serious flood.

Internships and Practicums have been developed primarily under the Departments of Politics and Economics and the Wood Institute for Local and Regional Study; the Departments of Psychology, Sociology and Anthropology and Art have participated significantly in the program as have the Departments of Mathematics, Biology, Chemistry, History, and English.

Program Leaves

A student who wishes to enroll in another accredited institution in January and/or February may apply for a program leave, as may a student who wishes to enroll during the Fall and Spring terms for one course at another institution while remaining registered at Lake Forest for that term. If approved by the student's advisor, the program must be checked with the Registrar to assure transferability of the work. If the work is satisfactorily completed (i.e. with grade of C or better in each course) and the credits transferred to Lake Forest College, the student will be reimbursed for the cost of the tuition at the other institution up to the cost of tuition at Lake Forest College for the same period.

Lake Forest Courses Offered Off-Campus

In the past, the College has conducted foreign language terms abroad, including a term for political science students in Africa. The College continues to develop off-campus programs which will meet the needs of our students. The

three programs to be offered during the 1978-79 year reflect this desire. In addition, the off-campus program director, Mr. Speros, makes available to students information about quality non-Lake Forest programs which might be useful in special cases.

FALL TERM IN MEXICO: The Fall term in Mexico is an interdisciplinary program, established in cooperation with the Universidad Autónoma de Guadalajara, Guadalajara, Mexico, to benefit students in Spanish language and literature as well as those in social science programs. One year of college Spanish or the equivalent is required. Students enroll in three courses (at least one in Spanish), or two courses and one independent study. Excursions to art centers are an integral part of the program. Students live with Mexican families. Credit: 3 courses. Program advisors: Mr. Sosa, Mr. Speros. (Not offered in 1978-79.)

MARINE BIOLOGY: The Biology Department, in conjunction with Chicago's Shedd Aquarium, offers a Marine Biology program during the College's winter term. Students in the program spend January on campus in academic preparation for the trip and spend February in the Florida Keys where they make use of the Shedd Aquarium's boat, the "Coral Reef," and the facilities of the Bahamian Marine Station on San Salvadore Island. Credit: Two course credits. Application Period: during pre-registration of the preceeding May. Program advisors: Mr. Louch, Mr. Weik.

TERM IN AMERICA: The History Department and Local and Regional Studies conduct a winter program, "Term in America," consisting of seminars and field studies of American communities. Students taking the course will travel to Boston; New York City; Columbia, Maryland; and South Carolina as well as explore Chicago and downstate Illinois. Credit: Two Course Credits. Program advisor: Mr. Ticknor.

TERM IN ATHENS: The College conducts a twelve-week unified study of the ancient Aegean world from the Minoan to Byzantine periods, with a concern for understanding the artistic and archaeological materials in their historical, cultural and geographical setting. Classes are held at historical and archaeological sites and museums. Study in Athens is supplemented by about five weeks' group travel and study to (a) Minoan Crete, (b) Mycenaean Argolid, Sparta and Pylos, (c) Classical Delphi, Olympia, Corinth and elsewhere, and (d) Byzantine sites in Salonika, Northern Greece, and Meteora. Credit: 3 courses. Prerequisites: Ancient Mediterranean Civilization 200 and Art 220 (12 semester hours). Application deadline: November 1. Program Advisor: Mr. Cole.

ACM Cooperative Programs

Lake Forest College is a member of the Associated Colleges of the Midwest, a consortium of thirteen distinguished colleges in five states: Beloit, Carleton, Coe, Colorado, Cornell, Grinnell, Knox, Lake Forest, Lawrence, Macalester, Monmouth, Ripon, and St. Olaf. By working together these colleges have expanded greatly the off-campus study opportunities for their students. When participating in some of these programs, usually as juniors, Lake Forest students meet with their counterparts from other ACM colleges. Credit for these programs is provided by Lake Forest College. Applications to any of the ACM programs must first be approved by Lake Forest College.

ARTS OF LONDON AND FLORENCE: The Arts of London and Florence program (spring only) provides a broad introduction to the arts for the non-specialist student, drawing upon the cultural resources of the two cities to explore the historical and contemporary richness of Western civilization. Students spend eight weeks in each city, with a one-week break between the two segments of the program for individual travel. Course work in art and architecture, drama, and history of literature is supplemented by frequent visits to museums, galleries and the theatre, short field trips to other areas of England and Italy, and discussions with local scholars. Length of program: February-May. Eligibility: sophomores, juniors, seniors. Credit: 4 course credits. Application deadlines: March 15 for early applications, October 15 final deadline. Campus program advisor: Ms. McKeon.

CHINESE STUDIES IN HONG KONG: The British Crown Colony of Hong Kong provides a fascinating environment for the study of Chinese language and culture. Participants enroll in Chinese University's International Asian Studies Program, and live on campus in the New Territories, a rural setting about a half hour's train ride from Hong Kong's urban center of world trade. In addition to Mandarin or Cantonese language instruction, students may choose elective courses ranging from contemporary Chinese political thought to ancient painting and calligraphy. An independent study option is also available to qualified students. An ACM/GLCA program, in cooperation with the Yale-China Association. Length of program: August-December, December-April, or both. Eligibility: Sophomores, juniors, seniors. Credit: 4 course credits. Application deadline: March 15 for fall semester or full year, October 15 for spring semester. Campus program advisor: Mr. W. R. Smith.

FLORENCE: The Florence program (fall only) offers serious students of art, history, Romance languages and the humanities an opportunity for intensive study among the legacies of the Renaissance. Students' understanding and appreciation of the richness of Florence's artistic and cultural heritage is facilitated by Italian language instruction and courses providing historical context

and a broad perspective on Italian contributions to world civilization. This 15-week program is designed for those with some previous experience and knowledge of the fields to be studied. Length of program: September-December. Eligibility: Juniors and seniors with previous work in art, history, modern languages and the humanities. Italian language recommended, but not required. Credit: 4 course credits. Application deadlines: October 15 for early applications, March 15 final deadline. Campus program advisor: Ms. McKeon.

GEOLOGY IN THE ROCKY MOUNTAINS: The Front Range, High Great Plains and adjacent mountain ranges serve as classroom and laboratory for the study of the geologic history of the Rocky Mountains in this introductory field course. For pre-freshman as well as currently enrolled students, Geology in the Rocky Mountains is designed to assist students to gain an appreciation for the dimension of time and a feeling for the relationship of geology to human existence, in addition to an understanding of the basic principles and methods of the science. Frequent field trips from the program's Colorado Springs base provide the opportunity to examine a wide range of varied rock types, minerals and fossils, geologic structures and landforms. This on-site exposure is reinforced by written reports, lectures, discussions and laboratory sessions. Length of program: June-August. Eligibility: All students, including entering freshmen. Credit: 2 course credits. Application deadlines: April 15 for currently enrolled students, May 20 for entering freshmen. Campus program advisor: Mr. Martin.

INDIA STUDIES: The Indian subcontinent, home to almost one-sixth of the world's population, provides a rich and complex background for the study of non-Western civilization. After an intensive orientation term, including language study, at one of the ACM colleges, India Studies participants spend six months in on-site study, observation and experience in Poona. At once traditional and highly industrialized, Poona is an excellent place to observe the interaction of tradition and modernity that characterizes India today. While there, students will be enrolled in the University of Poona, where courses designed to give historical perspective to various aspects of Indian culture will be offered. In addition to their course work, students will also complete in Poona the independent study projects begun during orientation. Past projects have included studies dealing with such diverse topics as: village social structure; the joint family system; agricultural cooperatives; trade unionism; medical practices; Indian political parties; Hindu, Jain and Buddist ceremonies and temples; women's issues; geophysics; nuclear chemistry; botany; folk art; and classical Indian music and dance. Length of program: March-December. Eligibility: sophomores, juniors, exceptionally qualified freshmen. Credit: 8 course credits. Application deadlines: April 15 for early applications, November 15 final deadline. Campus program advisor: Mr. Louch.

JAPAN STUDY: After a summer of orientation and intensive language study in the mountain resort village of Ikenodaira, students spend up to a full academic year studying at Waseda University and living with Japanese families in Tokyo. The curriculum at Waseda includes courses in Japanese language and electives covering many facets of Japanese history, culture and contemporary social and economic affairs. Students may also choose an independent study option: a special project, a research or honors paper, or an apprenticeship with a local scholar or artist. The family living experience provides an informal education in Japanese cultures and is in many ways the dominant feature of the program, offering total immersion in Japanese life. A GLCA/ACM program. Length of program: July-February or July-June. Eligibility: Sophomores, juniors, seniors. No Japanese language study required for acceptance, but two semester hours or the equivalent must be completed before departure. Credit: 8 course credits for full year, correspondingly less for eight-month students. Application deadline: February 15. Campus program advisor: Mr. W. R. Smith.

NEWBERRY LIBRARY PROGRAM IN THE HUMANITIES: One of America's great research liberaries provides the setting and materials for this program of individual and cooperative research in the humanities. Students attend seminars, meet with resident scholars, and conduct their own examinations of selected topics or historical periods, aided by the privilege of full access to the Newberry Library's outstanding collections of medieval manuscripts and early printed books, Renaissance history and literature, family history and genealogy, 19th century American literature, history and culture of the American Indian, and materials on cartography and printing, music history and theory, and philology and linguistics. In addition to the semester-length fall seminar, students may enroll in short-term (three-week) seminars on selected topics during the winter, or may pursue independent study under the direction of faculty members from their own colleges, for any time period suitable to their needs. Students may also choose to participate in research library tutorials, new this year, designed to provide practical experience and academic training in such areas as bookbinding, modern manuscripts and rare books, local and family history, and Renaissance studies. An ACM/GLCA program. Length of program: September-December (fall seminar) for 4 course credits; January-May (month-long seminars) for 1 credit per month; variable periods (independent study and tutorials for variable credit). Eligibility: Juniors, seniors, exceptionally qualified sophomores. Application deadlines: April 1 for fall seminar and ear'' applications to short-term seminars and tutorials, November 15 final deadline for short-term seminars and tutorials. Campus program advisor: Mr. Whatley.

OAK RIDGE SCIENCE SEMESTER: Designed to allow undergraduates to study and do research at the frontiers of current knowledge, the Oak Ridge

Science Semester places qualified students as junior members of research teams engaged in long-range intensive investigations at Oak Ridge National Laboratory. Participants' immersion in research work during the sixteen-week program is integrated with academic study in an interdisciplinary seminar intended to expose them to the wide range of research carried out at ORNL, and one advanced course which each student will choose from among those offered to fit his or her special interests and major requirements. Research opportunities are available in biology, chemistry, physics, geology, mathematics, sociology, economics, political science and environmental studies. A GLCA/ACM program. Length of program: September-December. Eligibility: Upperclass majors in biology, chemistry, physics, mathematics, geology, sociology, economics, political science and environmental studies. Credit: 4 course credits. Application deadline: February 15. Campus program advisor: Mr. Davis, Mr. Fischer.

STUDIES IN LATIN AMERICAN CULTURE AND SOCIETY: Studies in Latin American Culture and Society (fall only) is an interdisciplinary program designed for students who wish to gain a comprehensive understanding of life in Latin America and to develop their facility in the Spanish language. This program, focusing on the humanities and social sciences, is planned to take full advantage of its Costa Rican setting. Course work in language, literature, geography, anthropology, development strategies and cultural change provides insights which are reinforced by group field trips and a two-week period of individual field work in the country's provinces. Language study is stressed as the key to in-depth understanding of the culture. In San Jose and its environs, students live with families both to improve their language ability and to enable continuous, personal involvement in the life of a Latin American community. Length of program: September-December. Eligibility: Sophomores, juniors, seniors, with at least one year of college level Spanish. Credit: 4 course credits. Application deadlines: November 15 for early applications, March 15 final deadline. Campus program advisor: Mr. Finnegan.

TROPICAL FIELD RESEARCH: The Tropical Field Research program (spring only) is designed for advanced work in the student's major field of study and focuses on field research in the natural and quantitatively-oriented social sciences. Costa Rica embraces ten ecological zones, all within a day's travel of the capital, ranging from tropical rainforests and savannas to temperate highlands and near tundra. This diversity of natural settings supports an extraordinary variety of plant and animal life and provides rich research opportunities for students of tropical biology and ecology. Man's historical and contemporary use of this terrain offers an equally broad range of study topics for students of anthropology, archaeology, economics, geography, history, political science and sociology. Students prepare for their research work during

a month-long orientation which includes intensive language training and a review of field work methodology. Their field study may be integrated with an ongoing multidisciplinary project or may be undertaken independently under the supervision of a faculty advisor. Length of program: February-June. Eligibility: Sophomores, juniors, seniors, with prior course work in the proposed research discipline. Credit: 4 course credits. Application deadline: March 15 for early applications, November 15 final deadline. Campus program advisor: Mr. Finnegan.

URBAN EDUCATION: The Urban Education program introduces student teachers and those interested in such service-oriented professions as counseling, social work, and art or music therapy to the special aspects of urban schools and urban children. Chicago's myriad instructional options provide work placements in a variety of settings: inner city or suburban, traditional or innovative, Montessori or Gestalt, bilingual or special education. The program provides a background of support for student teachers through a series of resource workshops, seminars and discussion groups; emphasis is placed upon exploring each individual's strengths and weaknesses as a teacher. Length of program: Fall or spring semester; fall, winter or spring term; interim-length option. Eligibility: Those seeking certification are expected to have fulfilled their college's prerequisites for student teaching; previous experience working with young people is desirable for all. Credit: variable. Application deadline: April 15 for fall, November 1 for winter and spring. Campus program advisor: Mr. Dyer.

URBAN STUDIES: The social, cultural and economic forces which shape American cities — urban renewal, a political machine, youth movements, pollution, the daily press, the poor, high culture and mass culture, the corporate elite — are all present in Chicago. In the Urban Studies program, students begin to understand the magnitude and complexity of an urban center by studying, working and living in Chicago. Formal study in seminars on urban issues, a core course involving all program participants, and independent study projects is augmented by supervised internships, in which students may gain a valuable understanding of work and contribute to the life of the city and its people. Length of program: September-December, or February-May. Eligibility: Sophomores, juniors, seniors. Credit: 4 course credits. Application deadlines: April 15 for fall, November 1 for spring. Campus program advisor: Mr. Ticknor.

WILDERNESS FIELD STATION: The ACM Wilderness Field Station is located on remote Low Lake in the Superior National Forest. It lies just outside the Boundary Waters Canoe Area, offering students an exceptional opportunity for direct observation of northwoods nature. Much of the field work in this lakeland wilderness is done on canoe trips, involving paddling, portaging and

camping under primitive conditions; the base camp's well equipped laboratories and herbarium enable students to supplement their field study with the latest analytical techniques. Courses in botany, vertebrate zoology, aquatic biology, behavioral zoology, wetlands ecology and mycology are offered during the two month-long summer sessions, along with environmental biology for non-science majors and an independent study option. Length of program: June-July, July-August; or both. Eligibility: One college level biology course required for all courses except environmental biology, for which there are no prerequisites. Credit: 1 course credit per session. Application deadline: February 15. Campus program advisor: Mr. Louch.

WOMEN IN MANAGEMENT: The summer program serves to introduce talented junior-year students to graduate study in management and to the world of business at a time when such experience can have real impact on their career planning decisions. Selected interns spend twelve weeks in Chicago, working full time, taking two graduate level courses in business administration at the Keller Graduate School of Management and participating in a seminar planned to deal with the problems and opportunities specific to women in managerial careers. Internship assignments are designed to include management level responsibilities; past interns have worked in banks, hospitals, non-profit organizations, large multinational corporations or small local firms, while studying accounting, finance, personnel management, marketing or economics. Each intern is granted a fellowship which includes a cash stipend, full tuition and books for the course chosen and housing for the summer. Length of program: June-September. Eligibility: Juniors selected on the basis of academic excellence, leadership and professional promise. Credit: Optional Internship credit to be arranged and some transfer of course credit. Application deadline: February 1. Campus program advisor: Ms. Riger.

CONTINUING EDUCATION FOR ADULTS

Lake Forest College takes a special interest in serving the adult community of the North Shore through the Office of Community and Continuing Education. Regular course offerings of the College are open to members of the community for credit or may be audited, and a number are scheduled at afternoon or evening hours which are convenient for adults. In addition, the College offers a number of non-credit programs in areas of general interest.

The Office of Community and Continuing Education provides academic counselling for non-traditionally aged students. Individuals who meet the admission requirements established by the faculty committee on continuing education may take courses for College credit in individually tailored programs on a part-time or full-time basis. The Continuing Education program does not award a degree; in order to receive a Lake Forest College degree, students

must take their last eight courses as regularly enrolled students

Continuing Education students are invited to make use of the College's newly expanded Writing Center, on the ground floor of Donnelley Library, which offers tutorial help to students who wish to improve their writing abilities.

For more information on adult programs, call or visit the Office of Community and Continuing Education in North Hall, Room 100.

MASTER'S PROGRAM IN LIBERAL STUDIES

Lake Forest College has joined a growing number of institutions of higher learning by offering a relatively new kind of program, designed to offer mature students a graduate degree which is interdisciplinary in nature and non-professional in intent. It is not designed to train students for a particular vocation but to foster the personal intellectual growth that is an asset in any field. The program adheres to the traditional values of broad liberal arts education, but at the graduate level. It is an exploration of the liberal arts at a more sophisticated and a more highly integrated level than is possible for undergraduates.

The Master of Liberal Studies program is designed for people with a bachelor's degree who are concerned with their ability to organize conceptually the social, scientific, and humanistic dimensions of the world of the late twentieth century. Some candidates for the program may believe that a technical undergraduate education has not adequately prepared them to meet current challenges in their professional lives. For example, businessmen who are moving into upper management roles may see the need for a broad liberal arts program to help them deal with some of the larger issues they will face as they represent their corporations to the outside world. Teachers and librarians have enrolled in master's of liberal studies programs as an alternative to further graduate work in education or a single academic discipline; they find that the broad concerns of a non-disciplinary master's program more closely meet their needs. A third group of students choose an M/LS program as an alternative to a self-directed program of reading or to participation in a series of unrelated adult education classes. For them the program provides a carefully organized, coherent approach to further learning in association with other adults who share their concerns and interests.

Ten units are required for the M/LS degree. The core of the program is three team-taught interdisciplinary seminars centering on important topics viewed from the perspectives of several scholarly disciplines. In addition, students consulting with a faculty committee will choose five upper-level Lake Forest College courses, in accordance with the individual's previous academic background and current needs and interests. Finally, each student, working closely with his or her faculty advisor, will prepare a master's paper or project and participate in a master's colloquium with other students working on master's

projects. The master's project differs from a traditional master's thesis in that it seeks to integrate materials from several disciplines.

In order to be admitted to the program, candidates must hold a bachelor's degree from an accredited college or university. Initial acceptance into the M/LS program is conditional on satisfactory performance in an interdisciplinary seminar, which is the first course required for all candidates. Upon the successful completion of this seminar, students are formally accepted into the program.

A normal course load at Lake Forest College is eight courses per year, but M/LS students need not register for any minimum number of courses; part-time students are welcome. Students may enter the program in September, March or June.

Director of the Master's Program in Liberal Studies: Mr. Zilversmit.

COOPERATION WITH BARAT COLLEGE

Lake Forest College joins with nearby Barat College in offering certain programs jointly, and in coordinating offerings in some academic departments. A student at Lake Forest may, upon the approval of his or her advisor, register for up to four semester hours in a given semester at Barat College, for which full Lake Forest credit will be granted. Such registrations are made at the Office of the Registrar of Lake Forest at the usual time of registration.

Lake Forest students travel to Barat, one mile away, primarily for specialized coursework in education, but also for additional coursework in the creative arts — dance, ceramics, painting — and women's studies. Barat students register at Lake Forest primarily in the sciences — biology, chemistry, physics. A bus shuttle service between the two colleges operates regularly each day.

Barat College also offers lectures and cultural programs to which students of Lake Forest are invited.

RESEARCH AND LEARNING RESOURCES

The Lake Forest college faculty believes that library research within courses and on special projects is essential to the development of a well-rounded, independent intellect. As a result, the College's collection of 220,000 books, and documents, and 800 periodicals, are heavily used and students acquire considerable sophistication in library use and research techniques which serve them well not only as undergraduates but also later in their professional careers.

The College is located within the perimeters of one of the great library centers of the world, and its library program is able to combine strong traditional on-campus collections with easy access to the extensive research holdings of

Chicago and North Shore area libraries. While the bulk of under-graduate teaching is supported by the vital core collections in the College's own modern facilities, a substantial part of the learning on campus is supported by research material brought to the campus through inter-library exchanges, or which is available for use in major research collections in the metropolitan region. Many members of the campus community, both faculty and students, carry on research at the Newberry Library, the John Crerar Library, the Art Institute, and Chicago Historical Society, and the libraries of the many Chicago area universities. Loan materials are obtained through the College's participation in the Illinois State network and in five other complementary library systems and periodical banks. In addition, the College's collections are being developed in coordination with the Lake Forest Public Library and the Barat College Library, whose combined 120,000 volumes are within walking distance of the campus.

A recent development of the library's concern for students and faculty's library-use skills is a program of instruction coordinated by the librarians, and funded during 1977-78 by the Federal Government's Council on Library Resources. One outgrowth of this grant has been the first comprehensive effort by a liberal arts college west of the Atlantic Coast to experiment with on-line data base index searching, which exposes Lake Forest students to the type of retrieval techniques now dominating scientific and business information gathering.

The DONNELLEY LIBRARY, constructed in 1965, houses the bulk of the College's collection. Basic support for course work and the research of students and faculty is provided by a core collection of books and journals in the humanities and social sciences, supported by a well-equipped reference and bibliographic center and a microfilm reading room.

The THOMAS O. FREEMAN SCIENCE LIBRARY, built in 1961, serves the reference and research needs of the Departments of Biology, Chemistry, and Physics. This attractive facility, in which there is particular emphasis on abstracts, journals, and reference works, is located adjacent to the classrooms and laboratories of the Johnson Science Center, and provides easy information access for students and faculty alike.

The combined holdings of these two facilities amounts to some 165,000 volumes of books and bound periodicals; 50,000 government documents; 24 drawers of pamphlets; 800 currently received periodical titles; 8,000 reels of microfilm and 12,000 other microforms. Approximately 9,000 volumes are added to the College's library collection annually.

Worthy of special mention is the Treasure Room in the Donnelley Library which provides a comfortable home for the principal items in the many large and small collections of landmark and special books donated to the College by friends, faculty, and alumni. Among those collections, which provide the material for a regular schedule of exhibitions in the library's display cases, are three large gifts of special note: the Hamill Collection of over 6,000 rare and important

books in the humanities, given by the late Mrs. Alfred E. Hamill of Lake Forest; the Scotiana Collection, donated by the late R. Douglas Stewart of Lake Forest, of 3,000 volumes of materials for the study of Scottish history, art, literature, music, genealogy, and printing; and the library of Garrett Leverton, the College's drama director in the 1920's, of nearly 5,000 volumes of plays and material on the development of the theater in this country. Two collections on railroad history, some 6,000 items in all, have come to the College in recent years: the library of Elliott Donnelley in 1976 and the collection of Munson Paddock in 1977.

Art Gallery and Art Collection

Housed in the Donnelley Library, the Gallery is the scene of monthly exhibitions during the academic year. Centering on the works and interests of the Fine Arts Department, the Gallery each year displays faculty and student work, selections from the College's art collection, the work of contemporary Chicago area artistis, photography, and — most likely — a traveling exhibition.

Representative of the eight displays on view during the 1977-78 season were:

—European drawings from the Sonnenschein Collection of Lake Forest College and the University of Michigan.

—Sculpture and Drawings by Michael Croydon, Professor of Art, Lake Forest College.

—Vintage and Contemporary Photography: The Portrait (Weston, Steiglitz, Cunningham, etc.).

Exhibits are coordinated with teaching and study interests in the Fine Arts and other departments.

The College's art collection mainly consists of prints and drawings, such as the Sonnenschein Study Collection of several hundred European drawings and a variety of prints, largely of the nineteenth and twentieth centuries.

The Gallery and the College's collection are scheduled to move into expanded facilities in the renovated Durand Institute in 1979.

Audio-Visual

The A. D. Johnson Audio-Visual Center in the Donnelley Library is the focal point of the college's audio-visual program. From here is circulated a wide range of equipment (VTRs, projectors, tape recorders) and tapes for music and language programs. Several thousand tapes and recordings support these programs.

In addition to the Center, audio-visual facilities and collections are located conveniently in various buildings and departments. The well equipped Music Department record collection is supported by up-to-date, superior sound equipment. The Fine Arts Department has 60,000 slides. The Reid and McCormick auditoriums are well equipped for film showings.

The Writing Center

Recently located in the lower level of Donnelly Library, the Writing Center offers individual help to students who wish to improve their writing, whether it be organizing a short paper, writing a lab report, polishing a research paper, or preparing for an essay exam. Lake Forest's Writing Center is not a clinic; it works with students on all levels of writing competency — those needing help with grammar and punctuation as well as those wanting to make stylistic improvements in their papers. Since the Writing Center is staffed by the Composition Advisor and several trained student tutors, students can receive help not only during the day, at the Center, but also in the evenings and on weekends.

The Writing Center is one of the main features of the College's expanded writing program, now in its second year and funded in part with a grant from the Lilly Endowment. One of the major purposes of the program is to ensure that good writing is an acknowledged goal of all courses, in all departments, in which writing is part of the course-work. To this end faculty and students alike have their own personal copies of the Lake Forest College Writing Manual, which was written by members of the faculty for the use of the college community, and are encouraged to refer to it wherever appropriate. The faculty have taken part in a two day conference on student writing and a Steering Committee is engaged in finding ways to increase and improve instruction in writing in courses throughout the curriculum. Writing Center Director and Composition Advisor: Ms. Guenther.

The Computer Center*

The computer supplements and enriches many courses, including some in the Departments of Mathematics, Physics, Biology, Chemistry, Economics, Politics, Psychology and Sociology/Anthropology. It is used by faculty for research and by students for independent studies.

The College owns a Digital Equipment Corporation PDP 11/40 and operates it as a time-shared system. The capabilities are frequently upgraded. The system currently supports thirteen terminals placed in four different buildings on campus and three disc drives, a card reader, two line printers and magnetic tape drives, availabe in the Computer Center in College Hall. Access to the computer exists on an almost twenty-four hour basis.

The staff of the Computer Center, which includes students, encourages use of the system through easy access to terminals, offers non-credit mini-courses to orient would-be users and provides consultation services for all: for statistical computations, for document preparation, for program writing, and even for game playing.

*The College has just received a $250,000 grant from the National Science Foundation, to expand the computer facilities, increase classroom and laboratory use of computers, and develop faculty and student expertise in computer capabilities.

REGISTRATION

Each spring students enrolled in the College pre-register for the next academic year. New students have an opportunity to indicate their course preferences during the summer preceding their entrance to the College. Such course choices, including the spring pre-registration plans, are formally completed during designated registration periods in September. All registration forms must be signed by the student's faculty advisor before they can be accepted by the College's Registrar. Additional days are set aside, prior to the winter session and again prior to the spring session, for the purpose of confirming registration plans, or making changes in those plans. A fee of $3.00 is charged for late registration or late changes.

ADVANCED PLACEMENT

Students who have successfully completed Advanced Placement courses and taken the appropriate examinations provided by the College Entrance Examination Board may apply for college credit for this work. Grades of "3", "4" or "5" on the examinations entitle students to credit. Grades of "1" and "2" do not entitle students to credit. Each department reserves the right to set its own criteria for advanced placement. For more specific information, contact the department chairperson concerned.

CREDIT BY EXAMINATION

If a student feels able to meet the requirements of a regular course without attendance at class meetings, he or she may request permission to pass the course by examination. The student must have the consent of the instructor and the approval of the Dean of the Faculty, and the instructor may make requirements in addition to the examination when these seem appropriate to the subject. Credit earned by examination will not receive a letter grade. Normally, the regular course fee will be charged for credit by examination.

NORMAL COURSE LOAD, CREDITS, AND FULL-TIME STATUS

A normal course load, which all students admitted as regular students are required to maintain, is four courses per billing period, (i.e. September through January or February through May), i.e. eight courses a year. In the fall of each year, students register for the normal course load for the entire year, unless they are seniors needing less than a full course load to graduate on time. Credit in thirty-two courses is required for graduation with a B.A. While credits are recorded by courses rather than hours, each course may be regarded as equivalent to four semester hours.

With permission of the advisor, a student may register for an overload* in the fall and spring terms (four courses is an overload) but overloads are not

*For the tuition fee for a course overload, see page 128.

permitted in the winter term except by appeal to the Academic Appeals Board. Tuition refunds or credits are not normally given for a course for which the student registers as an overload but drops on or after the first day of classes. This applies also to seniors who do not need to take a full course load and drop a course on or after the first day of classes.

Although the normal required course load is four per billing period, a student officially has full-time student status if with the permission of the Dean of the Faculty, he or she is registered for a minimum of three courses (i.e. 12 semester hours) per billing period.

ACADEMIC STANDING

A student will be classified as a sophomore if the student has completed 7 courses by the beginning of the second year in college, as a junior if he or she has completed 15 courses by the beginning of the third year, and as a senior if the student has completed 24 courses by the beginning of the fourth year.

The record of every student is reviewed by the faculty at the end of each term, and a student who is not making satisfactory progress toward a degree will be subject to academic dismissal. In general, a student who fails three courses in a given year or who fails a course while he or she is on academic probation may be subject to dismissal.

A student may be placed on academic probation by the Dean of the Faculty or the Academic Appeals Board as a warning that he or she is in danger of academic dismissal. Usually the student will be placed on academic probation after receiving two failing grades in a given academic year.

GRADES

The College employs an A, B, C, D, F grading system. The A grade is awarded for work of clearly outstanding quality. The B indicates "superior", C "satisfactory", D "marginal". Courses in which a student receives a D grade count toward graduation; however, the departments may require a grade of C or better in courses prerequisite to more advanced work. A course for which the D grade is received may be repeated for the purpose of improving the grade, but not for additional credit. F indicates failure. Repetition of a course will not remove the original grade, but both grades will be recorded.

With the approval of their advisor, students may choose for each course whether to receive either "credit" only or a grade in the course, if the work is successfully completed.

Grade reports for failing, barely passing, or incomplete work are made to all freshman students at midterm. Final grade reports are sent to students at the close of each term.

THE DEAN'S LIST

The Dean's List recognizes students who have achieved distinguised academic records. It is compiled at the end of each academic year. To be selected for this honor, a student must have received during the year at least six letter grades: at least four grades of A, and no grades of C, D, or F.

COURSE CHANGES AND COURSE WITHDRAWALS

In order to change from one course to another after Registration a student must file a Change of Registration form. If this is not done failure in the course will be recorded.

All full-time students are required to carry a full course-load of four courses per billing period. A student is permitted to withdraw from a course, thereby falling below a full load, only under exceptional circumstances, when the academic advisor and the instructor agree and specify on the Course Withdrawal form that withdrawal is both necessary and appropriate.

The consequences of withdrawing from a course after registration are serious. There are *no tuition refunds, either full or partial,* for a dropped course, even if the latter was an overload. For further details, see the Student Handbook.

COURSE AUDITING

Students who wish to acquaint themselves with a subject without receiving credit may audit courses, with the permission of the instructor. Auditors are not subject to the requirements of the course, but their participation in the course should be serious. Full-time students need pay no audit fee; for part-time students the charge is $150 per course. Examination for course credit will not be permitted in an audited course.

CLASS ATTENDANCE

Because classroom activities are intended to assist students in the learning experience, it is expected that they will attend class sessions whenever possible. There are certain kinds of class sessions in which it is impossible to carry on the work of the class unless the student is present. For this reason each member of the faculty has the prerogative of establishing specific attendance regulations which, in the instructor's opinion, are best suited to the course.

LEAVES OF ABSENCE

A student who wishes to be on leave of absence may request from the Dean of Student Affairs a leave for a minimum of one-half an academic year and a maximum of one academic year. It may be renewed on application. Academic

dismissal will cancel a leave of absence already approved, and a student on leave will be allowed to return without further review of status if at the time of return he or she is in good standing according to the standards then in force. Credit to be transferred must be approved by the student's advisor and by the Registrar.

Any financial deposit or financial aid deadlines which apply to students currently enrolled apply as well to students on leaves of absence.

WITHDRAWAL FROM THE COLLEGE

A student who finds it necessary to withdraw from the College must confer with the Dean of Student Affairs and file a withdrawal form. Failure in courses will be recorded for a student who does not withdraw in this manner. Rules governing refunds to students who withdraw are discussed in the section, College Expenses. The actual date of withdrawal is the date on which the withdrawal form is filed with the Dean of Student Affairs.

REQUIREMENTS FOR GRADUATION

A total of thirty-two courses is required for graduation. Of these at least eight, but not more than fifteen, must be taken in the student's major field. No student may take more than fifteen courses in any discipline. If a student chooses an interdisciplinary major in place of a departmental major, more than the minimum of eight may be required, but the upper limit of fifteen still applies with respect to the courses within one discipline. Of the last sixteen courses, at least thirteen must be Lake Forest College credits, and of these the last three must be completed at Lake Forest College. Exceptions to these rules can be granted only by the Academic Appeals Board.

While no specific distribution of courses is required within the electives outside the major, students are urged to choose their courses carefully, keeping in mind that breadth of background as well as concentration in one field of interest is an essential ingredient of a liberal arts education. Proficiency in mathematics and foreign languages appropriate to the courses elected is necessary. All students are expected to have competence in the use of the English language and to exhibit it in all their oral and written work.

GRADUATION WITH HONORS

Graduation with Honors at Lake Forest College may be achieved in the student's major field. It is based on a clear demonstration of superior mastery of the subject, and on the ability to do outstanding scholarly work on a senior thesis, as judged by the examining committee. If the Senior Thesis is found to be an outstanding and original piece of research, Senior Thesis Honors will be awarded regardless of whether the student is graduating with Honors in his or her major field of study. (In exceptional circumstances a well-documented

senior research project or imaginative creative project may be a substitute for the senior thesis, provided all members of the departments involved give their unanimous approval.)

PRIZES AND AWARDS

Annually the College awards prizes to students who have demonstrated outstanding academic achievement in their fields. The McPherson Prizes are given in English, philosophy, foreign languages, and dramatics; the Fredericka L. Stahl Awards are presented for excellence in the natural sciences; Cultura Hispanica Honorary Diplomas and the Linguistics Award are given for superlative achievement in Spanish; The Society of the Sigma Xi Commendations are offered for superior work in chemistry, biology, physics, and psychology; the Phi Beta Kappa Senior Thesis Award is given for outstanding scholarship in a senior thesis. Lettermen Awards are given to the most outstanding scholar-athletes. The College also offers the Harold Bartlett Curtis Prize in Mathematics, the Sterling Price Williams Prize in Psychology, the Solly A. Hartzo Award in Politics, the Richard Watson Hantke Award in History, the Peterson Award and the Senior Prize in Economics, the Paul Burgert Prize in the Health Sciences and the Adlai Stevenson Prize in International Relations. The Edward H. Oppenheimer Memorial Prize is awarded each year to the senior man and woman judged to have contributed most to the college community. The Jacob Wardwell Edwards Prize is presented to the freshman demonstrating outstanding qualities of leadership.

PHI BETA KAPPA

Phi Beta Kappa is a national honorary scholastic society open to men and women with superior achievement records. Selection is based upon faculty recommendations, grade records, and the breadth of the student's overall program. The Lake Forest College chapter is Theta of Illinois. Both faculty and students are members.

Courses of Instruction, Majors and Degree Programs

One of the following abbreviations, appearing immediately after the course title throughout the catalog, indicates the term of year the course is offered:

F-Fall
S-Spring
W-Winter (7 weeks, January *and* February)

Freshman Studies and Special Interest Courses

All departments of the College offer courses of an introductory nature which are intended primarily for freshman and which are listed and described under the various departments. All courses designated at the 100 level are recommended for freshmen, and many courses at the 200 level are open to freshmen without prerequisites or special permission. In addition, the College offers a number of courses or sections of courses which are open only to freshmen, and which are smaller in class size than most regular courses, to allow for more concentrated instruction, and to facilitate discussion. These courses have as their principal aim the development of basic skills in writing, critical reading, analysis, oral communication and basic mathematics. The College recognizes the importance of good communication skills and of maintaining good standards in the written work which is a part of course requirements in all departments of the curriculum. All faculty and students are expected to have and use, where appropriate, the Lake Forest College Writing Manual, extra copies of which, with indexes, are available for a small fee at the Writing Center. Freshmen receive a copy free during orientation. 1978-79 is the second year of a three-year program of expansion and experimentation in the college's writing program, funded in part by a grant from the Lilly Endowment.

Basic writing skills are the main topic in English 100 (Freshman Composition); written composition and critical reading are also heavily emphasized in the courses now known as Writing on Special Topics. Freshman Seminars emphasize research and discussion, and are suitable for students who already feel more confident of their writing skills. Mathematics 100 is for students who have had less than three years of high school mathematics. An additional college resource, important for freshman, but open to all members of the college community, is the Writing Center, with its Director, Ms. Guenther and her student tutors. The Writing Center administers the writing placement test during freshman orientation, by which students can assess with their advisors, whether or not they would benefit from taking English 100, or Writing on Special Topics, or a Freshman Seminar, at some point during the freshman year. More important, the Writing Center, which is located in the Donnelley Library, on the Lower Level, offers tutoring in writing, at all levels of difficulty and for all disciplines. Students may enroll for credit on a long-term basis (English 101), or for non-credit tutoring for varying lengths of time.

NB. All the following courses are for credit; none are required courses.

ENGLISH 100 FS

English 100 is a composition course for freshmen and other students who need practice in writing effective expository and argumentative prose. The emphasis in the course is placed on methods of developing unified and coherent papers as well as on grammar, usage and other fundamentals of English. The course will also help develop the student's critical reading ability, offer guidance in the use of the library's resources, and provide individualized aid for writing assignments which students in the course may be preparing for their other classes. To continue to improve writing skills after completing English 100 a student might enroll at the Writing Center for regular or periodic conferences either with the Composition Advisor or with an experienced upper-classman writer as a peer tutor. The Composition Advisor may recommend taking a tutorial for credit to build on the progress made in English 100.

MATHEMATICS 100 F

Basic numerical skills are important for study in many areas, including statistics, computer science, economics, and the physical sciences. Mathematics 100 is a course in elementary algebra, *intended only for students who have had less than three years of high school mathematics,* and who wish to prepare themselves for further quantitative types of study, either in the Math Department or in other areas. Such topics as radicals, complex numbers, relations and functions, solutions of systems of equations and inequalities, and the quadratic function, will be studied in detail.

FRESHMAN SEMINARS

In a freshman seminar, a small group of students, led by one or more faculty, explores a broad issue in human nature or culture from various intellectual perspectives. Each seminar has an enrollment of twelve to fifteen students and places special emphasis on student participation in discussion, on oral and written presentations during the seminar, and on the development of research techniques and analytic skills. Participants should have already demonstrated basic competence in writing.

THE OCEANS F Mr. Louch

Covering over 70% of the earth's surface, the oceans constitute perhaps the most important single factor in our terrestrial environment, profoundly affecting climate, communication, food supply, national identities, and the human imagination. In this seminar, with the help of various faculty members from different disciplines, we will study the oceans' past and present role in the earth's ecology and in human culture. Among other things, we will examine them as an environment in themselves, as makers of the world's weather, as a creative stimulus for writers, artists and musicians and as a focus of international conflict and cooperation.

MIND, MATTER AND THE BRAIN W

Mr. Faber, Mr. Glassman

This seminar will deal with the nature of mind and with the question of whether there is such a thing as mind distinct from matter. Can mind be understood simply in material, biological terms? While physical scientists feel that their kind of knowledge will turn out to be adequate for understanding the mind, others argue that this sort of knowledge, of the *parts* of an organism, will never lead to a satisfactory understanding of the *whole*. In the course of our readings, discussions, and occasional laboratory work, we will cover some elementary physical and biological science, concentracting on knowledge of electricity and its relevance to the operation of nerve cells. We will also consider mind in light of the theory of evolution and from the religious perspective, and we will give some attention to altered states of consciousness.

WRITING ON SPECIAL TOPICS (formerly Introductory Studies)

These courses, which may be interdisciplinary or departmental, are designed to help freshman students improve their writing, critical reading and research skills, but unlike English 100 they are focused on a topical theme, each course allocating roughly half the time spent in class to lectures and discussions about the subject matter and the other half to instruction and guidance in writing. Class-size is limited to 17. Writing on Special Topics may or may not count toward a departmental major, depending on the department offering the course. This year's topics are in Psychology and in Sociology/Anthropology.

Although these courses are limited to Freshmen, upperclassmen may enroll under special circumstances. They should consult with the Composition Advisor for permission.

ANTHROPOLOGY AND LITERATURE W
Mr. Finnegan, Mr. Whatley

Social Science writing appears to be different in kind from literature, but the two often have similar aims. For instance, dramatists and novelists often share with anthropologists the need to describe vividly and truthfully a way of life which is unfamiliar because it is foreign to us or distant in time from our own. This course examines both approaches, looking at the way the creative writer and the anthropologist use the same raw materials, the same "data" in their different ways, but often to come to the same conclusion. In this way students will be introduced to the basic principles and methods of anthropology through comparison with those of literature and will write a series of essays of a comparative and analytical type. We will focus in particular on a tribe in South Africa and a Mayan Indian community in Mexico, reading and writing about plays, novels, autobiographies, and anthropological essays dealing with their lives, customs, problems and sufferings. We will also try our own hands at both kinds of writing.

PSYCHOLOGY: FROM COMMON SENSE TO SCIENCE S Ms. Rindskopf

Psychology uses scientific methods to understand, predict and control the behavior of human and animal organisms. This course is designed to help students think about behavior scientifically and analytically, to understand basic issues in the field of psychology, and to discuss and write about them with precision and clarity. To this end, a good deal of class time will be spent in discussion of writing and in revising papers. A theme common to the five writing assignments will be the relationship between scientific and unscientific (i.e. common sense) notions of behavior. Among the topics to be covered are the Phenomenon of Consciousness; Learning, Memory and Thinking; Human Development and Personality; Abnormal Behavior, and Psychotherapy; Human Sexuality and Social Behavior. This course can serve as a prerequisite for upper level courses in Psychology, but does not count toward the major. (Also listed as Psychology 111.)

SOPHOMORE HONORS SEMINAR

Each year an interdisciplinary honors seminar is taught on the sophomore level. The seminar is designed to introduce excellent Lake Forest students to some classic in the western tradition and to permit an exchange of ideas with other students whom they ordinarily might not meet in so concentrated a fashion. Enrollment is limited to fifteen and requires permission of the instructors.

IMAGES OF MAN IN THE WESTERN TRADITION W
Mr. C. Miller, Mr. R. Miller

The 1978-79 seminar examines the evolution of western thought and culture by focusing on four successive "images of man": political, religious, economic, and psychological. Readings will be drawn from Thucydides and the Greek dramatists, St. Augustine and Dante, Adam Smith and Marx, and Dostoevsky and Freud.

THEATRE

The theatre program, under the supervision of a faculty committee, is performance oriented and largely extra-curricular. It is staffed by professional guest artists and an on-campus Director of Theatre. Students present mainstage and studio productions in a newly remodeled, flexible theatre. A varied repertoire of plays are performed in different staging types. Although a major is not offered, the theatre program provides professionally taught workshops in such areas as improvisation, make-up, mime, playwriting, audition and design, in addition to the several courses in theatre practice. Creative Project credit is also available during all terms for in-depth, specialized study and practice. Students enroll in this for practice in such areas as directing, designing, stage managing, technical directing, advanced acting projects, etc., in coordinating with Garrick Players productions. Credit is also available through internships at local professional theatres.

200 FUNDAMENTALS OF PUBLIC SPEAKING F Mr. Tutterow

Practical training in public address. Problems of group presentation examined include basic voice training, leadership dynamics, researching a topic, structuring a speech, stage-fright, and delivery technique. Emphasis is placed on constructing, delivering, and criticizing student speeches. The types of speeches studied: information, persuasion, demonstration, argumentation, impromptu, and discussion.

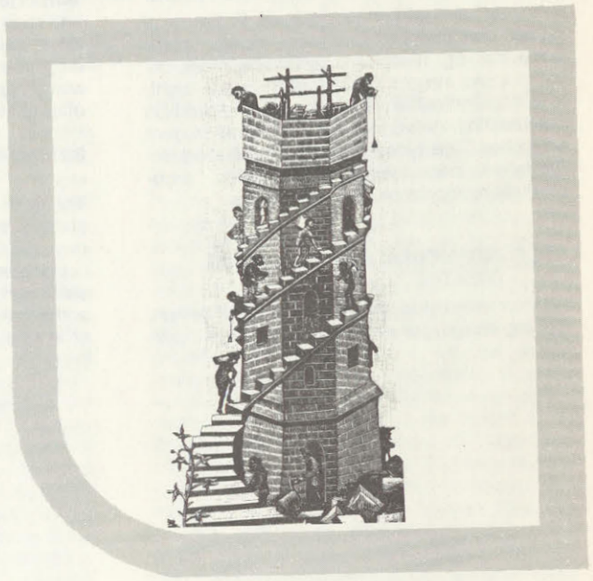
210 FUNDAMENTALS OF TECHNICAL THEATRE

A lab oriented study of the basics of set design, lighting design, construction, rigging, and inproduction operation. Students also address problems of tech theatre for various types of staging, and briefly study theatre architecture. Emphasis is on students' lab work in preparing and running one of two Garrick Players productions, and on design projects. (In alternate years. Not offered in 1978-79.)

220 FUNDAMENTALS OF ACTING S
Mr. Tutterow

The basic Stanislavski acting method is studied and practiced through interpretive and physical exercises, monologues, and scenes. The work culminates in final project scenes presented in a studio production for the public. Prerequisite: some previous acting experience and consent of the instructor.

Interdisciplinary Majors and Sequences



INTERDISCIPLINARY COMMITTEES

In lieu of a major in one academic discipline, a student may choose to concentrate in an interdisciplinary field of study. A student who wishes to elect one of these concentrations should confer with the chairperson of the appropriate committee. The interdisciplinary concentrations offered are:

American Studies

Mr. Milne (Chairperson), Mr. Zilversmit, Mr. C. Miller

Students wishing to expand beyond the limits of the traditional disciplines will find in the American Studies program a range wide enough to contain their interests. By providing an inter-disciplinary approach to the study of an entire civilization, the program searches for an understanding of the relations amoung institutions, ideas, and the artistic imagination within the American experience. The student acquires a firm command of the history, literature, and political institutions of the United States, and chooses, according to his interest, additional studies among the allied fields of anthropology, economics, fine arts, philosophy, religion, and sociology. The aim is not merely to collect course offerings from the various departments; rather, it is to enable the student to synthesize the entire American experience through his own work. Independent study, thus, is an important part of the American Studies program.

The major consists of the following courses: one of the series American Studies 210-220 (Introduction to American Studies); History 365 (American Thought); American Studies 480 (Senior Seminar); a course in American politics; an additional course in American history; a course in American literature; a course in American music or art; and five additional courses selected by the student with the approval of his adviser from a list of courses with an American emphasis. This will include independent studies and a senior thesis where appropriate.

212 INTRODUCTION TO AMERICAN STUDIES: NATURE IN AMERICAN LIFE W Mr. C. Miller

An examination of American attitudes toward nature from the confrontation of Europeans and the New World through agrarian democracy, Thoreau, and the conservationists, to the contemporary environmental movement.

480 SENIOR SEMINAR S

Research seminar; readings, oral reports; a major research paper required.

Area Studies

†Mr. Van Hoey (Chairperson), *Mr. Mojekwu, Ms. Moodie (Acting Chairperson), Mr. Finnegan, Ms. Fairley, Ms. Kalkas

This major serves students whose intellectual curiosity or vocational orientation (foreign service, business overseas, teaching, international organizations, governmental or para-governmental institutions concerned with population, nutrition, conservation, health, crime, etc.) would be furthered by the study of regions and countries outside the United States. It also opens for the student rich possibilities for exploring the potentialities of cross-disciplinary social science.

Individually tailored study plans, combining courses and independent study (tutorials and research), can take several forms, but in every case require three major papers. These papers are to be in-depth studies of topics chosen from three of the following fields of emphasis: the arts and literature, the history, the social structure, and the political life of the chosen area.

Present faculty and library resources are particularly favorable for studies on Africa, Latin America, Western Europe (France, Germany, the Netherlands), and faculty guidance is available for interests in Israel, Japan, the Soviet Union and Spain. Students who wish to examine the options which are open to them at present will wish to talk with the chairperson of the committee as a first step toward outlining proper study plans.

Because several faculty members have sustained research experience in Africa, particularly Mr. Van Hoey, Mr. Mojekwu and Mr. Finnegan, emphasis within the Area Studies major is being given to African studies. It is intended for students whose present educational interests or future career goals (including teaching in Afro-American studies) veer toward knowledge of, and relations with, the new nations of the African continent. The program consists of courses which are structured in politics, sociology and anthropology, and history, complemented with tutorials and independent studies — possibly a term abroad in Africa. The proximity of Lake Forest College to the Africana Library at Northwestern University opens almost unlimited resources for the student's work in this field.

Course requirements for African Studies are: History 240 (History of Africa); Politics 313 (Government and Politics of Sub-Saharan Africa); Sociology and Anthropology 120 (Kinship); Sociology and Anthropology 210 (Principles of Social Organization); Politics 413 (Senior Seminar: Modern Africa); plus three electives taken in the departments of History, Politics, Sociology and Anthropology, or sustained work in relevant foreign languages.

Behavioral Sciences

Mr. Glassman (Chairperson), Mr. Finnegan, Mr. Watson

The Behavioral Sciences committee is particularly aware of the fact that most areas of a liberal arts curriculum are concerned in some way with elucidating human behavior. We are available to assist those who wish to undertake a deliberate examination of this broad issue or who wish to study any aspect of it. In addition to the possibility of guiding an official major in behavioral

†Sabbatical Leave, 1978-79.
*Leave of Absence, 1978-79.

sciences, we want to help those who choose the usual disciplinary majors to find courses relevant to their interests, to contact professors with similar interests, to find relevant material, etc., outside their major discipline. While the committee is particularly interested in developing individualized plans for study, we make the following suggestions for possible interdisciplinary study and invite discussion of specific course sequence and independent study options: Communication and language, nonverbal communication, human biological and social evolution, ethology and sociobiology, general systems theory, logic and method of social scientific investigation, comparison of humanistic with scientific inquiry, cybernetics and human-machine relationships, social impact of modern technology.

A major in Behavioral Science requires at least 8 courses, the program to be designed in consultation with the committee. One of these must be a course in scientific method, e.g., Psychology 220 or Sociology and Anthropology 310. A course in statistics is recommended, e.g., Mathematics 150 or Psychology 420 or Economics 330. Majors will be asked to hand in, for approval, a brief progress report and restatement of plans each year.

Comparative and World Literature

Mr. Greenfield, Ms. Grisham (Chairpersons), Mr. Bennett, Mr. Carlin, Mr. Sosa, Ms. Staw

Students whose interest in literature reaches across traditional academic disciplines and barriers of language, may plan a substantial major program of studies in comparative world literature around a field of concentration of their own choice. The variety of offerings in comparative world literature, foreign literatures, and English permits a wide range of possible topics (The old world; medieval literature; Renaissance and Baroque; narrative genres; Modernism; others). Each student will be assisted by faculty in developing a viable, balanced program to suit her/his interests and purposes.

The courses offered in CWL may be chosen as electives to complement major programs in English or one of the foreign literatures. For general information regarding the program or individual courses, consult any member of the CWL committee and teaching faculty. Advising of majors: Mr. Greenfield, Ms. Grisham.

Prerequisites for the CWL major: 210 level in a foreign language (normally completed by the winter term of the junior year, with a grade of "C" or better), or equivalent; CWL 100 (normally taken during freshman or sophomore year, with a grade of "C" or better). Major program (eight courses): two courses in foreign language literature beyond 210; two courses in world literature normally chosen from offerings in English; one course in literature in translation from a language other than the student's principal foreign language; two courses focused on a period, movement, genre or author, chosen from offerings in CWL, foreign language literature, and English; CWL 400.

Recommended Electives: Students are urged to study a second foreign language at least through 112. A variety of suitable courses to complement the student's chosen area of concentration are listed elsewhere in the Bulletin. The following courses are especially recommended: History 235 (History and Literature); History 236 (Literature, Society and Dissent in Russia); History 279 (Psycho-History); Philosophy 115 (Existentialist Thought); Philosophy 230 (Nihilism/Paradise); Religion 201 (Biblical Heritage: Myth, Legend and History); Religion 202 (Biblical Heritage: Law, Prophets and Teachings).

100 INTRODUCTION TO COMPARATIVE LITERATURE F Ms. Staw

Introduction to the scope and methods of Comparative Literature through the study of selected works from a wide range of periods and national literatures. Topics include genre, theme, movements, cross-cultural influences, literature and other disciplines (history, philosophy, the fine arts, biology), problems in translation, and the linguistic approach to literary texts. Fundamentals of literary interpretation and critical writing.

201 FRENCH LITERATURE IN TRANSLATION: THE ROMANTIC SOUL S Mr. Carlin

Rousseau, Chateaubriand, Stendhal. Readings, discussion and commentary on *The Rêveries, The Confessions, Atala, René* and *The Charterhouse of Parma.* The role of the dream, the exotic setting, and the solitary hero.

202 CONTEMPORARY SPANISH-AMERICAN LITERATURE IN TRANSLATION

The current trends in Spanish-American literature with emphasis on the "new novel"; Asturias, Borges, Carpentier, Cortázar, Garciá Márquez, Onetti, Rulfo, Vargas Lloas, et al. (Not offered in 1978-79.)

203 GERMAN FICTION IN TRANSLATION

An historical view of modern German literature from Goethe and Kleist to Grass and Böll reflected in significant works of narrative fiction. (Not offered in 1978-79.)

210 LITERARY AND CULTURAL STUDIES: THE MODERN SHORT STORY S Mr. Greenfield, Mr. Garneau

The development of the short story in the twentieth century, with special emphasis on the contribution of American and French authors: Steinbeck, Maupassant, Hemingway, Salinger, and others.

220 MAJOR AUTHORS

A close comparative study of two major authors from different national traditions. (Not offered in 1978-79.)

230 MAJOR GERMAN WRITERS OF THE 20TH CENTURY: MANN, KAFKA, BRECHT F Ms. Grisham

Representative works by three German authors of undisputed international rank: Thomas Mann's *Dr. Faustus* and *Felix Krull;* a novel and shorter prose by Kafka; plays, poetry, and essays on the theatre arts by Brecht. In English.

310 MOVEMENTS AND PERIODS: AVANT-GARDE LITERATURE

Symbolism, Dada, Surrealism, "New Objectivity", and the surrender of meaning; poetry, plays, and fiction from Baudelaire to Handke. (Not offered in 1978-79.)

400 LITERARY THEORY AND CRITICAL WRITING Staff

Normally offered as a tutorial for majors in their senior year. Readings and preparation of a critical or research paper under the guidance of a faculty tutor. Offered as required. (one senior thesis credit may be substituted for CWL 400.)

LITERATURE IN FOREIGN LANGUAGES

See offerings in French, German and Spanish.

WORLD LITERATURE

The following courses, also cross-listed in the English Department, satisfy the world literature requirement for Comparative World Literature majors:

109 MYTH AND LITERATURE

(Not offered in 1978-79.)

200 MASTERPIECES OF LITERATURE: CLASSICAL AND MEDIEVAL FS Ms. Cowler, Mr. Whatley

204 CONTEMPORARY LITERATURE S Mr. Greenfield

205 INTRODUCTION TO FOLKLORE W Mr. Greenfield

206 LITERARY TYPES AND TRADITIONS: COMEDY AND THE COMIC W Mr. Bennett

209 CONTINENTAL LITERATURE IN TRANSLATION W Mr. Milne

See English Department listing for descriptions of above six courses.

PERIODS, MOVEMENTS, GENRES, AND AUTHORS

The following courses, offered in the English Department, satisfy the period, movement, etc., requirement for Comparative World Literature majors: English 213 (Interdisciplinary Studies, The Adolescent in Modern Fiction); English 202 (Shakespeare); English 300 (Medieval Studies); English 301 (The Renasissance); English 304 (The Age of Satire); English 305 (The Romantic Period); English 308 (Modern Drama); English 309 (Modern Fiction); English 400 (Chaucer); English 484 (Theory of Literature). See English Department listing for above course descriptions.

Environmental Studies

Mr. Weik (Chairperson), Mr. Thompson, Mr. Watson

An interdisciplinary concentration in Environmental Studies should include the following courses: Biology 210, 211, 212 (General Genetics); Chemistry 110 (Atoms, Molecules, and Matter);

Chemistry 111 (Chemical Equilibrium); Chemistry 112 (Rates, Energy, and Analysis); Economics 110 (Principles of Economics); Mathematics 150 (Introduction to Probability Theory & Statistical Inference) or Economics 230 (Economic Statistics); Mathematics 170 (Introduction to Computer Science); and one course in Politics above the introductory level to be determined in consultation with the Environmental Studies Committee.

In addition to the above ten required courses, the student must take at least four of the following recommended courses, and should select them according to his/her individual interests in consultation with the E.S. Committee: Biology 232 (Microbiology); Biology 245 (Ornithology); Biology 250 (Vascular Plants); Biology 252 (American Forest); Biology 260, 261 (Marine Biology); Biology 340 (Entomology); Biology 356 (Freshwater Algae); Biology 360 (Ecology); Chemistry 220 (Structure and Function of Organic Molecules); Chemistry 221 (Organic Reactions and Structural Analysis); Chemistry 300 (Biochemistry); Economics 240 (Regional Economics) and Sociology and Anthropology 340 (Demography). Minor adjustments in the program are possible but must be approved in advance by the Environmental Studies Committee.

The Committee recognizes the importance of Mathematics 110 and 111 (calculus) and urges the student to consider enrollment therein, also.

The use of independent studies for topics of special interest to the student also will be encouraged. During the winter term of either the junior or senior year, or during the summer between these two periods, the able student will be encouraged to participate in an internship program (to be arranged by the College) with an appropriate environmental agency.

Humanistic Inquiry

Mr. Grossman (Chairperson), †Mr. Hansen, Ms. Hentz

The function of the committee is to guide the student in developing a program in the humanities which bridges different disciplines. For example, a student might wish to plan a program culminating in a study of the art, history, literature and philosophy of a particular period; or the study of a style, such as the baroque, as it appears in art, music, and literature; or the study of an idea, such as gravity or love.

Interested students must submit for committee approval a study plan which defines the student's interests and goals, lists relevant courses and independent study projects and suggests faculty resources. Requirements will be mutually agreed upon by the committee, the student and his principal advisor (who need not be a member of the committee). Ordinarily, application should be made no later than the first term of the junior year.

International Relations

Mr. Galloway (Chairperson), Mr. Baade, Mr. Finnegan, *Mr. Moodie

A student concentrating in International Relations is concerned with the approaches by various disciplines — politics, history, economics, sociology, and psychology — to problems which are global in scope, e.g., war and peace, development and under-development, imperialism and national self-determination.

A student concentrating in International Relations will find his or her preparation excellent background for positions in government, especially in the foreign service and the United States Information Agency. In addition, positions with international institutions, such as the specialized agencies of the United Nations and various international businesses are available. Furthermore, the major is a base for social service positions at the national and international level, e.g., the Peace Corps and church groups. Lastly, several majors each year go on to graduate school in political science, law, or business administration.

A major in International Relations must take a core set of courses which will give him or her a firm basis from which to study advanced areas in depth. The core courses will acquaint the student with concepts such as the balance of power, the development of the nation state system in Europe,

†Sabbatical Leave of Absence, 1978-79.
*Leave of Absence, Spring, 1979.

non-Western history, basic models of human societies, and basic economic principles. The required core courses are World Politics (Politics 340), Modern European History (History 111), Human Societies (Sociology and Anthropology 110), and Principles of Economics (Economics 110).

The completion of a foreign language through the 211 level is also a requirement for graduation.

Students must also take two courses from a specifically comparative perspective so as to become familiar with differences and similarities between different states and societies. The two courses may be selected from Comparative Economic Systems (Economics 111), Comparative Communist Systems (Politics 211), Comparative European Constitutional Systems (Politics 210), Latin American Politics (Politics 214), Introduction to African Politics and Society (Politics 213), and Non-Western Politics (Politics 212).

Upon completion of the core courses and two comparative courses, a student must take four electives which will enable him or her to focus interest on a series of interrelated topics in preparation for the seminar or a senior thesis. These four courses or independent studies or internships are to be chosen in consultation with the Chairperson.

There is a senior seminar (I.R. 480) in which a sequence of interrelated topics will be analyzed jointly by students and professors. The topic for 1979 is "International Political Economy."

Scientific Inquiry

Mr. Shively (Chairperson), Mr. Martin, Mr. Runge

The use of scientific methods and techniques shall be the basis for an investigation of a topic, whether it be scientific or humanistic. Examples of such kinds of projects might be: To explore the use of laser holography as a new art medium; the use of statistics and computer science to investigate a topic in sociology, economics, history, etc. Projects should be submitted to the Committee on Scientific Inquiry for approval.

SEQUENCES

In addition to the interdisciplinary majors, the curriculum also includes a select group of interdisciplinary course-sequences and concentrations, in each of which a number of related courses from different departments are organized around a central topic, such as Women's Studies or Computer Science, and constitute a minor program of study in that field of inquiry. A student who develops an interest in one of these topics consults with the Advisory Committee in order to decide upon a suitable selection and sequence of recommended courses. Upon successful completion of the sequence, which may or may not culminate with an internship or research experience, the student has the option of having the fact recorded on the transcript.

Ancient Mediterranean Civilizations

This interdisciplinary concentration focuses on the ancient Near Eastern, Greek and Roman cultures which are the roots of our western heritage.

In addition to the courses in Ancient Mediterranean Civilizations described below, the following courses currently offered by various departments of the College are relevant to the concentration: Art 210 (Ancient Art), Art 220 (Classical Art-Athens Study Term), English 109 (Myth and Literature), English 200 (Masterpeices of Literature), History 210 (The Ancient World), Philosophy 211 (Ancient Greek Philosophy), Politics 357 (Political Thought: Plato to Machiavelli), Religion 201 (Biblical Heritage: Myth, Legend and History), Religion 202 (Biblical Heritage: Law, Prophets and Teachings), Religion 209 (Archaeology of the Biblical World), and Sociology/Anthropology 209 (same as Religion 209).

A student completing six course credits in the concentration from at least four disciplines (counting Ancient Mediterranean Civilizations 100, 110 and 200 as a discipline) has the option, with the approval of a faculty supervisory committee, of having the fact recorded on his or her transcript. The committee also assists students wishing to shape an interdisciplinary major in humanistic inquiry focused on studies in ancient civilizations.

Under the rubric of Ancient Mediterranean Civilizations three courses are offered which deal with different aspects of Ancient Greek

civilization in particular and which are closely linked to the Athens Study Term. Formerly designated Classical Civilization 100, 110 and 200, these are now entitled Ancient Mediterranean Civilizations 100, 110 and 200.

100 READINGS IN GREEK CIVILIZATION F
Mr. Cole

Introduction to the history, culture and literature of the Greeks from the Homeric Age through the Classical Period. Class discussion of primary readings in translation from Greek poets, playwrights, historians and philosophers, from Homer to Aristotle, plus secondary resources focused on the history, geography, and culture of ancient Greece.

110 ARCHAEOLOGY OF THE ANCIENT GREEK WORLD W Mr. Cole

Introduction to major archaeological sites and discoveries in the Aegean region, from the Minoan and Mycenaean sites on Crete and the Peloponnese to Classical remains at Athens, Delphi, Epidaurus and Olympia and the Hellenistic to Roman development of cities such as Pella, Corinth, Miletos and Ephesus. Attention will be given to aspects of Greek culture and history reflected in the physical remains and to the evolving dsicipline of archaeological investigation. Slide-illustrated lectures, discussion of selected readings and student reports on individual research.

200 CLASSICAL CIVILIZATION: ON-SITE STUDY S

On-site study of the cultures of the Aegean world from Minoan through Byzantine periods as understood through ancient sites and museum artifacts examined within the geographic setting of the Aegean area. Study in Athens supplemented by five weeks' travel for study at sites on Crete, the Peloponnese, central and northern Greece. (Normally two course credits.) Prerequisites: one course in the literature and history of ancient Greece such as Classical Civilization 100, 110 or History 210, and one course in art history.

Classical Civilization 200 and Art 220 comprise the three-course Athens Study Term, a Lake Forest off-campus term.

N.B. Students who have already taken any or all of the former Classical Civilizations 100, 110, and 200 may not take the equivalent Ancient Mediterranean Civilizations course or courses for credit.

Black Studies

The sequence in Black Studies is provided by courses in the Departments of History and Politics. These courses are History 130 (History of Afro-America), History 264 (Black Leadership and Ideology), Politics 213 (Introduction to African Politics and Society), Politics 313 (Government and Politics of Sub-Saharan Africa), and Politics 413 (Seminar on Modern Africa).
Advisor: Mr. Douglas

Computer Science

The Department of Mathematics offers a strong program of courses in computer science and related subject matter areas. Students who major in mathematics often elect all the courses offered in computer science. Students who successfully complete the following courses will satisfy the requirements of a Sequence in Computer Science: Mathematics 170 (Introduction to Computer Science), Mathematics 270 (Programming Languages), Mathematics 272 (Data Structures and Data Management), Mathematics 210 (or Mathematics 117 — Honors . . .Linear Algebra), and Mathematics 314 (Numerical Analysis). Upon request students who satisfy the requirements of the Sequence in Computer Science may have this fact recorded on their official transcripts. Advisor: Mr. Shively.

Pre-Management and Business

The interdisciplinary sequence in Pre-Management and Business forms a brief but coherent introduction to the issues and techniques of the business world. The choice of courses, the advisement of interested students, and the general supervision of the program are in the hands of a four-person faculty Advisory Committee. The sequence of courses is as follows. Required: Economics 110 (Principles of Economics); Philosophy 203 (Ethics and the Professions); Psychology 240 (Organizational and Industrial Psychology) or Sociology and Anthropology 210 (Principles of Social Organization). Two out of the following three courses are required: Economics 130 (Accounting I); Economics 230 (Economics Statistics) or Math 150 (Introduction to Probability Theory and Statistical Inference); Math 170 (Introduction to Computer Science). One of the following courses is also required: Economics 340 (Managerial Economics); Politics 320 (Public Administration); History 260 (The American Economy); Economics 131 (Accounting II); Math 272 (Data Structures and Data Management).

In addition, students pursuing the sequence are recommended, though not required, to take an internship with a company or agency to gain practical experience of some aspect of management or business activity.

Upon completion of the sequence, a student has the option, with the approval of the Advisory Committee, of having this fact recorded on his or her transcript.
Advisor: Mr. Helgens

Women's Studies

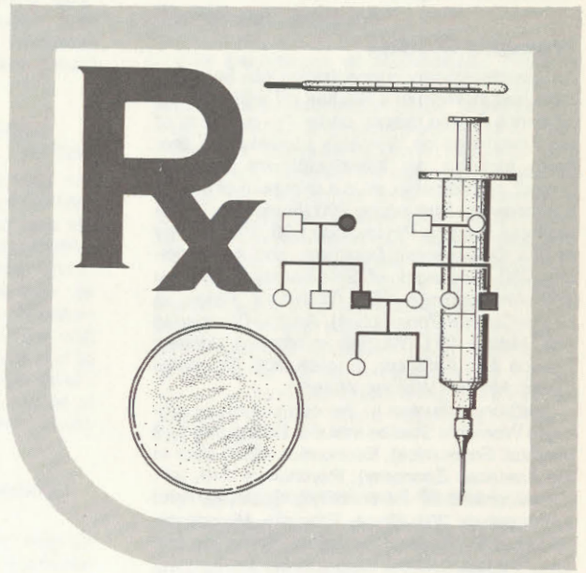
An interdisciplinary concentration has been established in Women's Studies (in addition to a student's course major), under the guidance of the Committee on Women's Studies. The program includes an interdisciplinary research project, or internship, plus a minimum of four of the following: Philosophy 200 (Feminism: Philosophical Issues); Psychology 230 (Psychology of Sex Differences); Sociology and Anthropology 280 (Sociology of Sex Roles), Sociology and Anthropology 360 (Women's Roles in Cross-Cultural Perspective), Art 250 (Women in Art), History 271 (Women in Modern Society: Europe and America); English 206 (Women's Quest: Modern Women Writers).

Additional courses in the curriculum pertaining to Women's Studies include: Economics 112 (Radical Economics); Economics 420 (Labor in the American Economy); Psychology 210, 211 (Development of Personality); Sociology and Anthropology 201 (Race, Ethnicity, Minorities); Biology 130 (General Genetics); Sociology and Anthropology 120 (Kinship and Society).

Upon completion of the sequence, a student has the option, with the approval of the Committee, of having this fact recorded on the transcript.
Advisors: Ms. Eskilson and Ms. Riger

Institute Majors

In 1974 Lake Forest College established its first of three planned Institutes, the Robert E. Wood Institute for Local and Regional Studies. Plans are now ready for a second Institute, this one in the area of modern health services. Institutes are interdisciplinary, building on a core of existing liberal arts courses, and they are career oriented, requiring students to complete an internship in appropriate agencies or businesses. Each Institute is headed by a director who works closely with a group of professors who have their appointments in the various departments but who teach courses which are essential to the particular Institute major.



HEALTH SERVICES INSTITUTE

Professor Murray Herlihy (Acting Director): Economics. Labor Relations. Economics of Health Care.
Associate Professor M. Lee Thompson: Chemistry, inorganic.
Assistant Professor Gregory Finnegan: Social Anthropology.
Assistant Professor Kenneth Kipnis: Philosophy. Medical Ethics. Philosophy of Law.
Assistant Professor Stephanie Riger: Community Psychology. Women's Interests.
Assistant Professor Kathryn Rindskopf: Developmental Psychology. Aging. Human Sexuality.

Complex organizations and health care/delivery systems in our society require skills in management and administration to function effectively. Likewise, work in an ethnically and culturally mixed society demands a more detailed understanding of social facts, problems, and processes than has traditionally been taught in professional programs.

The realization that effective health care requires more than clinical and laboratory expertise has led to the recent development of new occupations, many of which are "paraprofessional". Students training for these occupations must be schooled in ethics, social awareness, and administrative skills as well as the pertinent areas of science. Thus the Health Services Institute hopes to prepare its students, through courses in the regular curriculum, special Institute courses, internships and field research projects, to acquire not only the broad knowledge and fundamental skills of a liberal arts education, but the qualifications for entry level positions in the public and private sectors of health service or for additional study on the graduate level.

Because of the variety of careers in this field, the Institute has a two-tiered curriculum. The first tier consists of a "core" of required courses which will expose all students in the program to an overview of the health services field and issues, and which also gives the students a liberal body of knowledge in each of the main foci within the Institute: natural sciences, social sciences and humanities, and administrative skills. The second tier consists of a minimum of five additional courses, usually of an advanced level, that will provide a focus for the Health Services major and to prepare students not only for their internship but for possible job opportunities as well.

In order to enter or continue in the institute major, an overall "C" grade average with no more than two grades of "D" in all institute related courses will be required.

Institute Courses and Cross-Listed Courses:

110 INTRODUCTORY SEMINAR — CURRENT ISSUES IN HEALTH CARE S
Mr. Finnegan, Mr. Herlihy, Ms. Rindskopf, Mr. Thompson

The purpose of the interdisciplinary, team-taught seminar is to orient the student toward the social, political, economic, and biological problems of health care and its delivery. Some of the topics to be considered from these perspectives will be: Aging, Death and Dying; Social Class and Health Care; Preventative Medicine and Genetic Counseling; Cross Cultural Attitudes Toward Pain and Illness; Problems of Medical Research; National Health Insurance. The format of instruction will include lecture-discussions, guest lectures, report writing, and visits to outside health agencies.

120 ECONOMICS OF HEALTH CARE I W (January) Mr. Herlihy

Analysis of the economic dimensions of health care. Involves in-class examination of health care literature. (Also listed as Economics 120.)

121 ECONOMICS OF HEALTH CARE II W (February) Mr. Herlihy

Analysis of the economic dimensions of health care. Involves field research on health care in Lake County, Illinois. Prerequisite: HSI 120. (Also listed as Economics 121.)

150 INTRODUCTION TO PROBABILITY THEORY AND STATISTICAL INFERENCE S Mr. Bell

Designed for students in the social and life sciences. Finite probability theory, distributions, sampling, correlation, and regression. Chi square and other tests of significance. Emphasis on the use of the computer as a tool and on applications to a variety of disciplines. (Also listed as Mathematics 150.)

OR

230 ECONOMIC STATISTICS F Mr. Watson

Distribution analysis, probability theory, sampling theory, statistical inference, regression and correlation analysis, with emphasis on application of statistical techniques to economic problems and policies. (Also listed as Economics 230.)

201 MEDICAL ETHICS W Mr. Kipnis

Critical examination of ethical issues arising in the application and organization of biomedical resources. Topics such as abortion, malpractice, patients' rights, experimentation with human subjects, distribution of medical care and medical education, allocation of scarce medical resources, concepts of death, genetic research. (Not offered in 1978-79.) (Also listed as Philosophy 201.)

240 ORGANIZATION AND INDUSTRIAL PSYCHOLOGY W Ms. Riger

The human side of management; why people work; increasing worker's motivation; enhancing the productivity of work groups; interpersonal relations in work settings; effective leadership in organizations. (Also listed as Psychology 240.)

395, 396 INTERNSHIP

An important part of each student's experiences will be at least one internship in an extramural health-care related service.

410 SENIOR SEMINAR S

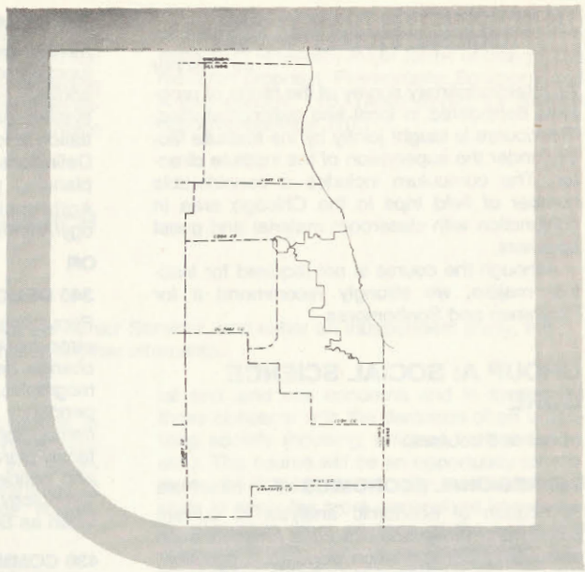
An integration of course theory and field experi-

ence through "game simulation" and other problem-solving techniques. Similar in instructional format to the Introductory Seminar. (Not offered in 1978-79.)

Other Required Courses in Core Curriculum:
Biology 100, 101 (Human Biology)
Chemistry 110, 111 (General Chemistry)
English 100 (English Composition — waived upon evidence of good writing ability)
Economics 110 (Principles of Economics)
Psychology 110 (Survey of Psychology)
Sociology/Anthropology 110 (Human Societies)

Additional Courses:
The student, with Institute approval, will choose five additional courses, from a recommended list of courses, which will suit his or her particular needs.

THE ROBERT E. WOOD INSTITUTE FOR LOCAL AND REGIONAL STUDY



Professor Rosemary Hale: Regional Economics.
Associate Professor Paul Fischer (Director): Urban and Suburban Politics.
Assistant Professor Eugene Muehlbauer: Crime. Social Services and Social Administration.
Assistant Professor Stephenie Riger: Psychology and the Urban Environment. Social Networks.
Assistant Professor Thomas Ticknor: Urban and Economic History.

Through an integrated social science program with heavy emphasis on the acquisition of research tools and practical experience, the Robert E. Wood Institute for Local and Regional Studies guides students to an understanding of the complexities of life in the great metropolitan regions (comprising large inner cities and suburban townships) in which a majority of the world's population now lives. The Institute aims also to help prepare its student members for graduate and professional school and for such careers as planning, public management, and social services in local, regional, and urban contexts.

The Local and Regional core courses in the social sciences, (i.e., in economics, politics, sociology, history and psychology), enable students to explore the various forms of interaction and conflict between local and regional interests, along with economic growth, institutional political settings, demographic movement, and public policy controversies as they affect local and regional concerns. They are followed by a series of courses stressing the acquisition of research and decision-making tools and their application to metropolitan regional problem-solving. The program culminates in a sequence of independent studies and internships which not only integrate the students' previous academic studies but also provide a transition to graduate school and professional work.

Although the Institute focuses on the metropolitan region as a whole, and is particularly concerned with the suburban fringes, it recognizes the significant role of the central city and emphasizes Chicago for this purpose. The Institute's affiliation with the Urban Studies (Chicago Term) of the Associated Colleges of the Midwest (ACM) offers our students an intensive exploration of the complexities of Chicago. The College's own off-campus program, Term in America, gives students the opportunity during the winter term to study a number of eastern seaboard cities as another comparative urban field experience. However, Institute majors, for their culminating research and internships, tend to concentrate their attention on the surrounding communities in the northern suburbs of the Chicago metropolitan region.

110 INTRODUCTION TO LOCAL AND REGIONAL STUDIES W (Jan.)
Mr. Fischer

An interdisciplinary survey of the range of problems considered in local and regional studies. The course is taught jointly by the institute faculty under the supervision of the institute director. The curriculum includes a considerable number of field trips in the Chicago area in conjunction with classroom material and guest speakers.

Although the course is not required for Institute majors, we strongly recommend it for Freshmen and Sophomores.

GROUP A: SOCIAL SCIENCE CORE

(4 out of 5 courses)

240 REGIONAL ECONOMICS F Mrs. Hale

Application of economic analysis to current problems of urban and suburban America, such as housing, transportation, population, pollution, education, discrimination, and segregation. Prerequisite: Economics 110. (Also listed as Economics 240.)

263 THE MODERN AMERICAN CITY S
Mr. Ticknor

The changing functions, scale and quality of urban life. A framework for viewing modern American metropolitan problems in economic and cultural context. Some field work in the Chicago metropolitan area. (Also listed as History 263.)

223 URBAN AND SUBURBAN POLITICS F
Mr. Fischer

Problems of political and social organization in central cities and suburbs. Topics include local political parties, machines, mayors and city managers, and differences between big city and suburban politics. Prerequisite: Politics 120. (Also listed as Politics 223.)

OR

323 REGIONAL POLITICAL BEHAVIOR
Mr. Fischer

The focus is the metropolitan area rather than local communities. Topics include metropolitan reform, city-suburban conflict, and certain metropolitan wide policy controversies like racial integration, equitable taxation and regional transportation. Prerequisite: Politics 120. (Not offered in 1978-79.) (Also listed as Politics 323.)

330 URBANIZATION S Mr. Muehlbauer

Levels and rates of urban concentration in function of expanding scale of organization of society; relations between techno-economic system, demographic movement and differentiation of local and regional settlement patterns. Definitions of urban problems and models of planning policy. Prerequisite: Sociology and Anthropology 110. (Also listed as Sociology/Anthropology 330.)

OR

340 DEMOGRAPHY

Population, size, socio-technical base, and environment; measurement of demographic change (fertility, mortality, migration) and demographic structure (age, sex, education, dependency, life expectancy). Determinants of demographic changes: economy, education, family planning, birth control. Theories, models, and policies. Prerequisite: Sociology and Anthropology 110. (Not offered in 1978-79.) (Also listed as Sociology/Anthropology 340.)

430 COMMUNITY PSYCHOLOGY S
Ms. Riger

The effect of the social and physical environment on the mental health of individuals; the impact of urban and rural settings on people; theories and methods of changing communities; utopian communities. Prerequisite: Senior standing or permission of instructor. (Also listed as Psychology 430.)

GROUP B: RESEARCH TOOLS

(2 courses)

150 INTRODUCTION TO PROBABILITY THEORY AND STATISTICAL INFERENCE S

Designed for students in the social and life sciences. Finite probability theory, distributions, sampling, correlation and regression, chi-square and other tests of significance. Emphasis on the use of the computer as a tool and on applications to a variety of disciplines. (Also listed as Mathematics 150.

OR

230 ECONOMICS STATISTICS F
Mr. Watson

Distribution analysis, probability theory, sampling theory, statistical inference, regression and correlation analysis, with emphasis on application of statistical techniques to economic problems and policies. (Also listed as Economics 230.)

310 SOCIAL RESEARCH: DESIGN F
Ms. Eskilson

Ethical and political considerations regarding social research, logical links between theoretical perspectives, problem selection, and choice of empirical data; qualitative and quantitative aspects of research; major forms of design; the research proposal. Prerequisite: Sociology and Anthropology 110. (Also listed as Sociology/Anthropology 310.)

GROUP C: FIELD AND RESEARCH EXPERIENCES

(4 Courses)

Must include at least one internship, the Senior Seminar, and either an independent study, the ACM Chicago Term, Term in America, or another internship.

273 TERM IN AMERICA W (Feb.)

Field study of community and sub-groups in America. Travel to Boston, Old Sturbridge, New York, Newark, Columbia New Town, and South Carolina to observe the historical varieties of American communities. Prerequisite: History 272, January.

INTERNSHIP W Mr. Fischer

Relates theory to practice by placing students in governmental agencies, community interest groups and public and private planning operations. For more details see Lake Forest internship brochure. (2 course equivalent)

ACM URBAN TERM IN CHICAGO 4 credits, F or S

Wide-ranging experiential exposure to Chicago through seminars, independent study, internships, meeting with community actors, and residence in the city. Campus Advisor: Mr. Ticknor.

RECOMMENDED COURSES

Students are encouraged to augment required courses with a variety of optional and related courses at the college. These recommended courses include:

255 INTRODUCTION TO PLANNING S

A survey of planning concepts, historical development of planning in America, theories of planning, planning and organizational decision making, advocate planning and citizen participation, and an introduction to planning tools. (Not offered in 1978-79.)

355 SEMINAR IN ENVIRONMENTAL AND LAND USE PLANNING S Staff

To provide practical application of environmental and land use concerns and to synthesize those concerns with the demands of an urbanizing society (housing, efficient transportation, etc.). The course will be an opportunity for students to develop some very basic technical skills to apply the more generalized knowledge developed in other portions of the Local and Regional Studies curriculum. Prerequisite: Junior or senior standing or permission of Local and Regional Studies Director.

ART 222 (Modern Urban Architecture) (Not offered in 1978-79.)

ECONOMICS 330 (Introduction to Econometrics) (Not offered in 1978-79.)

ECONOMICS 420 (Labor in the American Economy)

HISTORY 255 (American Social History)

HISTORY 264 (Black Leadership and Ideology)

MATHEMATICS 170 (Introduction to Computer Science)

POLITICS 320 (Public Administration)

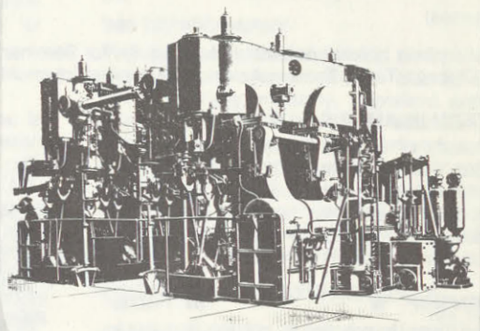
PSYCHOLOGY 240 (Organizational and Industrial Psychology)

SOCIOLOGY AND ANTHROPOLOGY 201 (Race, Ethnicity, Minorities) (Not offered in 1978-79.)

SOCIOLOGY AND ANTHROPOLOGY 240 (Deviance and Crime)

SOCIOLOGY AND ANTHROPOLOGY 320 (Social Research: Technique)

Cooperative Degree Programs



While the faculty and administration of the college have seen fit to establish the institute program, by which students' career concerns are integrated into the liberal arts curriculum, a number of reputable professional schools have recognized the importance and value of grounding even highly specialized professional training for specific careers, such as engineering and nursing, in the liberal arts tradition. To that end, the School of Engineering of Washington University, (St. Louis) the University of Chicago's School of Social Service and Administration, and Rush University (Chicago) have each set up cooperative degree programs with Lake Forest College. Their purpose in this is to ensure that an important percentage of their narrowly specializing students will have had their initial training and course work in a liberal arts setting and will bring to their specialized studies not only a fundamental knowledge of their subject, but also a sense of broader ethical concerns and a flexibility of mind which the small college is able to foster. In the following programs students spend their first two or three years of college at Lake Forest and then go on to their respective pre-professional schools for a further two years to complete their training in their chosen fields.

3-2 PROGRAM IN ENGINEERING

Lake Forest cooperates with Sever Institute of Technology, Washington University, St. Louis, in a program designed for students who wish to become professional engineers but who also wish to receive a rigorous liberal arts education at the same time. The program requires each participating student to complete three years of course work at Lake Forest before going on to Sever Institute of Technology, in the School of Engineering and Applied Science at Washington University, for a further two years, after which time he or she receives a Bachelor of Arts degree retroactively from Lake Forest and a Bachelor of Science from Washington University. With an enhanced background

in social sciences and humanities, the prospective engineer is better prepared to assume the responsibilities of leadership in contemporary society.

The exact selection, combination, and sequence of courses to be taken at Lake Forest, both in the natural sciences and in the social sciences and humanities, depends on the type of engineering to be pursued at Washington University. Early consultation with the program advisor, Mr. Faber, is vital in order to formulate and initiate the most appropriate course schedule. The recommended core of courses includes the following: 3 or 4 courses in mathematics, 3 in physics, 3 in chemistry, 1 in computer science, 5 in the humanities and social sciences, including 3 in one field with at least 1 at the 300 or 400 level. The remaining courses are drawn from the sciences and humanities at the discretion of the student and advisor.

Admission to the final two years of the program is at the discretion of Washington University. The minimum requirements are a B- average, with no transfer of credit for courses with grades lower than C, and the formal recommendation of Lake Forest College. For further details regarding requirements, options, and course work at Washington University, students should consult with the Lake Forest program advisor, Mr. Faber.

2-2 PROGRAM IN NURSING

Lake Forest College and Rush-Presbyterian-St. Luke's Medical Center have established a joint four-year program leading to the Bachelor of Science degree in nursing from Rush University. Students in this program normally spend the first two years at Lake Forest, working on a series of prescribed courses in the natural and behavioral sciences, to prepare for two years of further scientific course-work and clinical training in the nursing program at Rush. The schedule for the first two years, however, also allows the student to take electives in the liberal arts and thereby to acquire a good general education and enjoy the atmosphere of undergraduate college before proceeding to the more specialized training of the nursing school. The precise combination, and the timing and sequence of courses are worked out in consultation with the student's advisor and depend on the student's preparation and the College's class schedule, but the core requirements which each candidate for the nursing program must complete at Lake Forest College are as follows: Chemistry 110 and 111 (Inorganic Chemistry), Chemistry 220 (Organic), Biology 240 (Vertebrate Structure and Function), Biology 241 (Vertebrate Physiology) or Biology 242 (Vertebrate Embryology), Biology 232 (Microbiology), Mathematics 150 or Economics 230 (Statistics), Psychology 110 (Introductory Psychology) and Psychology 210 (Development of Personality); and at least one other course in Psychology or Sociology/Anthropology. The remaining six courses are electives, to be selected in consultation with the advisor.

It is very important that any student entering Lake Forest with the intention of pursuing the Rush Nursing Program should begin fulfilling the requirements immediately, if he or she wishes to move on to Rush at the end of two years. Consultation with the program advisor, Ms. Klingbeil, is essential *prior to registration for the freshman year.*

Nursing students must maintain an overall average of C or better, including no more than two D's in the required core courses; this is to ensure that those students whom the College recommends to proceed to the final two years of the program should have the best possible chance of success.

During the last two years of the program, at Rush's medical center in Chicago, students take a number of advanced courses in the natural and behavioral sciences, in addition to twelve to fifteen hours a week of clinical experience in the 850-bed hospital, in the areas of medical, psychiatric, community, surgical, pediatric and obstetrical nursing. Upon completion of the four-year program, the graduate receives a Bachelor of Science in Nursing from Rush University and is eligible to take the examination to become a Registered Nurse, or to go on to graduate study in nursing.

2-2 PROGRAM IN MEDICAL TECHNOLOGY

Parallel with the joint program in Nursing is a recently established program in Medical Technology which enables qualified Lake Forest students to transfer at the end of the sophomore year to Rush University College of Health Sciences. There the students pursue a final two years of course work and laboratory work in order to receive the degree in medical technology, thereby preparing for a career in this vital aspect of the medical profession and the expanding health-care field. Lake Forest students in the program take a core curriculum of courses in the natural and behavioral sciences,

along with an appropriate selection from the humanities and social sciences. Admission to the final two years of the program, at Rush University, is dependent on grades (all required courses must have a C or better), and on the evaluation by Lake Forest faculty and by Rush University.

The basic course requirements for the first two years, at Lake Forest, are the same as for the Nursing program except that Pre-Medical Technology students must take Chemistry 112 (Qualitative Analysis) as well as Chemistry 110 and 111 (General Inorganic Chemistry), and they are *not* required to take Psychology 210 (Development of Personality). Students who hope to complete the basic requirements successfully within the two years must begin them in their first term at Lake Forest. Therefore, contact with one or more of the faculty on the Health Careers Advisory Committee before freshman registration is crucial. Ms. Klingbeil is the principal advisor for both the cooperative programs with Rush University.

3-2 PROGRAM IN SOCIAL SERVICE

The 3-2 program with the University of Chicago's School of Social Service and Administration provides qualified Lake Forest students with an opportunity to enter graduate school following the junior year, with the purpose of obtaining a Master of Arts degree in social service administration or counselling. The Bachelor of Arts from Lake Forest College is awarded retroactively after completion of the University of Chicago Masters requirements. The program has two directions of study: one for students who wish to concentrate on counselling, the other for those who are primarily interested in social service administration.

Of the 24 courses taken during the three years at Lake Forest College, students will normally be asked to complete 8 in Sociology/Anthropology, and 6 in Psychology, if their preference is for social service administration; and 8 in Psychology with 6 in Sociology/Anthropology if they intend to concentrate on counselling. The actual selection and distribution of courses is worked out by the student and the advisor. Some internship experience is normally included in this course work.

Admission to the University of Chicago part of the 3-2 program is not automatic; students must demonstrate in their undergraduate work a high degree of competence and aptitude, as measured by performance in classroom courses and internships, and by faculty evaluation.

Students and prospective students interested in exploring social work as a career possibility should get in touch with Mr. Muelhbauer or Ms. Riger, the program advisors. It is important to get an early start on planning an appropriate curriculum, if it is to be completed successfully in three years.

Departmental Majors

ART and ART HISTORY

*Professor Michael B. Croydon: Sculpture. Photography. 20th Century Art History. Painting and Drawing.
Professor Alex F. Mitchell (Chairperson): Painting. Drawing. Renaissance through Modern Art History. American Art.
****Professor Franz Schulze: 20th Century Art History. Architectural History. American Art and Art Criticism.
Instructor Laura McKeon: Medieval Renaissance Art History. Ancient through Renaissance Art History.
Instructor Luis Alonso: Drawing. Painting. 20th Century Art.
‡Lecturer Ramona Mitchell: Painting, Drawing, Monoprint.
‡Lecturer Robert Orr: Film Making.

The department offers one major: Art History.

The principal direction of the department is theoretical rather than practical. The major is in Art History. Nonetheless, in the belief that some personal experience of what an artist actually does is a necessary and enriching accompaniment to art historical study, the department requires that all majors take one course in Studio Art (Art 130), and it encourages them to take more than one. It is the policy of the department that creative work be encouraged. A number of advanced studio courses are offered for credit; and it is possible to take additional courses in the studio area at Barat College.

Art History is a humanistic discipline, and its study should relate to the methods and standards the student will encounter throughout the college. The course work in Art History concerns itself with those things theoretical, historical, critical, and aesthetical, which should add, not only to one's

*Leave of Absence 1978-79.
‡Part-time Teaching, 1978-79.
****Leave of Absence, Spring 1979.

appreciation and understanding of the visual arts, but which, further, are central to any more advanced scholarly approach to the field. The courses are designed to introduce students to the scholarly procedures of the art historian; and, at the same time, they are aimed at those students who wish to expand their knowledge and understanding of art, but are innocent of professional ambitions in the discipline.

The fundamental problems of the history and appreciation of art are explored in a basic course, Art 110, (Introduction to the Visual Arts), a prerequisite for all Art History majors and for anyone wishing to enter further courses in Art History. The more advanced courses deal in a detailed way with the main periods and styles of Western Art, with American Art, and with a variety of more specialized concerns of the art historian.

The history of Western Art from ancient times until the present day is covered in the sequence of courses Art 210, 211, 212, 213, 310, 311, 312, 313, 314. In addition to Art 110, majors must take at least five courses out of this sequence: and if they wish to have some really complete view of the subject, they should take all the courses listed in the sequence plus Art 111 (History of Architecture). As has been indicated above, one course credit in Art 130 is required for the major, but it must be emphasized that Studio Art credits do not count toward the total number of courses required for the major. Admission to Studio Art courses beyond Art 130 is selective and dependent upon the attainment of a high standard of work in Art 130. Art 131 (Drawing), Art 132 (Creative Photography), Art 133 (Film Making), and Art 240 (The Physics and the Art of Photography), are exceptions to this rule, and have no prerequisites.

110 INTRODUCTION TO THE VISUAL ARTS FS Ms. McKeon, Mr. Mitchell, Mr. Schulze

An analytical and historical survey of the visual arts from antiquity to the present. A prerequisite for all other courses in art history and required of all majors.

111 HISTORY OF ARCHITECTURE F Mr. Schulze

Evolution of architectural style and thought from antiquity to the present.

130 STUDIO ART: ELEMENTS OF DESIGN FS Mrs. Mitchell

Introduction to basic design problems in various two and three dimensional techniques and media. A prerequisite for most other courses in studio art.

131 STUDIO ART: DRAWING W Mr. Mitchell

Principles and practice of drawing with emphasis on drawing from the model.

132 STUDIO ART: CREATIVE PHOTOGRAPHY

A basic course in photography offered normally in the Summer term.

133 STUDIO ART: FILM MAKING S Mr. Orr

A study of film with an emphasis on production and the various techniques of film making.

210 ANCIENT ART F

Painting, sculpture, and architecture of ancient civilizations of Egypt, Mesopotamia, Greece, and Rome.

211 MEDIEVAL ART

Art of the Early Christian, Byzantine, and Medieval periods. (Not offered in 1978-79.)

212 ITALIAN ART OF THE EARLY RENAISSANCE S Ms. McKeon

Painting and sculpture in Italy from the late 13th through the 15th century.

213 NORTHERN EUROPEAN ART OF THE RENAISSANCE PERIOD S Mr. Mitchell, Ms. McKeon

Painting, sculpture, and the graphic arts of the Netherlands, Germany, and France from the 14th through the 16th century.

220 CLASSICAL ART S

Art and architecture of the Hellenic world in the Minoan through Byzantine Periods. (Offered only in Athens.)

221 HISTORY OF MEDIA AND MATERIALS

The evolution and use of different media, materials, and techniques by the sculptor, painter, and draughtsman in the course of history. (Not offered in 1978-79.)

222 MODERN URBAN ARCHITECTURE

International building design (mostly commercial and industrial) and city planning since the second half of the nineteenth century. (Not offered in 1978-79.)

223 20TH CENTURY SCULPTURE

The evolution of sculpture from Rodin to the present. (Not offered in 1978-79.)

224 MEXICAN ART

A survey of Mexican art, including architecture and arts and crafts from pre-Hispanic times to the present. Classroom work will be supplemented with visits to museums, baroque buildings and Indian ruins. (Taught in Guadalajara as part of the LFC Fall Term in Mexico.)

230 STUDIO ART: PAINTING FS

Advanced creative projects using various painting media.

231 STUDIO ART: SCULPTURE

Advanced creative projects using traditional and contemporary three dimensional media. (Not offered in 1978-79.)

232 STUDIO ART: GRAPHIC ARTS W Mrs. Mitchell

Advanced creative projects in various printmaking media. 1978-79: Monoprint.

240 STUDIO ART: THE PHYSICS AND THE ART OF PHOTOGRAPHY W Mr. Donnally

Creative use of the photographic medium along with study of appropriate scientific principles and aesthetic values. Works of influential photographers and important photographic themes will be analyzed. (Also listed as Physics 200).

250 SPECIAL STUDIES: WOMEN IN ART W Ms. McKeon

An investigation of the role of women in the visual arts.

251 SPECIAL STUDIES: "THE CHICAGO SCENCE" W Mr. Schulze

An investigation into the artistic resources of Chicago.

253 SPECIAL STUDIES: THE ANIMAL IN ART

The depiction of the animal in art from antiquity to the present day. (Not offered in 1978-79.)

310 ITALIAN ART OF THE 16TH CENTURY S Mr. Mtichell

Painting and sculpture of the High Renaissance and Mannerist artists in Rome, Florence, and Venice.

311 17th CENTURY ART F Mr. Mitchell

Painting and sculpture in Europe in the 17th century.

312 18TH CENTURY ART: ROCOCO TO REVOLUTION W Mr. Mitchell

Painting and sculpture in Europe in the 18th and the early 19th Centuries, from Watteau to Goya.

313 19TH CENTURY ART S Mr. Mitchell

Painting and sculpture in Europe during the 19th Century, from the Romantic Movement to the Post Impressionists.

314 20TH CENTURY ART FS Mr. Schulze

Painting and sculpture in Europe and the United States from Post-Impressionism to the present.

320 AMERICAN ART F Mr. Schulze

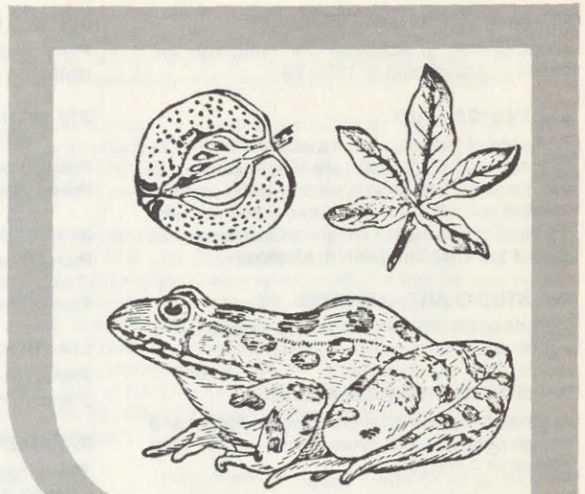
The visual arts in North America, covering painting, sculpture, architecture, and the applied domestic arts, from art of the colonial period to the present.

350 SPECIAL STUDIES: GREAT ARTISTS W Ms. McKeon

Intensive study of the work and lives of individual great artist. In 1978-79: Hieronymus Bosch.

351 SPECIAL STUDIES: ART CRITICISM W

The theory and practice of art criticism and its role and influence in the arts. (Not offered in 1978-79.)



BIOLOGY

Professor Frederic Giere (Chairperson): Vertebrate Physiology. Radiobiology.
Professor Charles Louch: Ecology. Vertebrate Biology. Ethology.
Assistant Professor Thomas Sanders: Developmental and Behavioral Genetics.
Associate Professor Kenneth Weik: Botany. Phycology. Electron Microscopy.
Assistant Professor Douglas Brown: Molecular Biology. Microbiology.

The Biology Department at Lake Forest College offers a curriculum designed to meet the needs of students who are planning to become professional biologists and also of those who are simply interested in increasing their understanding of the living world. A diversity of courses accommodates students with a variety of interests, including molecular biology, botany, physiology, genetics, and ecology. Tutorials and independent studies are easily arranged for students who are interested in studying subject matter that is not covered in the regular curriculum. Although there are no special pre-medical, pre-dental, or pre-veterinarian programs, the department offers a combination of courses to help students prepare themselves to enter professional schools in these areas. In addition, there are pre-nursing and pre-medical technology programs which the College operates in cooperation with the Rush Colleges of Nursing and Allied Health Sciences.

The department's laboratories are well equipped for teaching and research, and courses are designed to help students become familiar with a variety of research equipment. In addition, the department manages two natural areas which are available for field work in courses or for undergraduate research.

Two courses, Biology 100 and 101, are specifically designed for non-biology majors and are open to both freshmen and upperclassmen. They do not count toward the biology major. Three other courses, Biology 245, 250, and 252, are also available to non-majors since they have no prerequisites. However, freshmen may take them only with the consent of the instructor. These courses can be counted toward the biology major.

The minimum requirements for a major in biology are: Chemistry 110, 111, 112 and eight courses in Biology, at least three of which must be at the upper level (numbered 300 or higher). General Biology (Biology 210, 211, 212) is a prerequisite for all of the 300- and 400- level courses offered by the department.

Students who are planning to go on to graudate or professional schools are strongly encouraged to take Organic Chemistry, Calculus, and General Physics. Courses in Computer Science, Statistics, and a foreign language are also desirable.

Students who elect the biology major will be expected to take General Chemistry in their freshman year and General Biology in their sophomore year. It is possible, however, for a student to start the biology sequence in the spring of the freshman year by taking Biology 212 concurrently with Chemistry 112. A person with a good secondary school preparation in biology may take (with the consent of the instructor) Biology 245, 250, or 252 concurrently with General Chemistry.

Students who elect to go into cooperative nursing or medical technology programs, in which they take their first two years at Lake Forest College and their second two years at Rush Colleges of Nursing and Allied Health Sciences, may take Biology 240, 241, and or 242 instead of General Biology. These courses have Chemistry 110 and 111 as prerequisites. Although these may be counted toward a biology major, they cannot be substituted for General Biology by students who decide to stay at Lake Forest for four years, and major in biology.

Psychology 370, (Physiological Psychology), may be counted toward a biology major with the prior approval of the Biology Department.

Qualified students are encouraged to work on a research project with one of the members of the department. These projects may take the form of Independent Studies or Senior Theses.

The department elects students to Beta Beta Beta and Sigma Xi, national honorary societies that are active on campus.

Note: It should be noted that 1978-79 is an interim year in which the Biology Department is phasing into a new curriculum. The new requirements described here apply to entering freshmen and not to students who are presently enrolled.

100 HUMAN BIOLOGY F Staff

A study of the human body and how it is organized to function as an efficient whole. The structure and function of major organ systems will be discussed. Four lectures and one three-hour lab session per week. (For non-biology majors.)

101 HUMAN BIOLOGY W Staff

A study of human heredity, ecology and evolution. This course will examine some of the important ideas about how characteristics are passed from one generation to another, how human populations interact with their environments, and how modern human beings may have evolved from earlier ancestors. Four lectures and two three-hour lab sessions per week. (For non-biology majors.)

130 GENERAL GENETICS F Mr. Runge

A consideration of how genes are inherited in the higher organisms and how they interact to produce the variations necessary for evolutionary development. Three lectures per week, two laboratory meetings per week. Prerequisite: Chemistry 110, 111.

212 GENERAL BIOLOGY S Mr. Louch

A survey of the major plant and animal groups and a study of how organisms and groups of organisms interact with their environment. Four lectures and one three-hour lab per week. Prerequisite: Chemistry 110, 111.

232 MICROBIOLOGY S Mr. Brown

An introduction to the morphology, physiology, classification, and culture of microorganisms. Three lectures and two laboratory sessions per week. Prerequisite: Chemistry 110, 111.

240 VERTEBRATE BIOLOGY F Mr. Giere

The comparative anatomy, embryology, histology, and physiology of vertebrate organisms: classification, reproduction and early development, musculo-skeletal (Locomotion), digestive and respiratory systems. Three lectures and two three-hour labs per week. Prerequisite: sophomore or upperclass standing.

241 VERTEBRATE BIOLOGY S Mr. Giere

The comparative anatomy, embryology, histology, and physiology of vertebrate organisms: nervous and endocrine coordinating systems. Three lectures and two three-hour labs per week. Prerequisite: Biology 240.

242 VERTEBRATE BIOLOGY S Mr. Giere

The comparative anatomy, embryology, histology, and physiology of vertebrate organisms: energy metabolism and temperature regulation,

osmoregulation and urogenital, and cardiovascular systems. Three lectures and two three-hour labs per week. Prerequisite: Biology 240.

245 ORNITHOLOGY S Mr. Louch

Introduction to the biology of birds. Lab work will emphasize bird recognition in the field while class sessions will cover other aspects of avian biology. Four lectures, one lab per week. Prerequisite: Consent of instructor.

250 VASCULAR PLANTS S Mr. Weik

Taxonomy, morphology, and ecology of the vascular plants, with special emphasis on the spring flora of Northern Illinois. The lab will include frequent field trips to the department's field study areas, forest preserves, and the Illinois Dunes State Park. Three lectures, two labs per week. Prerequisite: Consent of the instructor.

252 AMERICAN FOREST F Mr. Weik

Survey of major forest associations of the United States. The ecology, economic use, and analytical techniques employed in studing forest types. Frequent lab trips to forest preserves of Northeastern Illinois, and the department's field study areas. Three lectures, two labs per week. Prerequisite: Consent of the instructor.

255 EVOLUTIONARY ORIGINS OF PLANTS S

Study of the principles of evolution with emphasis on plant origins. Four lectures per week and independent projects. Prerequisites: Biology 130, one botany course.

260, 261 MARINE BIOLOGY W Mr. Louch

Biology and ecology of marine organisms. The first part of the course will be spend on campus, the last part will be spent at a subtropical marine station. Courses must be taken consecutively. Four lectures and three lab sessions per week. Prerequisite: Two biology courses and consent of instructor.

300 BIOCHEMISTRY W

Mr. Brown, Mr. Martin

Offered jointly with the Chemistry Department. Introduction to biochemistry at the cellular level. Emphasizing protein structure, enzyme action, and a survey of biological molecules. Four lectures, one lab per week. Prerequisite: Chemistry 220.

330 CELL ULTRASTRUCTURE W Mr. Weik

An introduction to the ultrastructure of typical plant and animal cells and tissues employing the techniques of transmission and scanning electron microscopy. Four lectures and three three-hour lab sessions per week. Prerequisite: Three courses in biology.

335 CELL PHYSIOLOGY

Fundamental processes of plant and animal cells, emphasizing detailed physiochemical analyses of photosynthesis and respiration, protein and fat metabolism, ion transport, and the role of the nucleus and cytoplasm in cytodifferentiation. Three lectures, two labs per week. Prerequisite: Biology 300 or consent of instructor. (Not offered in 1978-79.)

340 ENTOMOLOGY F Mr. Louch

A study of insects leading toward an understanding of, and appreciation for, this most numerous and diversified class of animals. Three lectures and two labs per week. Prerequisite: Biology 130; Chemistry 110, 111; or consent of instructor.

345 SPECIAL TOPICS IN PHYSIOLOGY

The physiology of a single organ system or of the response of several organ systems to a single insult to the organism: e.g., physiology of exercise, endocrine control of metabolism, physiology of skeletial muscle. Prerequisite: two terms of Biology 240, 241, 242; one year of chemistry; and consent of the instructor. (Not offered in 1978-79.)

356 FRESHWATER ALGAE F Mr. Weik

Investigations into the biology of freshwater algae including the cytology, reproduction, phylogeny, ecology and laboratory maintenance of representative forms. Three lectures, two labs or field trips per week. Prerequisite: Biology 130 and Chemistry 110.

360 SPECIAL PROBLEMS IN ECOLOGY

A study of ecological systems. This is a project-oriented course in which students who have had some previous background in ecology may examine particular aspects of environmental biology by means of laboratory, field, and library research. Three lectures and two labs per week. Prerequisite: Biology 130, 160, and Chemistry 110, 111. A background in botany and zoology is desirable. (Not offered in 1978-79.)

370 DEVELOPMENTAL BIOLOGY S Staff

A study of the mechanisms by which cells develop into functional organisms. Three lectures and two three-hour lab sessions per week. Prerequisites: Chemistry 110, 111, 112 and Biology 130.

430 MOLECULAR GENETICS W Mr. Brown

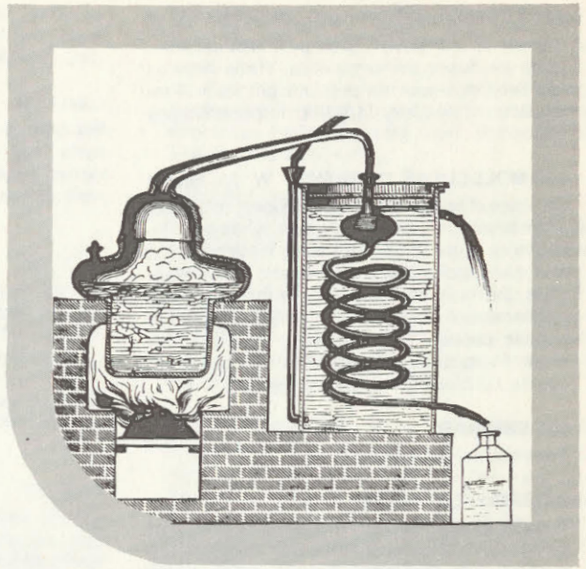
Genetics of bacteria and their viruses, and other microorganisms. Non-Mendelian systems of inheritance, genetic fine structure, transformation and transduction, sex-factors and other plasmids, the biochemical nature of the gene, nucleic acid replication, and the operon concept of genetic control. Four lectures, two labs per week. Prerequisite: Biology 130 plus two other courses in biology and Chemistry 220.

480 SEMINAR Staff

Prerequisite: By invitation.

INDEPENDENT STUDY

Tutorials (directed study programs on a topic of the student's choice) or **Research Projects** are available with the consent of the instructor, as are **Internships** (a supervised work/study project in a nonacademic environment), with the consent of the instructor and the cooperating agency.



CHEMISTRY

Professor John W. Coutts (Chairperson): Physical Chemistry. Quantum Chemistry.
Professor William B. Martin: Organic Chemistry. Biochemistry. Enzyme Inhibition.
Associate Professor Martin L. Thompson: Inorganic Chemistry. Carboranes.
Assistant Professor Douglas R. Greig: Analytical Chemistry. Inorganic Chemistry. Spectroscopy.
Instructor Laura K. Klingbeil: Organic Chemistry. Synthesis.

The Chemistry Department at Lake Forest College offers a curriculum designed to meet several goals. One of these is to provide some depth and breadth in understanding the important modern principles and theories in all areas of chemistry; this should equip a student with the experiences necessary to correlate, integrate, and explore both familiar and unfamiliar areas of science and of chemistry in particular. A second goal is to provide our students with an exposure to scientific thought and method and to some practical applications of chemistry in modern society.

To achieve these goals, courses are provided which deal specifically with inorganic, organic, physical, analytical, and biological chemistry. A few courses are also available especially for the non-scientist. Our curriculum provides an appropriate experience for students with a variety of educational and vocational objectives: students who take courses in our department prepare for careers in chemistry with or without subsequent graduate study; in other sciences, such as biology or physics; in medicine, dentistry, nursing, veterinary medicine, and health sciences in general; in less directly related areas, such as business, sales, law, or public service. Some students choose chemistry to be equipped to reason scientifically or simply to gain a broad base in their education. The Chemistry Department is well prepared to meet its objectives in terms of staffing, equipment, and library holdings. The faculty is diverse in areas of expertise, and our instrumentation is modern and unusually complete. Instrumentation includes a mass spectrometer; a nuclear magnetic resonance spectrometer; an atomic absorption spectrometer; five gas chromatographs; several infrared, ultraviolet, and visible spectrophotometers; and a variety of apparatus, such as high efficiency distillation columns, vacuum lines, and hydrogenation equipment. All of this equipment is accessible to students at suitable levels in course work and research. Thus, all students are given opportunities by means of courses, independent studies, individual student-faculty contacts, and broad use of instrumentation to develop appropriate proficiency in chemistry.

The department is on the approved list of The American Chemical Society and has an active chapter of the Student Affiliates of The American Chemical Society, which sponsors a variety of activities, including a speaker program throughout the year.

A minimum major in chemistry consists of eight courses, which must include the following seven: 110, 111, 112, 220, 221, 320, 321; the eighth chemistry course must be at or above the 300 level. Courses intended specifically for the non-science major are not applicable toward the major (i.e., 100, 102, 104, 106.) In addition to these requirements, a chemistry major is required to take Mathematics 110 and 111, and Physics 120 and 122. For a student who plans to do graduate study in chemistry, it may be appropriate to take more than the minimum in chemistry, physics, and mathematics, and a reading knowledge of German may be desirable. During both the summer and academic year, our chemistry majors frequently engage in junior and senior level research projects.

***100 FROM ATOMS TO GALAXIES F**
Mr. Coutts, Mr. Martin

A survey of the nature of the universe, ranging from the smallest of objects to the largest. Includes basic principles of physics, astronomy, and chemistry, with interrelationships explored. No laboratory.

***102 ENVIRONMENTAL CHEMISTRY**

Exploration of those aspects of chemistry dealing with interactions between living systems and the rest of the earth, focusing on how chemistry affects natural processes; relevant background from other sciences included. No laboratory. (Not offered in 1978-79.)

***104 CHEMISTRY AND LIFE W**
Ms. Klingbeil

Provides sufficient background in chemical principles to allow investigation of topical issues such as nuclear energy, organic wastes, everyday drugs, air and water pollutants, desalinization, detergents, pesticides, and food additives. No laboratory.

***106 ENERGY AND YOU: AN ECOLOGICAL APPROACH**

This course focuses on two of the fundamental laws of science (first and second laws of thermodynamics) and their application to a variety of practical and philosophical questions and problems pertinent to you and your life style: energy generation and interconversion, accompanying efficiencies, "overpopullution," etc. No laboratory. (Not offered in 1978-79.)

110 INTRODUCTORY CHEMISTRY I: ATOMS, MOLECULES, AND MATTER F Mr. Thompson, Ms. Klingbeil

Stoichiometry; atomic and molecular structure; chemical bonding; properties and theories of gases, liquids, solutions, and solids. Lab involves introductory quantitative techniques and analysis. Four class meetings, one lab per week.

111 INTRODUCTORY CHEMISTRY II: CHEMICAL EQUILIBRIUM W
Mr. Greig, Mr. Thompson

Fundamental equilibrium considerations of ionic and gaseous solutions; application of equilibria to qualitative analysis; coordination compounds. Prerequisite: Chemistry 110. Four class meetings, one lab per week.

112 INTRODUCTORY CHEMISTRY III: RATES, ENERGY, AND ANALYSIS S
Mr. Greig, Ms. Klingbeil

Basic concepts of kinetics and energetics of chemical reactions. Electrochemical and spectroscopic methods of analysis and basic methods of separation. Lab includes introductory instrumental methods. Prerequisite: Chemistry 111. Four class meetings, one lab per week.

220 ORGANIC CHEMISTRY I: STRUCTURE AND FUNCTION OF ORGANIC MOLECULES F
Mr. Martin, Ms. Klingbeil

Introduction to functional groups; nomenclature; resonance; inductive and steric effects; aromaticity; stereochemistry; nature of organic reactions; fundamental experimental methods, infrared spectroscopy, and gas chromatography. Prerequisite: Chemistry 111 or consent of instructor. Four class meetings, one lab per week.

221 ORGANIC CHEMISTRY II: ORGANIC REACTIONS AND STRUCTURAL ANALYSIS. S Mr. Martin, Ms. Klingbeil

Addition, substitution, and elimination reactions; molecular rearrangements; radical reactions; oxidations and reductions; carbohydrates, pro-

*Note: Chemistry 100, 102, 104 and 106 are independent, non-mathematical courses designed for students with no previous science background.

teins, and other polymers; organic synthesis; infrared and nuclear magnetic resonance spectroscopy. Prerequisite: Chemistry 220 or consent of instructor. Four class meetings, one lab per week.

300 BIOCHEMISTRY W
Mr. Martin, Ms. Klingbeil

Offered jointly with the Biology Department. Introduces control concepts of biochemistry at the cellular level. Protein structure of enzymes responsibile for biochemical energy transfer processes. Prerequisite: Chemistry 220. Four lectures, one lab per week.

310 INTERMEDIATE ORGANIC CHEMISTRY W
Mr. Martin

Variable content, with topics selected from the following: proteins and other macro-molecules; enzymic reaction mechanisms; photochemistry, radical reactions; organic reaction mechanisms. Project-type experimental work, including spectroscopic methods. Prerequisite: Chemistry 221. Four class meetings, one lab per week. (In alternate years. Not offered in 1978-79.)

320 PHYSICAL CHEMISTRY I: CHEMICAL THERMODYNAMICS AND EQUILIBRIUM F
Mr. Coutts

Derivation of thermodynamic state variables and their application to the prediction of direction and extent of chemical reactions; homogeneous and heterogeneous equilibria; phase diagrams; introductory statistical thermodynamics. Prerequisite: Chemistry 221 or consent of instructor. Four class meetings, one lab per week.

321 PHYSICAL CHEMISTRY II: CHEMICAL DYNAMICS S
Mr. Coutts

Kinetic molecular theory; chemical kinetics; solution phenomena; electrode processes. Prerequisite: Chemistry 320 or consent of instructor. Four class meetings, one lab per week.

330 QUANTUM CHEMISTRY AND MOLECULAR STRUCTURE W
Mr. Coutts

Introductory quantum mechanics emphasizing nature of chemical bonding; determination of molecular structure through spectroscopic and related techniques. Prerequisite: Chemistry 320 or consent of instructor. Five lectures per week.

410 INSTRUMENTAL METHODS F
Mr. Greig

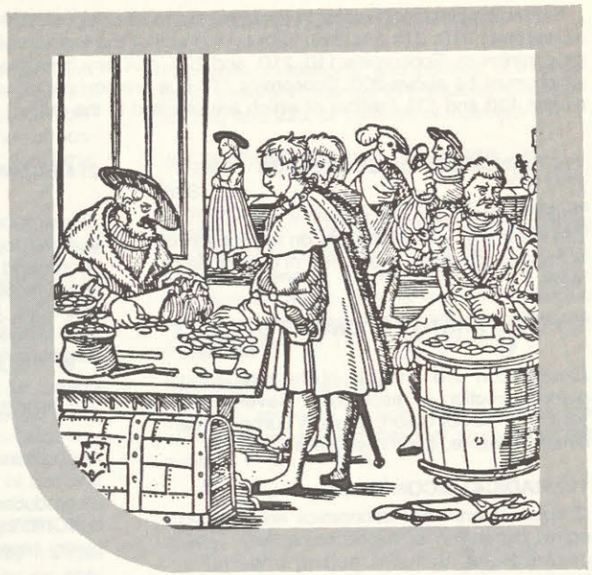
Theory and operational techniques of instrumental analyses in analytical chemistry. Emphasis will be placed on the measurement of environmentally important quantities. Includes spectroscopic, chromatographic, electrochemical, and radiochemical methods. Three class meetings, two labs per week.

420 INORGANIC CHEMISTRY S
Mr. Thompson

Concepts in inorganic chemistry, with emphasis on structure and bonding; molecular orbital theory; electron deficient molecules; coordination compounds; descriptive chemistry used to demonstrate applications of principles and periodic relationships. Prerequisite or corequisite: Chemistry 321 or consent of instructor. Four lectures, one lab per week.

430 ADVANCED ORGANIC CHEMISTRY W
Mr. Martin

Theoretical treatment of familiar topics of organic chemistry; quantitative correlations of reaction rates and equilibria, focusing on effects of substrate structures and media changes on reactivity. Prerequisite: Chemistry 221 and 321. Five class meetings per week. (In alternate years. Offered in 1978-79.)



ECONOMICS

Professor H. Murray Herlihy: Intermediate micro theory. Labor economics. Economics of health care.
Professor Rosemary D. Hale (Chairperson): Regional economics. Industrial organization. Economics of antitrust. Economics internships.
Assistant Professor Robert Baade: International trade and finance. Macroeconomic theory. Political economy.
Assistant Professor Ronald Helgens: Intermediate macro theory. History of economic thought. Accounting.
Assistant Professor Keith Howe: Intermediate micro theory. Public utilities. Managerial economics. Corporation finance.
Assistant Professor James Watson: Macroeconomic theory. Forecasting quantitative methods.
‡Lecturer Matthew Paull: Accounting.
‡Lecturer Cheryl Ross: Accounting.

The study of economics is concerned with two basic questions faced in any human society; (1) how available resources are to be allocated among productive uses to yield the greatest total product, and (2) how the fruits of the productive processes are to be distributed among members of society. Since no universal form of socio-economic organization exists, economics examines and compares the different ways in which human societies have sought answers to these two questions.

The study of economics at Lake Forest College can begin at either the freshman or sophomore level. The curriculum of the first year includes an introductory course designed for potential majors and those desirous of a single survey course. In addition, at this level the course offerings include a number of problem or issue-oriented courses.

Qualified junior and senior majors are encouraged to engage in independent study projects, both within economics and across disciplinary lines. Also, internships in the Summer and Winter terms are available, involving off-campus experiences related to economics.

Economics majors from Lake Forest College have been admitted to some of the top graduate and professional schools in economics, business administration and law. Majors contemplating graduate or professional training are urged to consult with their economics department advisors concerning selection of courses.

‡Part-time Teaching, 1978-79.

Students planning to major in economics should complete the two intermediate theory sequences (Economics 210, 310 and 220, 320) by the end of the junior year. The major in economics includes as a minimum, Economics 110, 210, and 220, plus any five other economics courses, three of which must be above 200. Economics 110 is a prerequisite for all other courses in the department except 130 and 131 (neither of which are credited to the major.)

110 PRINCIPLES OF ECONOMICS FWS
Staff

Structure, function, and problems of the American economy, with emphasis on application of economic principles to analysis of current problems.

111 COMPARATIVE ECONOMIC SYSTEMS W
Mr. Baade

Examination and analysis of the role of non-market direction of resources in several countries: The Soviet Union, Eastern Europe, Scandinavia, France, and Great Britain.

112 RADICAL ECONOMICS

Critique of orthodox economics and the economic dimension of American society. Topics covered may include racism, imperialism, health, defense spending, zero economic growth, income distribution, migratory workers, pollution, and the economics of women. (Not offered in 1978-79.)

113 MONEY AND CAPITAL MARKETS W
Mr. Watson

Analysis of the economic functions and operations of money and capital markets in the United States, with emphasis on the legal and economic structure of bank and non-bank financial institutions, and the impact of regulation and public policy on funds flow and interest rates.

120, 121 ECONOMICS OF HEALTH CARE W
Mr. Herlihy

Analysis of the economic dimensions of health care. 120 (Janaury) involves in-class examination of health care literature; 121 (February) involves field research on health care in Lake County, Illinois. Economics 120 is a prerequisite to Economics 121.

130 ACCOUNTING I FS

Fundamental principles and procedures of accounting for business enterprises.

131 ACCOUNTING II S

Analysis and interpretation of accounting statements and data for management purposes. Prerequisite: Economics 130. (Taught at Barat.)

214 ECONOMICS OF PUBLIC UTILITIES W
Mr. Howe

Examination of an important class of U.S. industries supplying electricity, natural gas, telephone and telegraph services. Review of the legal, regulatory and economic characteristics of utilities; introduction to the theory of regulation; analysis of utility and regulatory commission behavior; a critique of economic regulation.

210 PRICE THEORY FS
Mr. Herlihy, Mr. Howe

Application of both theoretical and empirical analysis to consumer demand, to the firm both as producer of goods and as buyer of inputs, in both monopoly and competitive markets. Industry case studies are included.

220 MACRO-ECONOMICS FS
Mr. Watson, Mr. Helgens

Examination of the major components of national income. Application of macro-economic models to current problems of employment, the price level, and economic growth.

221 BUSINESS CYCLES AND FORECASTING W Mr. Watson

The nature of business cycles and the uses of business indicators, consumer and business expenditure surveys in forecasting economic activity. Students will make their own forecasts by building a GNP expenditure model. Prior knowledge of the computer or statistics is useful but not required. Prerequisite: Economics 220.

230 ECONOMIC STATISTICS F Mr. Watson

Distribution analysis, probability theory, sampling theory, statistical inference, regression and correlation analysis, with emphasis on application of statistical techniques to economic problems and policies.

240 REGIONAL ECONOMICS F Mrs. Hale

Application of economic analysis to current problems in urban and suburban America, such as housing, transportation, population, pollution, education, discrimination, and segregation.

250 HISTORY OF ECONOMIC THOUGHT W
Mr. Helgens

An introductory survey of the historical evolution of economic concepts, with emphasis on the development of economic theory. Some consideration will be given to the relevance of economic theory to analysis of current economic problems.

310 INDUSTRIAL ORGANIZATION S
Ms. Hale

Analysis of market structure and performance of monopolistic, competitive, oligopoly and non-profit institutions. Prerequisite: Economics 210.

320 MONETARY AND FISCAL POLICY S
Mr. Baade

Analysis and comparison of Keynesian, Neo-Keynesian, Neo-classical, and monetarist approaches to macroeconomic stabilization policy. Prerequisite: Economics 220.

330 INTRODUCTION TO ECONOMETRICS

Use of statistical methods, especially multiple regression, to test hypotheses based on economic theory. Some use of computer programs. Prerequisite: Economics 230. (Not offered in 1978-79.)

340 MANAGERIAL ECONOMICS W
Mr. Howe

The economic modeling of particular firms for the purpose of solving specific management problems, with emphasis on the reasoning process and model construction. Prerequisite: Economics 210.

345 CORPORATION FINANCE F Mr. Howe

Identification of the institutional setting in which the firm operates, and exploration of how the investment, financing and dividend decisions affect the objectives of the firm. Prerequisites: Economics 130 and 230.

410 ANTI-TRUST IN AMERICA F Mrs. Hale

Examination of the problems of market power by studying the leading U.S. Supreme Court cases. Prerequisite: Economics 310.

420 LABOR IN THE AMERICAN ECONOMY S
Mr. Herlihy

Economics of the labor market. The labor problems of American industrial society, in the context of labor unions and collective bargaining. Prerequisite: Economics 210, or consent of instructor.

430 INTERNATIONAL ECONOMICS S
Mr. Baade

Principles, institutions, and policies of international trade and finance. Prerequisite: Economics 210 and 220, or consent of instructor.

490 INTERNSHIPS IN ECONOMICS W
Mrs. Hale

A work-study program which will provide an opportunity to supplement the academic with work experience in business, social, and government agencies, available Winter and Summer terms. Some internships have specific course prerequisites to be completed before the internship begins. Two course credits.

INDEPENDENT STUDY

Tutorials, research projects, senior theses are available forms of independent study, with the consent of the instructor.

EDUCATION

Assistant Professor Daniel Dyer (Chairperson): Curriculum Theory. Middle School Education.
†Professor Forest Hansen: Philosophy of Education.
Professor Arthur Zilversmit: History of Education.
Associate Professor Phylis Frankel: Behavior Disorders and Learning Disabilities. Psychology Applied to Education.
Assistant Professor Barbara Guenther: Writing Skills for Teachers.
‡Lecturer Marjorie Loory: Reading. Pre-Service Experiences. Supervision of Student Teachers.
‡Lecturer Florence Singer: Art Methods.

Students interested in pursuing a career in teaching may obtain certification through the Educational Department at Lake Forest College while fulfilling requirements for a departmental major in one of the liberal arts. The general education of every teacher certification candidate must include a strong liberal arts background in English, science, mathematics, social and behavioral sciences, and the humanities.

The Department has developed a program that focuses on teaching in the Middle School (Grades 5-8). There is an expressed need for teachers who are especially prepared to work with students between the ages of 10 and 14. Students who complete the Lake Forest Middle School Program will receive endorsement on their transcript and a special letter of recognition in their placement file. In addition to the Middle School Program, students prepare to teach in either the elementary (K-9) or the secondary (6-12) school.

Students especially interested in the Middle School/Junior High or High School age group are encouraged to elect courses in psychology and education suitable to their age-level interests as well as to fulfill general education requirements and to major in the academic area in which they plan to teach. Those who are particularly interested in urban education may participate in the ACM Urban Education Program in Chicago.

Teacher candidates interested in early childhood, special or elementary education are encouraged to elect an interdisciplinary concentration in psychology and education as well as to meet the general education requirements outlined by the State Certification Board.

**Certification in special education will soon be available through a new program between Lake Forest College and Barat College. Early (sophomore year) planning is mandatory for this program.

**Pending State Approval.
‡Part-time Teaching, 1978-79.
†Sabbatical Leave of Absence, 1978-79.

Those students who wish to complete State Certification at any teaching level must complete the requirements for admission to the certification program.

Most students will complete a minimum of 150 clock hours of classroom experience with children prior to their associate teaching. While many of these hours are accumulated during regular education classes, a variety of internships are also available.

Students who wish to explore the educational process of today, but do not intend to teach may elect to take education courses without applying for the certification program.

Admission Procedures for the Illinois State Teacher Certification Program at Lake Forest College.

To pursue the Certification Program, the following requirements must be met.

1. The candidate must pass Education 210 with a grade of B or better.
2. The candidate must have a personal interview with two members of the Education Advisory Committee and the Department Chairperson.
3. The candidate must maintain a grade point average of B or better in all education courses, a B average in his or her major and a 2.75 in general courses.
4. Candidates must complete a one-page written summary of why they are seeking certification.

Students who do not fulfill all of the above requirements may be asked to do one or more of the following:

1. Internship at a chosen grade level.
2. Another education course.
3. Review by the Education Advisory Committee.

Guidelines for Illinois State Certification are given here for your information, but students are reminded that specific program planning is done individually in cooperation with the chairperson of the Education Department.

State of Illinois — Standard Elementary Certificate (K-9)
(Recognized and Approved 12/30/68)

A. General Education	
1. Language Arts (English, Composition, Speech and/or Drama)	3 courses
2. Science (½ course; Methods — Barat College)	2½ courses
3. Social Science (including one course in American History or American Government)	2 courses
4. Humanities (including minimum of ½ course Music, ½ course Art)	1½-2 courses
5. Mathematics (220-221 — Barat College)	1½-2 courses
6. Electives in any of the above fields and/or psychology (except Educational Psychology)	3 courses
7. Academic Major	8 courses
B. Professional Education: Elementary	
1. Observing the Schooling Process	1 course (Ed. 210)
2. Philosophies of Education, or,	1 course (Ed.220)
3. Education in American Society and Thought	1 course (Ed. 270)
4. Psychology Applied to Education	1 course (Ed. 310)
5. Advanced Field Work and Research	1 course (Ed. 311)
6. Art Education (Applied to Humanities and general education)	½ course (Ed. 312)
7. Theories and Methods of Language Learning, K-6, Barat College	1 course (Ed. 313)
8. Health Education	1 course (Ed. 314)
9. Behavior Disorders, Learning Disabilities and Physical Handicaps in Children	1 course (Ed. 340)
10. Methods and Materials of Teaching in the Elementary Grades	½ course (Ed. 417)
11. Associate Teaching in the Elementary Schools	2 courses (Ed. 418)

State of Illinois — Standard Secondary Certificate (6-12)
(Recognized and approved 12/30/68)

A. General Education

1. Language Arts (English, Composition, Educational Inquiry, Speech and/or Drama)	2 courses
2. Science and/or Mathematics	1½-2 courses
3. Social Science (including American History and/or American Government)	2 courses
4. Humanities	2 courses
5. Electives in any of the above fields including psychology (except Educational Psychology)	2 courses
6. Academic Major	8 courses

B. Professional Education: Middle School/Jr. High/High School
(R)=required (E)=elective

Section I:

(R) Observing the Schooling Process (prerequisite to courses in Section II)	1 course (Ed. 210)

Section II: Courses are open to freshmen-seniors who have completed Ed. 210

(R) Philosophies of Education, or,	1 course (Ed. 220)
(R) Education in American Society	1 course (Ed. 270)
(R) Reading in the Content Areas	1 course (Ed. 313)
(E) Guidance Skills for Classroom Teachers (required for middle school program)	1 course (Ed. 330)
(R) Advanced Field Work and Research (may be taken more than once)	1 course (Ed. 311)
(E) Internship in Education (SAC Program)	
(E) Special Topics in Teaching Grades 5-8 (required for middle school program)	1 course (Ed. 317)

Section III: The following courses are open only to juniors and seniors who have completed the Section II courses. Exceptions are made for transfer students and others who seek flexibility in their scheduling.

(R) Psychology Applied to Education	1 course (Ed. 310)
(R) Health Education	1 course (Ed. 314)
(R) Behavior Disorders and Learning Disabilities in Children	1 course (Ed. 340)
(E) Special Studies in Education (advanced internship)	1 course (Ed. 415)
(R) Curriculum Design and Instructional Methods for Middle School/Jr. High/High School Teachers (Must be taken before 420.)	1 course (Ed. 419)
(R) Associate Teaching: Middle School/Jr. High/High School (2 course credits)	2 courses (Ed. 420)

The Middle School Teacher Preparation at Lake Forest is a combination of courses required for State of Illinois Elementary or Secondary Certification and additional courses which focus specifically on the 10-14 year old in grades 5-8.

The Middle School Teacher Preparation curriculum includes the following required courses:

1. Guidance Skills for Classroom Teachers	1 course (Ed. 330)
2. Special Topics in Teaching Grades 5-8	1 course (Ed. 317)
**3. Reading in the Content Areas	1 course (Ed. 313)
**4. Curriculum Design and Instructional Methods for Middle School and High School Teachers	1 course (Ed. 419)
**5. Associate Teaching: Grades 5-8	2 courses (Ed. 420)

The following elective is available:

1. Internship in Middle School Teaching	1-4 courses

**These courses are also required for the State Secondary Teaching Certificate.

210 OBSERVING THE SCHOOLING PROCESS F

An introduction to the process of teaching from pre-school to Adult Education. Participants observe and discuss fifteen different types and levels of schools.

219 WRITING SKILLS FOR TEACHERS F
Ms. Guenther

Students will examine the process of writing by composing short papers and by evaluating the writing of others, including papers written by high-school students. Class members will observe writing instruction in area schools and will both observe and tutor in the College's Writing Center. Lectures, reading, and discussion coupled with practical experience will allow students to explore such topics as grammar, patterns of organization, the research paper, making good assignments, and grading papers effectively. (Also listed as English 219.)

220 PHILOSOPHIES OF EDUCATION S

Introduction to contemporary philosophies of education with special attention to their views of human nature and their justification of the claimed goals and values of education. (Also listed as Philosophy 220.) (Not offered in 1978-79.)

270 EDUCATION IN AMERICAN SOCIETY AND THOUGHT W Mr. Zilversmit

Historical role of education in American society; education as a panacea and as a practical solution; schooling vs. education. Emphasis is on the twentieth century. (Also listed as History 270.)

310 PSYCHOLOGY APPLIED TO EDUCATION W Ms. Frankel

Principles of psychology as applied to the teaching-learning situation. Emphasis is on teaching as applied psychology and the socio-emotional contexts of education. Juniors and Seniors.

311 ADVANCED FIELD WORK AND RESEARCH FWS

Students who have completed 210 and 310 and wish to have additional experience of a different nature in school settings may apply for independent study in schools. Research on some special aspect of schooling is required.

312 ART EDUCATION F½ Ms. Singer

The media and methods of teaching elementary school art. Required only for elementary certification and applicable under State General Education Requirements, Art. One half course.

313 READING IN THE CONTENT AREAS F
Ms. Loory

Multiple approaches to the teaching of reading, characteristics of basic language learning, and the application of learning theories and models to the teaching of language and reading in the content areas.

314 HEALTH EDUCATION F

Emphasis on normal physical, emotional, and moral growth and development from early childhood through adolescence. Methods of teaching about sex, drugs, alcohol and general health-related issues are covered. Required for both elementary and secondary certification candidates. Intended primarily for juniors and seniors who plan to complete certification. Open to others with permission of the instructor.

317 SPECIAL TOPICS IN TEACHING GRADES 5-8 (MIDDLE SCHOOL/ JUNIOR HIGH SCHOOL) S

Emphasizes the importance of developing special skills, competencies, and understandings for teaching middle school/junior high students. The history, philosophy, and current practices of the middle school are explored through action research. A current topic of interest and importance is explored by participating in an on-going program at a middle school.

330 GUIDANCE SKILLS FOR CLASSROOM TEACHERS W

A learning experience in the development of practical skills such as values clarification, group and individual counseling techniques, affective listening, and teaching about death and dying. The focus is on affective education and fostering human relations in the classroom. (Required for middle school program.) Offered only on a pass-fail basis.

340 BEHAVIOR DISORDERS, LEARNING DISABILITIES AND PHYSICAL HANDICAPS S Ms. Frankel

A course dealing with specific problems occurring in early development — covering such

**This course required for certification does not carry graduation credit, but will be given recorded credit on the student's academic record and may be taken in addition to the regular course load. No tuition fee charged for this course.

areas as mental retardation, emotional disturbance, and learning disabilities. We will focus on special diagnostic problems and specific methods of treatment including play therapy and classroom techniques for facilitating learning. Field experience will also be required. Also listed as Psychology 340.

415 SPECIAL STUDIES IN EDUCATION FWS

Advanced research in the process of schooling and teaching. May be an independent project or an advanced internship. Juniors and Seniors.

****417 TEACHING ELEMENTARY GRADES (K-5): METHODS AND MATERIALS W**

Taken prior to associate teaching. Stresses practical applications to classroom teaching using observation, facilities, and materials in cooperating schools. One-half course.

418 ASSOCIATE TEACHING ELEMENTARY GRADES FS

Full day supervised teaching ten+ weeks in cooperating school. Double course credit. Permission of Education Committee required.

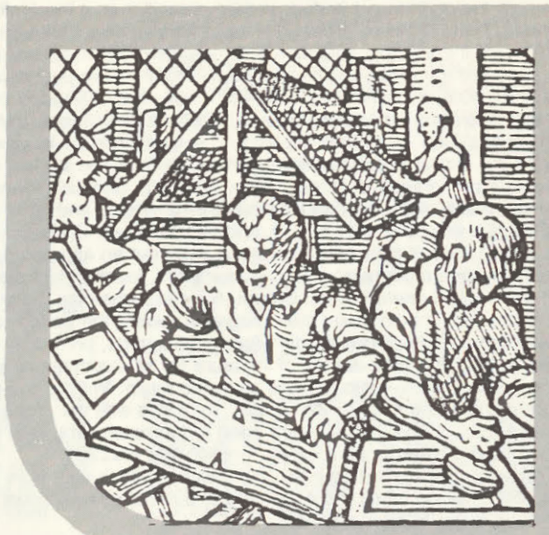
419 CURRICULUM DESIGN AND INSTRUCTIONAL METHODS FOR MIDDLE SCHOOL/JUNIOR HIGH AND HIGH SCHOOL TEACHERS W

Stresses the practical use of educational theory in the classroom by focusing on the "how to" teach, design lessons, evaluate, discipline, and counsel. Also explores the American high school and middle school today. Prerequisites: Education 210, 220, 310, 314, or permission of instructor. One full course.

420 ASSOCIATE TEACHING: MIDDLE SCHOOL/JUNIOR HIGH/HIGH SCHOOL FS

Full day supervised teaching ten+ weeks in cooperating school. Double course credit. Permission of Education Committee required.

**This course required for certification does not carry graduation credit, but will be given recorded credit on the student's academic record and may be taken in addition to the regular course load. No tuition fee charged for this course.



ENGLISH

Professor Rosemary E. Cowler (Chairperson): English literature, late Renaissance and Eighteenth-Century. Literary theory.
Professor W. Gordon Milne: American literature, Nineteenth and Twentieth-Century fiction.
†††Associate Professor Kenneth C. Bennett: English literature, the Nineteenth Century. Contemporary drama and dramatic theory.
Associate Professor Robert M. Greenfield: Comparative literature. Modern literature. Folklore. Social theory.
Associate Professor Ann Louise Hentz: English literature, the Renaissance. Modern poetry. Women writers.
Assistant Professor Michael Boyd: Modern Literature. Film.
Assistant Professor Barbara Guenther: Communication skills. English literature, Modern poetry.
Assistant Professor Mary Swander: Creative writing.
Assistant Professor E. Gordon Whatley: English and Comparative literature. Classical and Medieval literature.
‡Lecturer Randy Berlin: English Literature and Composition.

The department is essentially a department of literature, though this in itself entails a concern for writing and there is provision for a writing concentration within the major.

Considering literature broadly as "that which distills, preserves and then enlarges the experience of a people," we in the English speaking world are the inheritors of a great literary tradition, perhaps the richest in western history. This is the subject matter of English study. And for the reader as well as the writer there is the study of techniques of effective communication and the cultivation of imaginative perception and, for the writer, expression.

A college major in English, then, in addition to comprising studies which are liberal and humane and thus appropriately "educative" ends in themselves, provides useful general preparation for employment by developing sensitivity to language and strong communication skills. For beyond the career opportunities in fields traditionally associated with the study of English — teaching, professional writing, editing and publishing — there is an expanding market in business and elsewhere for those who can read and write well in an age when most cannot.

†††Sabbatical Leave of Absence, Spring Term, 1979.
‡Part-time Teaching, 1978-79.

Within the department a student may major either in the traditional literature program or in writing, focusing there either on creative or expository writing. The requirements for the literature major include the introductory course 105 (prerequisite for all advanced courses but not counted toward the major); the background courses, 200 and 201; two period courses, one before 1700 (300, 301, 302, 303, 400), and one after 1700 (304, 305, 306, 307); and the integrating course, 484. For the student who chooses to become an English major with an emphasis on writing, the requirements include also the introductory course 105 (prerequisite for all advanced courses but not counted toward the major) and a senior project. In addition, the student will take a sequence of three writing courses (for imaginative writers 220 or 221, 320, and 420; for expository writers 321, an internship or some practical experience [still in planning stage], and 420), and five literature courses: 201, 211 or 212, one from 308, 309 or 310, and two electives. Once a student has declared a major, he or she will, in consultation with an advisor, work out an appropriate program from among various period and genre courses, colloquia, seminars, independent studies, writing courses, film courses, and electives in related fields. Literature majors who plan, upon consultation with their advisor, to do graduate work should orient their programs toward the period courses and should have a reading knowledge of at least one modern foreign language, preferably French or German.

Because of the wide appeal of literature for all students, the department offers a range of courses attractive to the non-major as well as to the major. Writing courses include English 100 (Composition) and English 220 or 221, for those with the proper background. In the Winter term, all courses through the 200 level are open to freshmen, who may also take in the spring the two background masterpieces courses, English 200 and 201.

Those special studies courses, the topics of which vary from year to year (206, 207, 213, 380, 400, 485) may be taken more than once, but majors may count them only once toward the minimum major of eight courses.

100 ENGLISH COMPOSITION FWS Staff

Designed for freshmen and other students (upon consultation with the composition advisor) who need practice in writing effective expository and argumentative prose. Includes study of research skills. Emphasis on methods of developing papers and achieving unity and coherence, as well as on grammar, usage, and other fundamentals of English. (Does not apply toward the major.)

101 WRITING CENTER TUTORIAL
Ms. Guenther

To improve expository writing skills, students will meet individually with the Composition Advisor each week for three terms, one course credit to be granted upon completion of the third consecutive term. Assignments will vary with individual needs, with students writing diagnostic tests at the beginning and end of the course and maintaining a file of written work. (Does not apply toward the major.)

105 INTRODUCTION TO LITERATURE FWS Staff

An introduction to literature through the study of such genres as poetry, the short story or short novel, and drama. Required for beginning English majors.

109 MYTH AND LITERATURE

Detailed study of various representative myths and mythic archetypes (e.g., Creation, Fall, Satan, the Mother Goddess) and their influence on western literature. Readings from the Bible, Greek and Roman mythology, medieval and modern literature. (Not offered in 1978-79.)

200 MASTERPIECES OF LITERATURE: ANCIENT AND MEDIEVAL FS
Ms. Cowler, Mr. Whatley

Origin and development of literary types and traditions as background for continued work in English literature. Selected masterpieces from ancient and medieval literature: Homer, Greek drama, Virgil, Beowulf, Dante, Medieval drama and romance, Chaucer. Open to freshmen in the spring term.

201 THE ENGLISH TRADITION: RENAISSANCE AND NEO-CLASSICAL FS
Ms. Cowler, Ms. Hentz

Main traditions of English literature from the Renaissance through the neoclassical period, to serve as a context for the study of English literature as well as an introduction to masterpieces of the period.

202 SHAKESPEARE F Ms. Hentz

Selected plays to show Shakespeare's variety; intensive analysis of either "King Lear" or "Hamlet."

203 FILM F

An introduction to film studies, stressing film history and the development of film language. Students will view works by important European, Asian and American film-makers — films like **Citizen Kane, Rashomon,** and **The Bicycle Thief** — which treat fundamental issues of human value and experience.

204 CONTEMPORARY LITERATURE S
Mr. Greenfield

Literature of both East and West, drawn mainly from writings of the past thirty years, including works of Mishima, Mao Tse-Tung, Kawabata, Lagerkvist, Durrenmatt, and Grass.

205 INTRODUCTION TO FOLKLORE W
Mr. Greenfield

An introduction to various kinds of folklore — fables, riddles, tall stories, fairy tales, trickster tales, legends, folk songs, superstit ons and magic formulas — and an exploration of present-day literary and popular use of folklore.

206 LITERARY TYPES AND TRADITIONS W Mr. Bennett, Ms. Hentz

Investigation of the development and character of some genre or form of literature: tragedy, comedy, satire, biography, the lyric, the short story. In 1978-79 — Woman's Quest: Modern Women Writers, Ms. Hentz; Comedy and the Comic, Mr. Bennett.

207 SPECIAL STUDIES

Intensive analysis of the works of one or two important literary figures or the detailed study of a single major work. (Not offered in 1978-79.)

209 CONTINENTAL LITERATURE IN TRANSLATION W Mr. Milne

Classics of European literature chiefly French, German, and Russian: Balzac, Flaubert, Zola, Dostoievsky, Tolstoy, Beaudelaire, Ibsen, and others.

210 EARLY AMERICAN LITERARY CULTURE W

The origins and growth of the American literary imagination from its beginnings in Puritan documents through major works of the early Romantics. (Not offered in 1978-79.)

211 STUDIES IN 19TH CENTURY AMERICAN LITERATURE F

Works of representative writers: Poe, Hawthorne, Melville, Thoreau, Emerson, Whitman, Dickinson, Twain. (Not offered in 1978-79.)

212 STUDIES IN 20TH CENTURY AMERICAN LITERATURE S Mr. Milne

Works of representative writers: James, Crane, O'Neill, Adams, Mencken, Frost, Fitzgerald, Hemingway, Faulkner, Dos Passos.

213 INTERDISCIPLINARY STUDIES F
Mr. Greenfield

A comparative and interdisciplinary exploration of selected topics. In 1978-79: The Adolescent in Modern Fiction.

219 WRITING SKILLS FOR TEACHERS W
Ms. Guenther, Staff

Students will examine the process of writing by composing short papers and by evaluating the writing of others, including papers written by high-school students. Class members will observe writing instruction in area schools and will both observe and tutor in the College's Writing Center. Lectures, reading, and discussion coupled with practical experience will allow students to explore such topics as grammar, patterns of organization, the research paper, making good assignments, and grading papers effectively. (Also listed as Education 219.)

220 CREATIVE WRITING — FICTION F
Ms. Swander

A beginning course in the craft of fiction — the short story and the novel — and non-fiction that utilized narrative techniques. Group discussions and individual conferences.

221 CREATIVE WRITING — POETRY S
Ms. Swander

A beginning course in the craft of poetry. Group discussions and individual conferences.

223 ADVANCED FILM W

A detailed study of a topic relating to film history and theory.

300 MEDIEVAL STUDIES: THE LITERATURE OF KING ARTHUR

The course will trace the rise of the legend of King Arthur and its impact on European literature. The main focus will be on such medieval masterpieces as Chretien de Troyes' **Erec and Enide, Lancelot,** and **Yvian,** Wolfram von Eschenbach's **Parzival,** the **Tristan** of Gottfried von Strassburg, the French **Quest of the Holy**

Grail and the **Death of King Arthur,** and the English **Alliterative Morte Arthure,** along with selections from Malory and Tennyson's **Idylls of the King.** (Not offered in 1978-79.)

301 THE RENAISSANCE: AGE OF EXPERIMENT S Ms. Hentz

A study of Renaissance literary art in prose, poetry, and drama, culminating in the great Elizabethans.

302 DRAMA AND SOCIETY IN THE AGE OF SHAKESPEARE

Focusing on the drama of Shakespeare's contemporaries (Marlowe, Jonson), an attempt is made to examine the "mind of an age." Works are read with emphasis on social and cultural significance. (Not offered in 1978-79.)

303 JOHN DONNE AND HIS CONTEMPORARIES

Literature of the earlier 17th century with close study of works of Donne, Herbert, Jonson, Burton, Browne, and others in the "Baroque" tradition. (Not offered in 1978-79.)

304 THE AGE OF SATIRE: THE POPE-SWIFT CIRCLE S Ms. Cowler

The principal neo-classical writers, including the Restoration dramatists and Dryden; the Augustans; and Johnson, Fielding, and Sheridan.

305 THE ROMANTIC PERIOD F Mr. Bennett

Key works, both poetry and prose, of Blake, Wordsworth, Coleridge, Lamb, Byron, Shelley, and Keats. Exploration of themes and ideas of a revolutionary era.

306 VICTORIAN LITERATURE

Masterpeices of fiction, non-fiction, and poetry by Dickens, Tennyson, Browning, Carlyle, Arnold, Hardy, Wilde, and others. Set in the background of the age itself. (Not offered in 1978-79.)

307 THE ENGLISH NOVEL

Development of the novel; representative works by major figures from Defoe through Conrad. (Not offered in 1978-79.)

308 MODERN DRAMA

Innovative trends in theater of the 20th century: Ibsen, Strindberg, Chekhov, Shaw, O'Neill, Brecht, Durrenmatt, Anouilh, Genet, Ionesco, Beckett, Pinter, and others. (Not offered in 1978-79.)

309 MODERN FICTION F Mr. Milne

Studies in the form, substance, and background of the modern novel, focusing on such writers as Gide, Proust, Kafka, Mann, Joyce, Hemingway, Faulkner.

310 MODERN POETRY

Major figures in English and American poetry of this century. (Not offered in 1978-79.)

320 WRITING WORKSHOP S Ms. Swander

An intermediary course for students with considerable skill and experience in creative writing wanting increased proficiency. Prerequisite: English 220 or 221 or permission of instructor.

321 EXPOSITORY WRITING W Ms. Swander

A course for the experienced student wanting increased proficiency in expository prose. Prerequisite: permission of the instructor.

380 JUNIOR COLLOQUIUM

Designed to permit study of a literary movement, a problem in aesthetics and literary criticism, or a selected theme. (Not offered in 1978-79.)

400 MAJOR ENGLISH AUTHORS F Mr. Whatley

Writers of eminence, such as Chaucer and Milton, Joyce and Yeats. 1978-79: Chaucer.

420 ADVANCED WRITING SEMINAR/TUTORIAL W Ms. Swander

An advanced course for experienced students who wish to perfect their creative or expository skills. Group discussion and individual conferences. Prerequsite: 320 or 321 or permission of the instructor.

484 THEORY OF LITERATURE W Ms. Cowler

Important critical modes and approaches to literature; an integrating experience for the senior major.

485 SEMINAR: SELECTED TOPICS

Focuses on a limited topic changing from year to year; stresses independent investigation and intensive study. (Not offered in 1978-79.)

FOREIGN LANGUAGES AND LITERATURES

Associate Professor George L. Speros (Chairperson): Foreign language education. Peninsular Spanish literature and history. Contemporary Spanish politics.
Associate Professor Jean-Luc Garneau: Linguistics, Littérature Québécoise. French literature of the 20th century. Translation.
Assistant Professor Warren R. Carlin: French Renaissance. Religion and Literature. France.
Assistant Professor Clayton Gray, Jr.: German language. Medieval, Nineteenth and Twentieth century German literature. Dutch language and literature. Comparative literature.
Assistant Professor Gertrude E. Grisham: German and comparative literature (18th and 20th centuries). Drama and theatre. German language. Linguistics. Language pedagogy.
Assistant Professor Francisco Sosa: Romance linguistics. Medieval literature. Spanish-American novel.
‡Lecturer Jane P. Staw: 17th century French Theatre. *Nouveau Roman.* Function of metaphor.

The Department of Foreign Languages and Literaures offers course work in French, German, and Spanish. Its purpose is to equip students to read rapidly and accurately and to converse and write with an acceptable degree of fluency. It is also expected that the student will gain an insight into the cultural history and civilization represented by the language chosen and relate this to other studies in the liberal arts curriculum. Advanced level courses are designed to present a broad and fairly intensive study of each of the major literary periods and to perfect further the student's fluency in oral and written expression. Additional courses are offered in French, German, and Spanish literature in translation and are listed under "Comparative Literature." Three courses in linguistics are available in English. Advanced students may participate in the internships offered in the three major languages. See "Lake Forest Off-Campus Programs" for description of Fall Term in Mexico Program.

Entering students desiring to continue with language studied in secondary school will be given a placement examination to determine the level at which they should continue the language in college. Each year of secondary school study is assumed to be the equivalent of one term at the college level. A student presenting, for example, two years of secondary school language credit may be expected to resume language study with the third term of the beginning course.

‡Part-time Teaching, 1978-79.

The Audio-Visual Center located in the Donnelley Library houses the foreign language cassette tapes, including not only textbook materials but also dramas, opera, poetry readings, lectures, and filmstrips in beginning, intermediate and advanced language, literature and civilization in the various languages offered.

There is on campus an active chapter of Phi Sigma Iota, the Romance Language Honor Society, which sponsors extra-curricular activities and prepares "Collages", a magazine of student writing in the Romance Languages.

A major may be obtained in language, literature or teacher certification in French, German, or Spanish and will consist of a minimum of eight courses in each of the above languages. Other courses offered outside of the language sections of the department may be required or strongly recommended. Listed below are the specific, two-track requirements in each language. Courses numbered 210 and below will not count in the major. Courses 110, 111, 112 and 210 or the equivalent are prerequisites to all other courses in each language. All courses numbered 210 and above are given in the foreign language, except for those courses listed as taught in English.

A student must receive a "C" grade or better in course 210 or have the permission of the instructor in order to take courses 230, 280, 290. A "C" or better, or permission of instructor also is required in courses 211, 212 in order to take courses 330 or 340.

Minimum Requirements

French Language Major
211 or 212; 280; 290; 330; 340; 350, 360 or 370; 410 or 440 (plus elective)
Linguistics 201; 202
210 proficiency in another foreign language

French Literature Major
211 or 212; 280; 290; 410 or 440; and any four courses in French literature numbered 300 and above
One course in comparative literature (except course 201)
Recommended: one course in European History; French 340

French Teacher Certification Major*
200 or 212, 280, 290, 330, 340, 350, 360, 370, 300 or 480; 410 or 440 (plus elective)
Linguistics 201, 201
112 proficiency in another foreign language

German Language Major
212; 230; 330; 370; 385; 400; 410 or 440 (plus elective)
Linguistics 201, 203
210 proficiency in another foreign language

German Literature Major
212; 230; 410 or 440; and any five courses in German literature numbered 300 and above
One course in comparative literature (except courses 203; 230)
Recommended: one course in European History; Comparative Literature 203; 230; Linguistics 203

German Teacher Certification Major*
212 or 211, if approved by faculty adviser; 230, 330, 340, 370, 385 (350 or 380 may be substituted, upon approval of faculty adviser); 410 or 440, 300 or 400
Linguistics 201, 203
112 proficiency in another foreign language

Spanish Language Major
211 or 212; 280 and 290 or 310 and 320; 330; 340; one Spanish literature course numbered 300 and above; 410 or 440 (plus elective)
Linguistics 201; 202
210 proficiency in another foreign language

*For professional and general education requirements, please refer to section on Department of Education.

Spanish Literature Major
211 or 212; 280; 290; 310; 320; 410 or 440; and any two courses in Spanish literature numbered 300 and above
One course in comparative literature (except course 202)
Recommended: one course in European History; two courses in Latin American History; Spanish 340

Spanish Teacher Certification Major*
211 or 212; two of 280, 290, 310, 320 (280-320 combination recommended); 330, 340, one additional Spanish/Spanish-American literature, to be selected in consultation with faculty adviser; 410 or 440 (plus elective)
Linguistics 201, 202
112 proficiency in another foreign language

French

110, 111, 112 BEGINNING FRENCH FWS
Mr. Carlin, Mr. Garneau

110 is designed to develop the student's ability to listen, speak, read, and write basic controlled patterns of French language. 111 and 112 introduce reading material of a cultural nature, to provide greater insight into the psychology of the language, and implement the student's understanding of language structure through free composition. Lab work is an integral part of the series.

210 READINGS AND DISCUSSIONS F
Mr. Carlin

Readings focus on contemporary French society showing the pattern of tradition and change in France today. Discussion and conversation. Compositions prepare the student for literature and civilization courses.

211 CONVERSATION W Mr. Carlin

Acquisition of spontaneity in oral expression and comprehension through both free and directed conversation, stressing French idiomatic expressions and cliches of everyday French conversation. Prerequisite: French 210 or equivalent.

212 COMPOSITION S Ms. Staw

Intensive training in written and oral expression. Semantic nuances of Anglo-French vocabulary are given special attention through translation from English into French. Prerequisite: French 211 or equivalent.

280 FRENCH LITERATURE FROM THE BEGINNINGS TO 1800 S
Mr. Garneau

French literature from the "Chanson de Roland" to the French Revolution: Ronsard, Montaigne, Moliere, Racine, Voltaire, Diderot, and Marivaux. Reading, lectures, discussion, and papers in French.

290 FRENCH LITERATURE FROM 1800 TO THE PRESENT

The great movements: Romaniticism, Realism, Symbolism, Naturalism, Surrealism, Existentialism, and the Absurd. Authors: Hugo, Balzac, Flaubert, Verlaine, Zola, Valery, Apollinaire, Sartre, Camus, Ionesco. (Not offered in 1978-79.)

300 SPECIAL STUDIES W Mr. Garneau

One author, one theme in literature or a group of works studied in depth, be it in French, Franco-Canadian or Africian literature of French expression. May be repeated for credit. For 1978: Malraux; Adventures in the Spirit. Poésic Québécoise du xx^{e} siècle.

330 PHONETICS AND PHONOLOGY W
Mr. Garneau

French articulatory phonetics and its application to the phonological structure of the language: vowels, consonants, intonation patterns, rhythm, linking; corrective exercises for difficulties in pronunciation; phonetics as a teaching device. (In alternate years. Offered in 1978-79.)

340 MORPHOLOGY AND SYNTAX S
Mr. Garneau

Mechanisms of word formation and sentence creation; morphological and syntactic theories and their implications in language learning and teaching; exercise building for the teaching of grammar. (In alternate years. Offered in 1979-80.)

350 FRENCH THEATRE

A close reading and discussion of several plays designed to give the student a clear sense of the

development and the richness of French theatre. Emphasis is placed on literary history, aesthetics, and special questions in dramatic theory. May be repeated for credit. (Not offered in 1978-79.)

360 FRENCH NOVEL F Mr. Carlin

Reading and discussion with a view to increasing appreciation of several related novels or novelists. The works are selected for their value as turning points in the understanding of the art of prose fiction and as examples of a particular stage in the development of that art. May be repeated for credit. 1978-79: Proust, Gide, Barrès, Green.

370 FRENCH POETRY F

An analysis of the work of one or several poets representative of a crucial moment in the history of French poetry. The essentials of French versification are stressed as well as the distinctive character of the various forms within the genre. May be repeated for credit. (Not offered in 1978-79.)

380 MOVEMENTS IN FRENCH LITERATURE S Mr. Garneau

Intensive study of one movement in French literature; philosophical, social, and artistic origins and development; representative works. Possible topics: Naturalism, Surrealism, Existentialism. (In alternate years. Offered in 1978-79; Topic: La Pléiade.)

410 ADVANCED CONVERSATION Mr. Carlin

Development of the linguistic facility for concepts and ideas in the spoken foreign language. Training in usage of sophisticated language patterns and of common locutions. Study of idioms and synonyms. Prerequisite: French 212. (Offered as required.)

430 FRENCH AUTHORS W

Rimbaud: The poetic adventure and its apparent failure. Readings from *Une Saison en enfer, Le Bateau ivre* and *Les Illuminations* to explore the poetic universe created by the mystical delinquent of French literature. (Offered in 1978-79.)

440 CREATIVE COMPOSITION AND STYLISTICS Mr. Garneau

Analysis of style in selected French writers. Stylistic analysis of translations. Intensive work in creative original composition of prose, poetry, and drama. (Offered as required.)

480 SEMINAR

An intensive investigation of a significant literary problem. Topics to be announced. (Not offered in 1978-79.)

490 INTERNSHIP AT NEW TRIER EAST HIGH SCHOOL FWS

Approved interns may register for one course credit during the fall, winter and/or spring terms. A two-credit internship is available during the winter term as well. Interns tutor students enrolled in the "Center for Self-Directed Learning" at New Trier East High School, Winnetka, Illinois, under the supervision of faculty at New Trier East and Lake Forest College. Open to qualified seniors, juniors and sophomores only.

German

110, 111, 112 BEGINNING GERMAN FWS Ms. Grisham, Mr. Gray

Intensive training in understanding, speaking, reading and writing of German, combined with an introduction to the culture and current lifestyles of the German-speaking countries. The three-term sequence provides a basic active command of the patterns and essential vocabulary for conversation and writing, while developing the student's ability to read fairly sophisticated text passages with accurate comprehension and ease. Materials for lab practice, and tutorial assistance are provided.

210 READINGS AND DISCUSSION F Mr. Gray

Practice in reading contemporary fiction and expository prose with emphasis on developing reading ease and accurate comprehension. Review of grammar topics, lab exercises. Prerequisite: German 112 or permission of instructor.

211 CONVERSATION

Practice in free and directed conversation on a wide range of topics reflecting the taste and special interests of the participants. Study of idioms and vocabulary, of everyday German supported by selective review of grammar patterns, as needed. Textual and visual resources are provided, including newspapers, magazines, short films. Prerequisite: German 210 or equivalent. (Not offered in 1978-79.)

212 COMPOSITION W Mr. Gray

Intensive practice in writing accurate, idiomatic German. Free composition on varied topics, translation of simple texts from English into German. Selective review of grammar patterns, as needed. Prerequisite: German 210 or equivalent. Offered in 1978-79.)

230 INTRODUCTION TO GERMAN LITERATURE S Mr. Gray

Masterworks representing major trends, movements, and themes in German literature of the last three centuries, studied for their intrinsic value and historical significance. Students deepen their understanding of German structure and style as they learn fundamentals and methods of literary analysis and interpretation. The course provides historical, cultural, and critical perspectives for more advanced studies in upper division courses. Prerequisite: German 211 or 212, or equivalent.

300 SPECIAL STUDIES F Mr. Gray

One author, one literary theme, or a group of works studied in depth. May be repeated for credit. Topic for 1978-79: The German literary heritage: Medieval, Renaissance, Baroque. Close study of major works, including the *Nibelungenlied, Gregorius,* Parzival, Grimmelshausen's *Simplicissimus,* others.

330 PHONETICS AND PHONOLOGY W Ms. Grisham

The sound patterns and phonological structure of German in comparison with English: introduction to phonemics and phonetic transcription, balanced by practical training in pronunciation and diction.

340 MORPHOLOGY AND SYNTAX

Study of word formation and sentence structure prepares the student for graded writing exercises and free composition; translation of excerpts from accomplished English authors encourages students to develop appropriateness in their choice of words, and a sense of style. The format is flexible and will be adjusted to students' needs. Prerequisite: German 212 or permission of instructor. (Not offered in 1978-79.)

350 THE MODERN GERMAN THEATRES

Works by leading playwrights in the context of changing styles and trends in stage production, from Naturalism to the present decade: Holz, Hauptmann, Wedekind, Sternheim, Hofmannsthal, Kaiser, Brecht, Dürrenmatt, Handke, and others. (In alternate years. Not offered in 1978-79.)

360 ENLIGHTENMENT AND SENSIBILITY: GERMAN LITERATURE AND THOUGHT IN THE EIGHTEENTH CENTURY W Ms. Grisham

Kant, Lessing, Aristotle and Shakespeare, and the coming of age of German literature in the "Sturm und Drang" years of Herder, Lenz, young Goethe, and Schiller. (In alternate years. Offered in 1978-79.)

370 CLASSICAL WEIMAR S Ms. Grisham

Major works of Goethe and Schiller at the height of their careers: drama, narrative, lyrical genres, poetic theory and criticism.

380 AN AGE OF REALISM

Realism as a world view and as mimetic method, from its roots in the late Romantic era to the onset of Modernism. Readings encompass a choice of works by nineteenth-century masters, from Tiech, Buchner and Kleist to Heine, Hebbel, Stifter, and Storm. (In alternate years. Not offered in 1978-79.)

385 NOVELLA

The most distinctive genre in German literature in its development from Goethe to Hofmannsthal and Thomas Mann. (In alternate years. Not offered in 1978-79.)

400 MODERN GERMAN FICTION AND POETRY

Selected shorter works by the foremost writers and poets from 1900 to the present. Although the historical focus varies somewhat from time to time, the emphasis remains on close reading and textual analysis. (In alternate years. Not offered in 1978-79.)

410 ADVANCED CONVERSATION

Study of patterns and practice in speaking German, designed to develop facility in expressing concepts and ideas. Emphasis on vocabulary acquisition, synonyms, stylistic choice. Prerequisite: German 212. (Offered as required.)

440 CREATIVE COMPOSITION AND STYLISTICS Ms. Grisham

Writing and revision of expository and imaginative prose (and poetry, depending on student interest). Stylistic analysis of selected literary texts, exercises in translation from English to German. (Offered as independent study in 1978-79.)

480 SEMINAR F Ms. Grisham, Mr. Gray

Intensive study of a significant problem or period or of the works of one author. (Offered as required.)

490 INTERNSHIP AT NEW TRIER EAST HIGH SCHOOL FWS

Approved interns may register for one course credit during the fall, winter and/or spring terms. A two-credit internship is available during the winter term as well. Interns tutor students enrolled in the "Center for Self-Directed Learning" at New Trier East High School, Winnetka, Illinois, under the supervision of faculty at New Trier East and Lake Forest College. Open to qualified seniors, juniors and sophomores only.

Linguistics

201 DESCRIPTIVE LINGUISTICS F
Mr. Garneau

Principles and techniques of descriptive linguistics as seen through different schools of linguistics from structuralism to modern transformational and stratificational theories. Taught in English.

202 ROMANCE PHILOLOGY

Evolution of the Romance Languages from Latin with emphasis on French, Spanish, and Italian. Basic knowledge of one Romance Language required. Taught in English. (In alternate years. Offered in 1979-80.)

203 A COMPARATIVE HISTORY OF ENGLISH AND GERMAN

The development of the two West Germanic dialects from their Indo-European antecedents to modern English and standard high German. Introduction to aims and methods of historical language studies. Taught in English. (In alternate years. Offered in 1979-80.)

301 SEMANTICS AND LEXICOLOGY S
Mr. Sosa

An introduction to the science of meaning, concentrating on the formal aspects of content. Sememes and their structural components: distinctive and redundant features. Connotative and denotative significations. Types of semantic associations and transfers; semantic changes. Etymologies. Word selectivity. Taboo and euphemism. Principles of lexicography. (In alternate years. Offered in 1978-79.)

Spanish

110, 111, 112 BEGINNING SPANISH FWS
Mr. Speros, Mr. Sosa

Basic language techniques and psychology of the language. Classroom and lab work. Graduated reading materials and discussion introduce mores of Spanish-speaking cultures. Lab work is an integral part of the series.

210 SPANISH READINGS AND DISCUSSION F Mr. Speros

Contemporary fiction and expository prose of moderate difficulty. Review of grammar. Class discussions and free expository composition at intermediate level.

211 CONVERSATION W Mr. Speros

Common idiomatic expression in everyday Spanish. Emphasis on oral expression and comprehension. Prerequisite: Spanish 210.

212 COMPOSITION S Mr. Speros

Intensive training in oral and written expression. Emphasis on idiomatic expression and translation. Prerequisite: Spanish 211 or equivalent.

260 SPANISH CIVILIZATION F Mr. Speros

Aspects of Spanish civilization touching on historical, artistic, political, physical and racial influences which have molded Spanish cultures.

270 SPANISH-AMERICAN CIVILIZATION

Aspects of Spanish-American civilization touching on historical, artistic, political, physical and racial influences which have molded Spanish-American cultures. (Not offered in 1978-79.)

280 SPANISH LITERATURE FROM BEGINNINGS TO 1681 F Mr. Sosa

Major works from the Middle Ages to the end of the Siglo de Oro. Special emphasis on poetry, theatre, and prose. (In alternate years. Offered in 1978-79.)

290 SPANISH LITERATURE FROM 1700 TO PRESENT S

Representative works from 1700 through the present day. Special emphasis on poetry, theatre, and prose. (In alternate years. Offered in 1978-79.)

300 SPECIAL STUDIES

One author, one theme in literature or a group of works studied in depth, be it Peninsular-Spanish or Spanish-American literature. May be repeated for credit. (Not offered in 1978-79.)

310 SPANISH-AMERICAN LITERATURE FROM BEGINNINGS TO 1860

Literature resulting from conquest of the Aztecs, Incas, and Araucans; study of works from Colonial Period through first half of the 19th century. (In alternate years. Offered in 1979-80.)

320 SPANISH-AMERICAN LITERATURE FROM 1860 TO PRESENT

Realism, Naturalism, Modernism, and recent trends from 1910 to the present. (In alternate years. Not offered in 1978-79.)

330 PHONETICS AND PHONOLOGY W
Mr. Sosa

Study of the formal sound system of Spanish. Definition of Spanish phonemes according to acoustic and articulatory distinctive features. Phonetic realizations. Stress and intonational patterns. Dialectal variations. Contrasts between English and Spanish. Practice in corrective phonetics. (In alternate years. Offered in 1978-79.)

340 MORPHOLOGY AND SYNTAX S
Mr. Sosa

Study of the sentence as a unit, analyzing it into its structural components. Morphemes and the laws regulating their combinations, with special attention to verbal categories and inflections. Application of grammatical theory to the generation of Spanish sentences. (In alternate years. Offered in 1979-80.)

350 SPANISH THEATRE

A close reading of several plays illustrating a particular moment in the evolution of Peninsular or Spanish-American theatre. Historical, aesthetic and technical aspects of the drama will be stressed. (Not offered in 1978-79.)

360 SPANISH NOVEL S Mr. Sosa

Reading and discussion with a view to increasing appreciation of several related novels or novelists. The works are selected from Spain or Latin America for their value as turning points in the understanding of the art of prose fiction and as examples of a particular stage in the development of that art. Topic for 1978: Contemporary Spanish-American Novel.

370 SPANISH POETRY W Mr. Sosa

An analysis of the work of one or several poets representative of a crucial moment in the history of Peninsular or Spanish-American poetry. The essentials of Spanish versification are stressed as well as the distinctive character of the various forms within the genre. Topic: Modernist poetry.

410 ADVANCED CONVERSATION
Mr. Speros

Development of the linguistic facility for concepts and ideas in the spoken foreign language. Training in usage of sophisticated language patterns and of common locutions. Study of idioms and synonyms. Prerequisite: Spanish 212. (Not offered in 1978-79.)

440 CREATIVE COMPOSITION AND STYLISTICS F Mr. Speros

Assumes solid foundation in the elements of grammar and in basic writing. Critical literary and stylistic analysis of prose and poetry. Analysis of creative composition incorporating the principles of style.

480 SEMINAR

Intensive investigation of a movement, one work, or an author. (Offered as required. Not offered in 1978-79.)

490 INTERNSHIP AT NEW TRIER EAST HIGH SCHOOL FWS

Approved interns may register for one course credit during the fall, winter and/or spring terms. A two-credit internship is available during the winter term as well. Interns tutor students enrolled in the "Center for Self-Directed Learning" at New Trier East High School, Winnetka, Illinois, under the supervision of faculty at New Trier East and Lake Forest College. Open to qualified seniors, juniors and sophomores only.

495 INTERNSHIP AT FIELD MUSEUM OF NATURAL HISTORY W

Approved interns may register for a two-credit course internship at the Field Museum of Natural History in Chicago during the winter term. Interns will work with bilingual programs for school children and will translate for publication museum material under the supervision of the Department of Education of the Field Museum and an LFC faculty member of the Department of Foreign Languages. Open to qualified seniors, juniors and sophomores only.

HISTORY

Professor Arthur Zilversmit: American Intellectual History.
Associate Professor Ronald Grossman: Ancient and Medieval History. Psycho-history.
†††Associate Professor Thomas Moodie (Chairperson): Modern European and French History.
Assistant Professor W. Clarke Douglas: Latin American History. Afro-American History.
Assistant Professor Michael Ebner: Modern American History. Social History.
Assistant Professor D. L. LeMahieu: Modern European History. Intellectual History. British History.
Assistant Professor Thomas Ticknor: Modern American History. Urban History. Economic History.
‡Lecturer Gary Cross: Social History. Modern French History.
‡Lecturer Carol Gayle Moodie: Modern European History. Russian History.
‡Lecturer Steven Rosswurm: American Colonial and Revolutionary History.

History is the collective memory of mankind. It informs us of the intense human struggles which shaped our past and thereby enriches our understanding of the present. A society that forgets its past is like an individual suffering from amnesia. Both lack identity, purpose and direction. Yet the complexities of the past cannot be reduced to simple rules for the present. History reveals a diversity of human experience that is worth pondering for its own sake. A respect for this diversity has long been the mark of an educated individual and a civilized society.

History courses at Lake Forest College reflect the diversity of the historical record. The department offers courses in intellectual, political, economic and social history. Since we recognize that the teaching of history has concentrated on the American and European past, the Department offers courses in the history of Africa, Latin America, and Russia in addition to the core of courses in European and American history. Several courses integrate new techniques into our approach. In one we draw upon the insights of modern psychology; in others we try to recapture the past through the methods of oral history and field work.

Students majoring in history are expected to complete three of the following four courses; History 110, 111, 120, 121, preferably by the end of their sophomore year; they are also expected to take an additional course outside of modern European or United States history, as well as one course at the 200 level. All majors must enroll in History 380-381, a colloquium on comparative history (with topics changing periodically) as an introduction to historiography and methodology; it is suggested that this course be taken in the junior year. In addition, at least one course must be taken at the 300 level. The department takes special interest in encouraging senior thesis work leading to the awarding of the degree with honors.

‡Part-time Teaching, 1978-79.
†††Sabbatical Leave, Spring Term 1979.

110 EUROPE FROM THE RENAISSANCE TO THE FRENCH REVOLUTION FS
Mr. Grossman, Mr. Moodie

Political, social, and intellectual developments shaping Europe from the Italian Renaissance through the Enlightenment.

111 MODERN EUROPEAN HISTORY, 1789-1945 FS Staff

The transformation of European society and politics beginning with the French and industrial revolutions. Emergence of the nation state and modern political ideologies; the crisis of democracy and the rise of totalitarianism in the era of the two World Wars.

120 FOUNDATIONS OF THE AMERICAN REPUBLIC FS
Mr. Ebner, Mr. Ticknor

The origins of American society and the development of the United States from an underdeveloped new nation into a powerful national entity.

121 MODERN AMERICA FS
Mr. Ebner, Mr. Ticknor

America's response to industrialism and its changing role in foreign affairs.

130 HISTORY OF AFRO-AMERICA F
Mr. Douglas

Survey of Afro-American history from 1500 to the present. Special emphasis on slavery, abolition, the northern migration, and the civil rights movement. Discussion of current concerns of Black Americans.

141 LATIN AMERICA: THE COLONIAL AND REVOLUTIONARY PERIODS F
Mr. Douglas

Introduction to current problems in Latin America as they relate to the colonial heritage. Conquest and development of Spanish and Portuguese America. Special emphasis on relations between European and non-elite groups, colonial protest movements, and the emergence of a multi-racial society.

142 MODERN LATIN AMERICA S
Mr. Douglas

Political social and cultural development of Latin America from the Wars of Independence to recent times. The impact of revolution, the relations between Latin America and the U.S., and current issues affecting Latin America. Emphasis on the development of Mexico, Argentina and Cuba.

151 THE CONTEMPORARY WORLD

Political and social change in the twentieth century in the world beyond Europe; the decline of Western hegemony and the rise of worldwide civilization. (Not offered in 1978-79.)

170 EUROPE IN THE ERA OF THE FIRST WORLD WAR W Mr. Moodie

The impact on European society, politics and thought of Europe's first total war.

180 AMERICAN DIPLOMACY SINCE 1898 W Mr. Ebner

A survey of the evolving role of the United States in international affairs since 1898, with particular emphasis on the domestic origins of foreign policy.

210 THE ANCIENT WORLD

Early civilizations of the Nile and Tigris-Euphrates River valleys; Greek civilization and its Roman inheritors; origins and early development of the Christian church. (Not offered in 1978-79.)

211 DAWNING OF THE MIDDLE AGES F
Mr. Grossman

Division of the ancient world into the civilizations of Islam, Byzantium, and Latin Christendom; origins and development of feudal society, and beginnings of the economic revival.

212 THE HIGH MIDDLE AGES S
Mr. Grossman

Origins of the European political order; the medieval intellectual tradition; the crisis of the 14th and 15th centuries.

213 20TH CENTURY EUROPE F
Ms. Moodie

The collapse and reconstruction of European society, politics and culture in the period from World War I through the 1960s. Emphasis on Central and Eastern Europe and on conflicting ideologies.

214 HISTORY OF RUSSIA

Survey of the political, social, and intellectual history of Russia from the Muscovite period to recent times. (Not offered in 1978-79.)

221 TUDOR-STUART BRITAIN F
Mr. Rosswurm

Political, social, and intellectual history of Britain from the consolidation of the Tudor monarchy to the era of Walpole.

222 MODERN BRITAIN S Mr. Rosswurm

The transformation of British society and politics from the pre-industrial world to the emergence of the 20th century welfare state.

231 AGE OF THE ENLIGHTENMENT

Readings and discussion of major figures of the British and French enlightenments. History 110 recommended. (Not offered in 1978-79.)

235 HISTORY AND LITERATURE F
Mr. Moodie

Social history of Europe in the 19th century as seen through imaginative literature. Examination of social conditions and social change through readings: Balzac, Dickens, Zola. History 111 recommended.

236 LITERATURE, SOCIETY, AND DISSENT IN RUSSIA

Examination of aspects of Russian intellectual and social history of the 19th and 20th centuries through contemporary writings, including fiction. History 214 recommended. (Not offered in 1978-79.)

240 HISTORY OF AFRICA F Ms. Fairley

A survey of the social and political history of the people of Black Africa to the beginning of the colonial era. (Also offered as Politics 213.) Prerequisite for term in Africa.

243 INTERVENTION IN LATIN AMERICA: GOOD NEIGHBORS AND BAD NEIGHBORS

Examination of the role of the United States in Latin America; the Monroe Doctrine, philosophies of the "Big Stick", Alliance for Progress, and recent CIA activities. (Not offered in 1978-79.)

250 THE AMERICAN CIVIL WAR W
Mr. Rosswurm

The origins of the war in the antagonistic development of north and south; Lincoln and the Republican Party; black self-activity in the north and south; reconstruction and the impact of the war on American development.

255 AMERICAN SOCIAL HISTORY W
Mr. Ebner

An introduction to social change in American society from the colonial period to the present. Topics examined include the family, race relations, violence, the frontier, politics, labor and industrialism. Not open to students who have taken History 175.

260 THE AMERICAN ECONOMY F
Mr. Ticknor

The causes and social consequences of American economic development. Differences between agricultural, industrial and post-industrial America. Economics 110 recommended.

263 THE MODERN AMERICAN CITY S
Mr. Ticknor

The changing functions, scale and quality of urban life. A framework for viewing modern American metropolitan problems in economic and cultural context. Some field work in the Chicago metropolitan area.

264 BLACK LEADERSHIP AND IDEOLOGY S Mr. Douglas

Comparative study of Black leaders and their programs. Special emphasis on Frederick Douglass, Nat Turner, Booker T. Washington, Marcus Garvey, Dr. Martin Luther King and Malcolm X.

270 EDUCATION IN AMERICAN SOCIETY AND THOUGHT F Mr. Zilversmit

Historical role of education in American society; education as a panacea and as a practical solution; schooling vs. education. Emphasis on the twentieth century.

271 WOMEN IN MODERN SOCIETY: EUROPE AND AMERICA W Staff

Selected topics in the history of women in modern societies, concentrating on the nineteenth and twentieth centuries; an examination of how industrialization and social change transformed women's roles, and the way this was reflected in the political and intellectual realms.

272 HISTORICAL PATTERNS OF COMMUNITY IN AMERICA W
Mr. Ticknor

The evolution of American communities and of differences within them that arise from class, ethnic group, race and region. Focus on communities to be visited in History 273 and fieldwork in Chicago and downstate. History 121 or 263 recommended.

273 TERM IN AMERICA W Mr. Ticknor

Field study of community and sub-groups in America. Travel to Boston, Old Sturbridge, New York, Newark, Columbia New Town, and South Carolina to observe the historical varieties of American communities. Prerequisite: History 272.

278 THE CUBAN REVOLUTION W
Mr. Douglas

The Revolution in the context of both Cuban history and the Caribbean experience. Emphasis on the careers and ideologies of Fidel Castro and "Che" Guevara.

279 PSYCHOHISTORY S Mr. Grossman

Methods and assumptions of modern psychology and psychoanalysis as applied to the study of history and biography.

310 SOCIAL AND ECONOMIC DEVELOPMENT OF EUROPE

Readings and discussion of selected topics in European social and economic history since the industrial revolution. Attention to the newer methods of social and economic history. Prerequisite: History 111 or permission of instructor. (Not offered in 1978-79.)

315 THE RUSSIAN REVOLUTION S
Ms. Moodie

The 1917 Revolution and the first decades of Soviet society, emphasizing political and social forces, ideological debates, and cultural change. Prerequisite: History 213 or 214 or permission of instructor.

318 HISTORY OF MODERN FRANCE F
Staff

Social, political and intellectual development of France from the era of the French Revolution to the present. Prerequisite: History 111.

333 EDWARDIAN ENGLAND

Readings and discussion of the political, social, and intellectual transformation of England from the death of Victoria to the First World War. Prerequisite: History 111 or 222. (Not offered in 1978-79.)

365 AMERICAN THOUGHT S Mr. Zilversmit

Roots of American thought; emphasis on Puritanism, the Great Awakening, the political ideology of the Revolution and its transformation in the early 19th century; the ideological response to Darwinism and the new industrialism. Prerequisite: History 120, 121 or permission of instructor.

370 ORAL AND COMMUNITY HISTORY S
Mr. Ebner

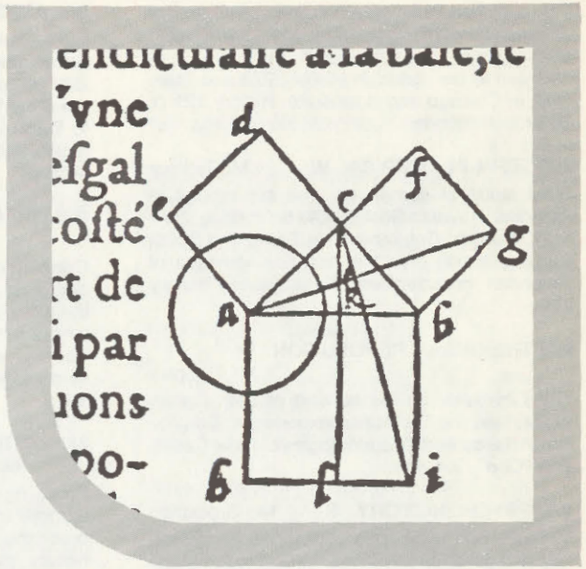
Combining classroom sessions and independent field studies, students conduct interviews in Lake Forest and environs. Prerequisite: History 121, 175, or 200. Topics for 1979: American Society and Politics since 1932. Not open to students who have taken History 104 in Winter 1975.

380 HISTORY TERM W
Mr. Douglas, Ms. Moodie, Mr. Zilversmit

Focusing on a topic in comparative history, the seminar introduces students to the methods and problems of historical research. Required of history majors in either the junior or senior years, open to qualified non-majors with permission of the instructor; non-majors may take History 380 without taking History 381. Topic for 1979: Studies in comparative serfdom, slavery and abolitionism. An examination of European serfdom with emphasis on the Russian experience and of the varieties of slavery in different parts of the New World. Comparative study of movements to abolish servitude and slavery.

381 HISTORY TERM RESEARCH PROJECT W
Mr. Douglas, Ms. Moodie, Mr. Zilversmit

A continuation of History 380, required of all majors. Major emphasis on a directed historical research project.



MATHEMATICS

Professor Ralph L. Shively (Chairperson): Numberical Analysis. Numberical Linear Algebra. Special Functions.
Professor Robert J. Troyer: Geometry. Geometric Algebra.
Associate Professor Edward Packel: Functional Analysis. Applications of Mathematics to the Behavioral and Social Sciences. Computer Science.
*Associate Professor Charles S. Smith: Algebra. Statistics.
Assistant Professor David S. Cochran: Topology. Computer Science.
Assistant Professor Jonell Comerford: Group Theory. Automata Theory.
‡Instructor Ruthane Bopp: Algebra. Real Analysis.

Mathematical concepts and mathematical techniques are in use today in almost every area of human endeavor. The curriculum and other activities of the mathematics department are designed to acknowledge this fact. The program of courses that are offered meets the needs of students interested in a wide variety of applications as well as those interested in pure mathematics for its own sake.

There are two options a student may choose in order to satisfy the requirements for a major in mathematics. One option recognizes the fact that some students who intend to pursue mathematical careers need training that emphasizes applications of mathematics. The other option is a traditional program which students who wish to pursue further studies for advanced degrees in graduate schools will wish to elect. The minimum requirements for all students majoring in mathematics is satisfactory completion of Mathematics 110, 111, 210, 211, 212 (or in the honors sequence Mathematics 115, 116, 117 instead of 110, 111, 210). One option will be satisfied by completing Mathematics 350, 351 plus at least one additional course numbered 300 or above. The minimum requirements of the second option will be satisfied by receiving credit in Mathematics 330, 331 and at least one additional course numbered 300 or above. Most majors who plan careers in mathematics elect more than the minimum number of courses that are required. In addition a two-course sequence outside the mathematics department in which mathematics is used as a tool is required. The sequence must be approved by the department. A reading knowledge of a foreign language is strongly recommended for students who plan to go to graduate school.

Mathematics 100, 103, 105, 150, 160, and 161 may not be counted toward the major.

In addition to the major, the Department of Mathematics offers the equivalent of a strong "minor" in computer science. This is officially recognized by the faculty as a sequence in Computer Science. Upon satisfactory completion of the following courses it may be recorded on a student's official transcript that he or she has met the requirements of this Sequence. The requirements are: Mathematics 170, 270, 272, 210 and 314. A student must officially apply to have this recorded on his or her transcript.

The mathematics department uses all the facilities of the College Computer Center to integrate computer science and computer techniques into its courses. The Computer Center consists of a PDP 11/40 computer with time-sharing capabilities along with the usual peripheral equipment. The computer is used as a tool for the numerical solution of problems, and is utilized to augment the understanding of concepts and principles. It is also used for student and faculty research.

Mathematics 110, 111, 210, 211, 212 (or the freshman honors sequence) along with Mathematics 161, 314, 350, 351 provide the background for students who wish to prepare for the first three examinations administered by the Society of Actuaries toward certification as an Associate or Fellow in that professional organization.

*Medical Leave of Absence, 1978-79.
‡Part-time Teaching, 1978-79.

100 ELEMENTARY ALGEBRA F Ms. Bopp
The algebra of fractions, roots, powers and radicals; inequalities; the linear function; the solution of systems of two or more linear equations; quadratic equations; word problems.

103 MATHEMATICS OF GAMES AND GAMBLING W Mr. Packel
Mathematical topics relevant to analysis of and strategy for various common games of skill and chance (backgammon, craps, roulette, etc.) followed by topics in elementary game theory. Emphasis on mathematical reasoning behind betting and play. Prerequisite: Experience with some games of the above type and interest in the mathematics behind them.

105 ELEMENTARY FUNCTIONS FS Staff
Properities of functions with emphasis on polynomial, exponential, logarithmic, and trigonometric functions. Analytic geometry.

110 CALCULUS I FW Mrs. Comerford, Mr. Packel, Mr. Troyer
The calculus of functions of one variable. Limits, continuity, differentiation, and applications; a brief introduction to integration. Prerequisite: 3½ years of high school mathematics or Mathematics 105.

111 CALCULUS II S Ms. Bopp, Mr. Shively
The calculus of functions of one variable. Integration, introduction to differential equations. Prerequisite: Mathematics 110.

115 HONORS CALCULUS I F Mr. Packel
Theory and applications of the calculus of functions on one variable. Limits, continuous functions, differentiable functions, and their applications. Permission of instructor.

116 HONORS CALCULUS II S Mr. Packel
Theory and applications of the calculus of functions of one variable. Integrable functions, infinite series, and introduction to differential equations. Permission of instructor.

117 LINEAR ALGEBRA
Theory and application of vector spaces with emphasis on the vector spaces R^2, R^3, R^n. Linear indepedence, bases; dimension; the scalar product; lines and planes in R^3; systems of linear equations; linear transformations and matrices. Permission of instructor. (Not offered in 1978-79.)

150 INTRODUCTION TO PROBABILITY THEORY AND STATISTICAL INFERENCE S Mrs. Comerford, Mr. Troyer
Designed for students in the social and life sciences. Finite probability theory, distributions, samplying, correlation, and regression, Chi square and other tests of significance. Emphasis on the use of the computer as a tool and on applications to a variety of disciplines.

160 FINITE MATHEMATICS WITH APPLICATIONS
Mathematical topics as needed to build and

solve mathematical models of situations in the life, social, and managerial sciences. Finite sets; permutations and combinations with applications to probability theory; vectors, matrices, and linear programming; game theory; computing. (Not offered in 1978-79.)

161 MATHEMATICS OF FINANCE W Mr. Shively

A mathematical treatment of such topics as compound interest, present value, sinking funds, amortization of debts, and the use of mortality tables in the calculation of insurance premiums and life annuities.

170 INTRODUCTION TO COMPUTER SCIENCE FWS Mrs. Comerford, Staff

The BASIC programming language, algorithms, and problem solving. Practical and theoretical exposure to computing concepts. Includes applications and examples from the humanities, social sciences, and physical sciences.

210, 211, 212 LINEAR ALGEBRA AND MULTIVARIABLE CALCULUS FWS Mr. Bell

Linear algebra, multiple integration, and partial differentiation, Stokes and Green's theorems. A transition from elementary calculus to functions of real variables. Prerequisite: Mathematics 110, 111.

214 DIFFERENTIAL EQUATIONS F Mr. Shively

Techniques of solving ordinary differential equations including infinite series methods. Properties of linear systems and their interplay with vector space theory. Applications of differential equations. Prerequisite: Mathematics 111.

216, 217 HONORS MULTIVARIABLE CALCULUS

Theory and application of functions of several variables. Derivatives, vector calculus, real varlued functions, multiple integration, vector field theory. Permission of instructor. (Not offered in 1978-79.)

230 NUMBER THEORY W Mr. Packel

Mathematical induction, divisibility properties of integers, prime numbers, congruences. Prerequisite: Mathematics 111 or permission of instructor.

260 HISTORY OF MATHEMATICS

A survey of the important concepts of mathematics from the time of the Babylonians to the present. Emphasis on contributions of the most prominent individuals associated with the development of mathematics. Permission of instructor. (Not offered in 1978-79.)

270 PROGRAMMING LANGUAGES W Staff

An introduction to FORTRAN, ALGOL and ASSEMBLER and a more in depth study of at least one of these languages.

272 DATA STRUCTURES AND DATA MANAGEMENT

A study of data structures and their application to data processing problems, including searching, sorting, file creation and file maintenance. (Not offered in 1978-79.)

310 COMPLEX ANALYSIS S Mr. Packel

One or more topics from functions of complex variables, Fourier series, integral transforms, special functions and partial differential equations of mathematical physics. Prerequisite: Mathematics 212 or permission of instructor.

314 NUMERICAL ANALYSIS

Linear and polynomial interpolation, finite differences, matrix methods. Solution of equations and systems of equations. Numerical differentiation, integration, and solutions of differential equations. Algorithms and computer applications. Prerequisite: Mathematics 211 or permission of instructor. (Not offered in 1978-79.)

330, 331 ALGEBRA FS Mrs. Comerford

Set theory, groups, rings, integral domains, fields, linear algebra. Prerequisite: A grade of "C" or better in Mathematics 116 or 210, or permission of instructor.

340 GEOMETRY W Mr. Troyer

Selected topics from affine, Euclidean, non-Euclidean, projective and differential geometry. Prerequisites: Mathematics 330 or permission of instructor. (Not offered in 1978-79.)

350 MATHEMATICAL PROBABILITY

Discrete and continuous probability. Distributions, the law of large numbers, the central limit theorem, random variables, generating functions. Prerequisite: Mathematics 210 or permission of instructor. (Not offered in 1978-79.)

351 MATHEMATICAL STATISTICS

A mathematical study of such topics as random sampling, the law of large numbers, estimation of parameters, the central limit theorem, confidence intervals and tests of hypotheses, decision theory, regression, exponential design and analysis of variance and distribution free methods. (Not offered in 1978-79.)

410 TOPOLOGY

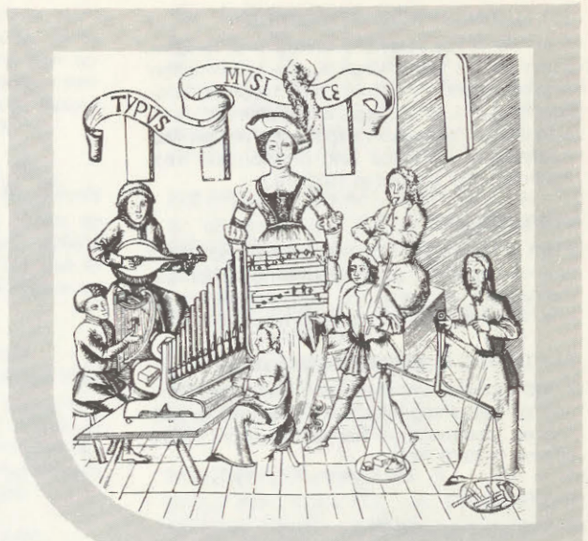
Point set topology. Such topics as topological spaces, separation axioms, covering properties, metrization, convergence and completeness and homotopy theory. (Not offered in 1978-79.)

411 TOPICS IN MODERN ANALYSIS

Introductory notions of functional analysis. Banach spaces, integration and measure, Hilbert spaces, commutative Banach algebras. (Not offered in 1978-79.)

480 SEMINAR

(Not offered in 1978-79.)



MUSIC

Professor Ann D. Bowen (Chairperson): Music Theory. 20th Century Music History. Piano.
†††Professor Frank Kirby: Music History and Criticism.
‡Lecturer Kristina Follrath: Choral Conductor.
‡Teaching Associate Robert Huhn: Organ and Piano.
‡Teaching Associate Peggy Faller: Voice.
‡Teaching Associate Richard Faller: Brass Wind Instruments.
‡Teaching Associate James Radon: Flute, Clarinet, Saxophone.
‡Teaching Associate Ruth Scheuzger: Violin, Viola.

The music department offers students an opportunity to pursue a course of study leading to a music major or to elect courses which will broaden their liberal arts education. If one is interested in performance, it is not only possible to study an instrument, but there is also opportunity to participate in choral groups.

The curriculum for the major places emphasis on courses in music history and theory rather than applied music. Courses in music history are organized to emphasize the major stylistic periods of the Western World. In addition to the study of music in its historical perspective, stylistic developments in music are related to those of other arts. Either Music 104 (Perspectives On Music) or Music 110 (Introduction to Music Literature) is a prerequisite for advanced history courses; but neither counts toward the major in music.

The first three courses in music theory include work with basic melodic and chordal structures, formal modes of musical organization, harmonic analysis, ear-training, and sight-singing. In this integrated approach the student also has an opportunity to compose short compositions. The more advanced courses include counterpoint, fugue, and modern harmony.

A music major should demonstrate a minimum keyboard proficiency or a performing ability on another instrument. Staff members give private instruction in piano and organ, and instruction in other instruments is arranged with qualified musicians from the Chicago area.

The College Choir and Madrigal Singers are the departmental co-curricular music organizations. It is also possible for competent instrumentalists to audition for the Lake Forest Symphony Orchestra.

‡Part-time Teaching, 1978-79.
†††Sabbatical Leave of Absence, Spring 1979.

Student directed ensembles are certainly encouraged even though we have no formal instrumental groups on campus. The aforementioned groups present frequent concerts and provide excellent musical experience for all participants.

The major includes Music 150, 151, 152, 230, 233, 250, 251, 340, and 341. In addition to the required course work, majors must have one year of applied music and must participate in choir. A reading knowledge of German is encouraged, especially for the student who may want to pursue graduate study in music.

104 PERSPECTIVES ON MUSIC FS
Miss Bowen, Ms. Follrath, Mr. Kirby

A non-technical introduction to various facets of music through guided listening to selected masterpieces of Western music as well as exposure to popular and folk music and some exposure to Non-Western music. No previous knowledge is needed. Intended for non-majors.

109 CHOIR FWS Ms. Follrath

Credit may be earned after a year's participation in the group and completion of a research paper.

110 INTRODUCTION TO MUSIC LITERATURE W Mr. Kirby

Explanation of basic materials of music leads to the survey of major musical styles and media of performance from the Middle Ages to the present. Emphasis on listening.

111, 211, 311, 411 APPLIED MUSIC FWS
Staff

Private instruction in piano, organ, orchestral instruments and voice. One half-hour lesson and a minimum seven hours of practice per week. Satisfactory completion of one year of instruction qualifies a student for one course credit. Added fee for private lessons. Any student who desires more than two course credits in applied music or choir must satisfactorily complete the first term of theory.

116 SYMPHONIC MASTERPIECES W
Miss Bowen

Varied aspects in the history of the symphony from its inception to the present day.

117 INTRODUCTION TO NON-WESTERN MUSIC

A study of music outside the European "Art" tradition. Prerequisite: Music 104 or a knowledge of materials of music. Offered in alternate years. Not offered in 1978-79.

150, 151, 152 MUSIC THEORY FWS
Miss Bowen

Basic vocabulary of materials of musical composition: melodic and chordal structures; sight-singing and ear-training; diatonic and chromatic harmony with emphasis on four part writing, analysis, and creative work.

226 AVANT-GARDE IN 20TH CENTURY MUSIC W

Study of works representing experimental techniques as opposed to traditional concepts of musical composition. (Not offered in 1978-79.)

227 HISTORY OF JAZZ W Mr. Kirby

Principal styles and representative jazz musicians: the roots (including blues and ragtime), jazz in New Orleans and Chicago, big band swing, and modern jazz (since 1945). (In alternate years. Offered in 1978-79.)

228 CHAMBER MUSIC Mr. Kirby

Historical study of leading forms of chamber music and works of representative composers. (Offered as required.)

229 HISTORY OF OPERA F Mr. Kirby

Study of stylistic aspects and analysis of the world's great operas. (Offered in alternate years. Offered in 1978-79.)

230 COUNTERPOINT W Miss Bowen

"Species" counterpoint, using both modal and tonal approaches in projects. (In alternate years. Not offered in 1978-79.)

231 INVERTIBLE COUNTERPOINT AND FUGUE Miss Bowen

Study of double counterpoint in its various forms and fugal techniques. (Offered as required.)

233 FORM AND ANALYSIS W

A detailed study of short lyric forms, the dance forms used in suites, and sonata structures. This leads to both structural and harmonic analysis of works of Bach, Beethoven, Chopin, Schubert and Schumann. (Offered as required.)

250, 251 MUSIC IN THE CLASSIC AND ROMANTIC ERAS FS Mr. Kirby

Stylistic traits of the 18th and early 19th cen-

turies; works of Haydn, Mozart, and Beethoven. Nineteenth century Romanticism centers around works of Schubert, Schumann, Liszt, Brahms and Wagner.

332 MODERN HARMONY AND COUNTERPOINT Miss Bowen

(Offered as required.)

339 MUSIC IN THE MIDDLE AGES AND RENAISSANCE F

Music history from Gregorian chant to the end of the sixteenth century. (Offered as required.)

340 MUSIC IN THE BAROQUE PERIOD F Mr. Kirby

Representative composers from 1600-1750, with special attention to J.S. Bach. (In alternate years. Not offered in 1978-79.)

341 20TH CENTURY MUSIC S Miss Bowen

Trends, techniques, and leading composers of modern music, from the French impressionists to the present. (In alternate years. Offered in 1978-79.)

343 AMERICAN MUSIC S Miss Bowen

Music in America from the time of the Pilgrims to the present, including "art" music, folk music, and jazz. (In alternate years. Not offered in 1978-79.)

480 SEMINAR IN MUSIC HISTORY Mr. Kirby

PHILOSOPHY

*Professor Forest Hansen: Aesthetics. Ancient Philosophy. Philosophy of Psychology. Greek Civilization.

Assistant Professor Kenneth Kipnis (Chairperson): Philosophy of Law. Professional Ethics. Political Philosophy.

Associate Professor Abba Lessing: Existentialism. Jewish Studies. Hegel. Philosophy in Literature.

Instructor Patricia McGoldrick: Kant. Philosophy of the Mind. Logic.

Philosophy is one of the oldest disciplines. It is not so much a subject as a particular way of thinking, a rigorously critical reflection upon our most important judgments and experiences. Philosophical skills can be used to put things into perspective, to see the consequences of our views, to assess the justifications of our beliefs, our practices, and our institutions. In pursuing clarity, consistency, and intellectual responsibility, philosophers have engaged an unusually broad range of issues: the relationship between human beings and nature, the possibility of knowledge, the justification of moral and aesthetic judgments, the basis of legal obligation, the value of justice, the meaning of existence. Philosophy at Lake Forest College emphasizes the diversity of the discipline. Students have an opportunity to study the main lines of our philosophical heritage as well as the many sides of contemporary philosophical inquiry.

Because of the unusually broad applicability of philosophical reasoning skills, students trained in philosophy are well prepared for careers requiring a capacity for critical judgment. Except where prerequisites are required, philosophy courses are open to all students. The minimum major requirement of eight courses must include Philosophy 211, 212, 213, and one 300-level course. Philosophy 100 and 205 may not be counted toward the major.

*Sabbatical Leave of Absence, 1978-79.

100 REASONING: THEORY AND PRACTICE W

Development of reasoning skills through study of argumentation and the principles of modern logic. Practice in analyzing and criticizing arguments. Topics include principles of valid argumentation, techniques for clarifying meanings, tactics for uncovering and avoiding fallacious reasoning and strategies for applying logical methods to making decisions.

110 INTRODUCTION TO PHILOSOPHY FWS Staff

An introduction to the sphere of philosophical activity with emphasis on classical and contemporary controversies.

115 EXISTENTIALIST THOUGHT F Mr. Lessing

Introduction to the existentialist movement through its discursive and literary expressions. Readings in Kierkegaard, Nietzsche, Dostoevski, Kafka, Sartre, Camus, and Buber.

120 CONTEMPORARY ETHICAL ISSUES F Mr. Kipnis

Discussion of current and controversial ethical issues such as euthanasia, moral obligation and the environment, sexual morality, abortion, discrimination, and preferential treatment. Particular attention will be given to the application of some major ethical theories to these contemporary problems.

150 STUDIES IN JEWISH PHILOSOPHY

Philosophical response to Jewish experience and tradition defined by ancient scripture and articulated in Philo Judaeus, Saadia, Halevi, Maimonides, into the modern period of Buber, Heschel, Fackenehim, and contemporary Zionist thought. (Not offered in 1978-79.)

200 FEMINISM: PHILOSOPHICAL ISSUES

Examination of feminism and its relationships to three central topics in social philosophy: justice, rights, and equality. Readings include selected feminist writings and materials drawn from philosophy, law, and other disciplines. (Not offered in 1978-79.)

201 MEDICAL ETHICS

Critical examination of ethical issues arising in the application and organization of biomedical resources. Problems touch on topics such as abortion, malpractice, patients' rights, experimentation with human subjects, distribution of medical care and medical education, allocation of scarce medical resources, concepts of death, genetic research. (Not offered in 1978-79.)

203 ETHICS AND THE PROFESSIONS W Mr. Kipnis

Analysis and evaluation of ethical problems and principles in the major professions as well as business. Attention will be given to the idea of professional responsibility, the relationships between obligations generated by professional codes and other moral and legal obligations, and the problem of justification of codes of professional ethics. (Offered alternate years.)

205 THE HOLOCAUST: PHILOSOPHICAL AND THEOLOGICAL IMPLICATIONS W Mr. Lessing

Ethical, metaphysical, and religious concerns which issue from the historical and factual dimensions of the Holocaust (the destruction of European Jewry). (In alternate years.)

210 MODERN LOGIC AND THE PHILOSOPHICAL PROBLEMS OF SCIENCE S

Principles of deductive logic and inductive logic. Application of logical methods to selected topics in the philosophy of science: scientific discovery, explanation, theory confirmation and laws. Suited to students of humanities and social sciences as well as natural sciences and mathematics.

211 ANCIENT GREEK PHILOSOPHY F Mr. Hansen

Nature of reality, knowledge, morality, and the ideal life traced from the pre-Socratics through Plato, Aristotle, and post-Classical thinkers to its emergence in medieval philosophy. Major focus: methods and world-views of Plato and Aristotle.

212 RATIONALISM AND EMPIRICISM S Mr. Lessing

17th and 18th century European philosophers. The divergent positions of Descartes, Hobbes, Spinoza, Leibniz, Locke, Berkeley, and Hume culminating in the synthesis of Kant. Prerequisite: 110, 211, or consent of instructor.

213 CONTINENTAL PHILOSOPHY: HEGEL TO BERGSON F Mr. Lessing

Idealism, romanticism, existentialism, and vitalism. Readings in Hegel, Kierkegaard, Schopenhauer, Marx, Nietzsche, and Bergson. Prerequisite: 110, 115, 212 or consent of instructor.

220 PHILOSOPHIES OF EDUCATION

Introduction to contemporary philosophies of education with special attention to their views of human nature and their justification of the claimed goals and values of education. (Also listed in Education 220.) (Not offered in 1978-79.)

230 NIHLISM/PARADISE: PHILOSOPHY IN LITERATURE S Mr. Lessing

The significance of hopelessness and paradise as illustrated in works by Dostoevski, Camus, DeSade, T.S. Eliot, Elie Wiesel.

240 PHILOSOPHY OF LAW S Mr. Kipnis

Survey of some main philosophical theories about the nature and justification of law, with intensive examination of several key philosophical problems as they arise in workings of the American legal system. Readings drawn from law and philosophy.

250 PHILOSOPHY OF RELIGION

Relationships between religious conviction and reason through a close look at the nature of religious experience; the role of tradition, ritual, and myth; and the specific ways in which philosophy adds to or challenges religious life. Readings from classical and contemporary works. (Not offered in 1978-79.)

260 ESTHETICS: REFLECTIONS ON ART

Understanding the creative process, the nature of art works and appreciation, and the foundations of esthetic criticism. Critical examination of the theory that art expresses emotion. Discussion based on contemporary writings and student involvement in creating and perceiving art. (Not offered in 1978-79.)

310 MODERN ENGLISH PHILOSOPHY W

Movements in England since 1900. Current topics in philosophy of mind, ethics, epistemology, and metaphysics discussed in relation to their treatment by Russell, Moore, Wittgenstein, Ryle, Austin, and Strawson. Prerequisite: Philosophy 212 or permission of instructor. (In alternate years.)

320 PHENOMENOLOGY AND EXISTENTIALISM

20th century Continental philosophers and the primacy of "lived existence" for reflecting on decision, suffering, absurdity, estrangement, and intimacy. Readings in Kierkegaard, Nietzsche, Husserl, Heidegger, Sartre, Camus, Jaspers, and Merleau-Ponty. Prerequisite: 115, 211, 212, or 213 (preferably 213). (Not offered in 1978-79.)

380 DIALOGUE

Traditional and non-traditional philosophic areas not covered elsewhere in the curriculum. Prerequisite: one philosophy course or consent of the instructor. (Not offered in 1978-79.)

480 SYMPOSIUM

Seminar primarily for junior and senior majors, though open to non-majors with the instructor's permission. Special topic chosen for each year after consultation with majors. (Not offered in 1978-79.)

PHYSICS

Professor Bailey Donnally: Atomic Structure. Atomic Collision. Electronics. Photography.
Professor Roger Faber: History and Philosophy of Science. Chemical Physics.
Professor Tung H. Jeong (Chairman): Coherent Optics. Holography. Laser Applications.
Assistant Professor Michael Davis: Computer Physics. Micro-processors. Acoustics.

Physics is an important part of the total of modern man's knowledge. Study provides insight into this role of physics in the continuing development of our culture with respect to both the external environment of man and the development of contemporary thought.

Physics 120, 121 and 122 are the introductory sequence which should be taken by those students majoring in the physical sciences and by those students who desire a more detailed quantitative study of physical principles and phenomena.

Courses numbered 104 through 109 and 200 are topical courses designed for students not majoring in the sciences who want to explore physical principles on a less detailed level and with some attention to the relation of physics to other human endeavors.

The major includes 120, 121, 122 and 210. Courses numbered from 104 through 109 and 200 will not normally count toward the major requirements in physics, but in special cases, such as a late decision to major in physics, exceptions may be made to this rule by the department chairperson.

104 SPACE, TIME, AND MOTION F
Mr. Faber

The revolutionary views of the world put forth by Galileo, Newton, and Einstein. Four hours of lectures, one lab per week.

106 LIGHT, SOUND, AND THE WORLD OF WAVES S Mr. Jeong

Behavior of waves, including water, sound, and radio waves, and light. Optics of lenses and mirrors. Musical instruments. Four lectures per week; lab.

107 CHANCE, FATE AND PHYSICAL LAW W Mr. Faber

The Uncertainty Principle and its application to the physics of atoms, nuclei, and particles. Early in this century, Newton's clockwork model of the universe was replaced by Heisenberg's famous Principle, which established chance at the foundations of the material world. This upheaval in physics will be studied in historical perspective, with attention to its implications in other fields of thought. No laboratory.

108 THE ENERGY CRISIS

How can the world's growing demand for energy be satisfied? Merits of present and proposed energy conversion methods: Problems with regard to environmental degradation, distribution, storage, cost, availability. No lab. (Not offered in 1978-79.)

109 ASTRONOMY AND COSMOLOGY S
Mr. Faber

The solar system and planetary motion, the nature and evolution of stars, star clusters, and galaxies; and the structure and origin of the universe. Four meetings per week; observations as weather permits.

120 GENERAL PHYSICS F Mr. Jeong, Staff

Newton's laws of motion, conservation of energy and momentum. Types of motion treated include: translation, rotation, oscillation. Traveling and standing waves in strings, rods, springs, and pipes. Four lectures, one lab per week. Prerequisite or corequisite: Mathematics 110.

121 GENERAL PHYSICS W Mr. Jeong

Temperature and heat measurement, the ideal gas laws, laws of thermodynamics, kinetic theory, heat engines. Geometrical optics of mirrors and lenses. Optical instruments. Interference and diffraction of light. Daily lectures; lab. Prerequisite: Mathematics 110, Physics 120.

122 GENERAL PHYSICS S
Mr. Davis, Mr. Jeong, Staff

Electric and magnetic fields. Circuit elements in both DC and AC circuits. Electromagnetic waves. Length, time, and mass transformations. Relativistic energy. Four lectures, one lab per week. Prerequisite: Mathematics 110 and Physics 120.

200 THE PHYSICS AND THE ART OF PHOTOGRAPHY W Mr. Donnally

Creative use of the photographic medium along with study of appropriate scientific principles and aesthetic values. Works of influential photographers and important photographic themes will be analyzed. (Also listed as Studio Art 240.)

205 COMPUTER-CONTROLLED EXPERIMENTATION S Mr. Davis

The basic components of a simple computer and how they work together. Programming a computer in machine language. Methods of interfacing a computer to the "real world". Real-time applications in the laboratory. Three lectures and two laboratory sessions per week. Prerequisites: Physics 122 or Chemistry 112, Mathematics 170.

210 ATOMIC AND NUCLEAR PHYSICS F
Mr. Jeong

The structure of atoms and nuclei from the viewpoint of theory and experiment, including an introduction to the quantum theory. Nuclear reactions and models of the nucleus. Elementary particles. Four lectures, one lab per week. Prerequisites: Physics 121 and 122 and Mathematics 110.

230 THERMODYNAMICS W Mr. Davis

Fundamental ideas of temperature, heat, equilibrium, and entropy. Primarily macroscopic, but with some emphasis on the microscopic; statistical basis of thermodynamics. Prerequisites: Physics 121 and Mathematics 111.

240 ELECTRONICS F Mr. Donnally

Transistors, diodes, and their application in electronic circuits. Amplifiers, oscillators, logic circuits, computing circuits. Electronic instruments and measurements. Four lectures per week; lab. Prerequisite: Physics 122.

250 ANALYTICAL MECHANICS

Mathematical physics in the field of mechanics. Mechanics of single particles, systems of particles, rigid bodies, vibrations and wave motion. Prerequisites: Mathematics 110, 111 and Physics 120. (Not offered in 1978-79.)

310, 311 ELECTRICITY AND MAGNETISM

Electrostatics and solutions of electrostatic problems. Microscopic theory of dielectrics. Magnetic field of a steady current and the microscopic theory of magnetic properties of matter; Maxwell's equations; radiative phenomena; electrodynamics and elements of modern optics. Four lectures, one lab per week. Prerequisite: Physics 210. (Not offered in 1978-79.)

350 MODERN OPTICS

A study of physical optics including topics in interference, diffraction, scattering, polarization, absorption, lasers, and applications. Four lectures, one lab per week. Prerequisite: Physics 122. (Not offered in 1978-79.)

410 ADVANCED ANALYTICAL MECHANICS

Emphasis on generalized coordinates. Newtonian, Lagrangian, and Hamilton-Jacoby theories in mechanics. Prerequisites: Physics 250 and Mathematics 210. (In alternate years. Not offered in 1978-79.)

420, 421 QUANTUM MECHANICS FS

Formal, deductive approach to the quantum theory, with applications to atoms, molecules, and solids. Five classes per week for 420. Four classes, one lab per week for 421. Prerequisites: Physics 210 (or permission of instructor) and Mathematics 210.

POLITICS

Associate Professor Charles A. Miller (Chairperson): American Constitutional Law. Civil Liberties.
Associate Professor Jonathan F. Galloway: International Relations. Political Economy.
*Associate Professor Christopher C. Mojekwu: Non-Western Politics. African Studies. Legal Process.
Associate Professor Paul B. Fischer: Local and Regional Studies. Urban and Suburban Politics.
Assistant Professor Joseph H. Carens: Political Theory. American Politics. Public Administration.
Assistant Professor Nancy J. Fairley: African Studies.
Assistant Professor Peggy Heilig: American Politics. Politics of Welfare.
Assistant Professor W. Rand Smith: Comparative Politics. American Politics. Political Economy.

The study of politics is an attempt to make sense of and impose order on the phenomena of human governance. It has to do with power and authority, legislatures and courts, war and peace, ideologies and the public welfare. Politics can be studied through the history of peasant revolts and presidential resignations; through the discussion of justice and equality, constitutionalism and political modernization; through research by microfilm and interview; through the techniques of statistics and simulation; and through the experience of living abroad or working as an intern in a government agency.

The courses in the Politics Department are designed to permit both majors and non-majors to study these themes and methods of politics. The major in the Department consists of a minimum of eight courses: two introductory courses (110 and 120) and six advanced courses, including at least one from each of the five subfields of politics, and from these courses: American Politics (220, 221, 222, 223), Public Law (360, 365), Comparative Politics (210, 211, 212, 214, 313), International Relations (240, 340), and Political Theory (250, 350, 357, 358). The Department encourages individual study in politics beyond the required courses. This study may take the form of tutorials, independent research, internships, or a senior thesis.

*Leave of Absence, 1978-79.

Note on Politics 110 and 120: These two courses are designed for freshmen and sophomores. Juniors and seniors interested in a first politics course should consult departmental faculty for advice. The two courses are independent of each other and may be taken in either order. Politics 110 excludes American politics; Politics 120 is about American politics only. Therefore 110 is the normal prerequisite for further courses outside American politics and 120 is the normal prerequisite for further courses in American politics. The prerequisites may be waived with the permission of the instructor.

110 INTRODUCTION TO POLITICS: THEORY, COMPARATIVE, INTERNATIONAL FWS
Mr. Galloway, Mr. C. Miller, Mr. R. W. Smith

Basic concepts in political science; selected governments other than the United States; analysis of current political problems; some reading in political theory and political novels.

120 AMERICAN POLITICAL INSTITUTIONS FWS
Mr. Carens, Mr. W. R. Smith, Ms. Heilig

Introduction to American politics including origins of the system, basic institutions, political parties and interest groups; evolution of constitutional interpretation.

210 COMPARATIVE EUROPEAN CONSTITUTIONAL SYSTEMS S
Mr. W. R. Smith

A comparative study of the government and politics of Great Britain, France and the Federal Republic of Germany.

211 COMPARATIVE COMMUNIST SYSTEMS F Mr. W. R. Smith

Political systems of the Soviet Union, Eastern Europe, and China, in comparative perspective and with particular emphasis on ideology, political institutions, the Communist Party, and leadership.

212 NON-WESTERN POLITICS W
Ms. Fairley, Mr. R. W. Smith

Special topics relating to Third World Nations in Africa and Asia, e.g., industrialization and ecology; power and authority in non-industrial society and culture. (Not offered in 1978-79.)

213 INTRODUCTION TO AFRICAN POLITICS AND SOCIETY F
Ms. Fairley

An integrated and interdisciplinary course in the politics and history of African peoples; survey of the geography, the prehistory and cultures of Africa; dynamics of the politics and history of medieval and precolonial Africa. Prerequisite for Politics 313 and 413, and for term abroad in Africa and for major in Area Studies — Africa.

214 GOVERNMENT AND POLITICS OF LATIN AMERICA

Political systems of contemporary Latin America with emphasis on selected countries for in-depth study. (Not offered in 1978-79.)

215 INTRODUCTION TO JAPAN

Social and political aspects of Japan through social science literature and first-hand exposure to Japanese culture. The class will simulate Japanese social organization as much as is practical. Prerequisite: Politics 110 or Sociology and Anthropology 110 or consent of instructor. (Not offered in 1978-79.)

220 POLITICAL PARTIES S Ms. Heilig

American parties, pressure groups, and electoral problems.

221 THE PRESIDENCY S Ms. Heilig

An analysis of the executive in national government.

222 CONGRESS F Ms. Heilig

Organization and roles of Congress, with some examination of other legislative bodies.

223 LOCAL POLITICS AND ADMINISTRATION F Mr. Fischer

Problems of political and social organization in Central Cities.

230 PSYCHOPOLITICS W Mr. Galloway

The study of psychological dimensions in politics, e.g., the psychopathology of leaders (Woodrow Wilson, Richard Nixon), charisma (Castro), revolutionary leadership and mass mobilization (Mao), and personality traits of selected political philosophers (Rousseau and J. S. Mill). Prerequisites: Politics 110 or 120; or sophomore standing; or consent of instructor.

240 AMERICAN FOREIGN POLICY S
Mr. Galloway

The roles of culture, history, the separation of powers, and various elites and interest groups in influencing foreign policy; problems of morality, rationality, and the national interest; chronological survey of various issue areas since World War II.

241 THE VIETNAM WAR

Vietnam's domination by China, France, and the United States. Analysis of the "final" Vietnam war from the perspectives of the United States and Vietnam. Prerequisites: Politics 110 or 120; or sophomore standing; or consent of instructor. (Not offered in 1978-79.)

250 INTRODUCTION TO POLITICAL THEORY S Mr. Carens

Discussion of conflicting views on topics such as civil disobedience, black power, feminism, abortion, income distribution, "victimless crimes," censorship, political ethics, and revolutionary violence. Seminar-discussion format. No prerequisites.

260 THE LEGAL PROCESS

An introduction to the functions of the legal system in the United States. Prerequisite: Sophomore standing. (Not offered in 1978-79.)

290, 291 TUTORIAL

To be arranged individually with an appropriate faculty member.

312 TOPICS IN COMPARATIVE POLITICS W Mr. W. R. Smith

The 1978-79 topic is social class and class conflicts in advanced capitalist societies. The course will examine work and alienation, class consciousness, inequality, the state in capitalist society, and Marx's theory of class polarization.

313 GOVERNMENT AND POLITICS OF SUBSAHARAN AFRICA S Ms. Fairley

The emergency of the new states of sub-Saharan Africa from colonial status; the problems these states face in the operation of modern government and in nation-building. Prerequisite: Politics 213 or permission of instructor.

320 PUBLIC ADMINISTRATION S
Mr. Carens

A study of the role of bureaucracy in political systems. Topics include the responsiveness of bureaucracy to political leadership, governmental ethics, the relation of bureaucracy to democracy, and studies from other nations.

321 PUBLIC POLICY ANALYSIS S
Mr. W. R. Smith

Theories of public policy analysis and several policy areas, such as education, race, housing, transportation. The topic for 1978-79 is energy.

322 PROBLEMS IN AMERICAN POLITICS W Ms. Heilig

The topic for 1978-79 is the American Welfare System. Federal Programs of assistance to the poor since the 1930's; cultural and political values and goals in welfare; some comparison with European policies.

323 REGIONAL POLITICAL BEHAVIOR

The focus is the metropolitan area rather than local communities. Topics include metropolitan reform, city-suburban conflict, and certain metropolitan-wide policy controversies like social integration, equitable taxation, and regional transportation. (Not offered in 1978-79.)

340 WORLD POLITICS F Mr. Galloway

Continuity and change in international relations; consideration of the causes of war and the conditions of peace.

345 TOPICS IN INTERNATIONAL RELATIONS W Mr. Galloway

The topic for 1978-79 is legal and political regimes for outer space and the oceans.

353 TOPICS IN POLITICAL THEORY

Special studies on topics such as democratic theory, John Rawls's theory of justice, capitalism and social change, conservative political thought in America. (Not offered in 1978-79.)

357 POLITICAL THOUGHT: PLATO TO MACHIAVELLI W Mr. Carens

Selected political philosophers from the Greeks through the renaissance.

358 POLITICAL THOUGHT: HOBBES TO THE PRESENT F Mr. Carens

Selected political philosophers from the 17th century to the present.

360 AMERICAN CONSTITUTIONAL LAW S
Mr. C. Miller

A study through Supreme Court cases of major

themes in American constitutional law from 1789 to the present.

365 CIVIL LIBERTIES F Mr. C. Miller

Problems in civil liberties and civil rights relating law to politics, society, and cultures; U.S. court cases, selected classical theorists, materials from other countries.

380 JUNIOR SEMINAR

390, 391 INDEPENDENT RESEARCH

To be arranged individually with an appropriate faculty member.

413 SEMINAR ON MODERN AFRICA

Interdisciplinary seminar examining major social, economic, and political problems confronting contemporary African states. Prerequisite: Politics 313 or permission of instructor. (Not offered in 1978-79.)

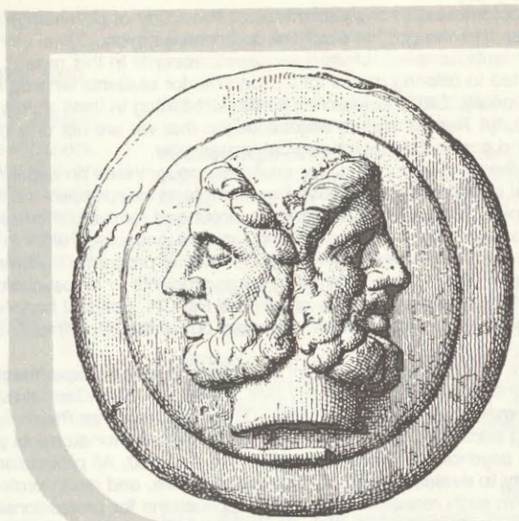
480 SENIOR SEMINAR S Mr. Galloway

490, 491 SENIOR THESIS

To be arranged inidividually with a faculty supervisor.

INTERNSHIP IN POLITICS W Mr. Fisher

Relates theory to practice by placing students in governmental agencies, community interest groups, and other political environments. For more details, see Lake Forest College internship brochure. (2 course equivalents.)



PSYCHOLOGY

Professor Ronald H. Forgus: Personality. Cognition-perception. Motivation. Clinical psychology and therapy.
Professor David L. Krantz: History and systems of psychology. Theories of madness. Social psychology of science.
Associate Professor Charles F. Behling (Chairperson): Personality. Counseling and clinical. Social psychology. Interpersonal and Mass Communication.
Associate Professor Phylis M. Frankel: Counseling and clinical. Educational psychology. Diagnostic assessment. Child development.
Associate Professor Robert B. Glassman: Brain function. Aggression. Learning and instinct. Animal behavior. Philosophy of science.
Assistant Professor Claire F. Michaels: Perception. Experimental psychology. Information processing. Psycholinguistics.
Assistant Professor Stephanie Riger: Community psychology. Psychology of women. Organizational psychology.
Assistant Professor Kathryn D. Rindskopf: Life-span development. Individual and group differences. Human sexuality. Moral development.
Instructor Theodore Groves: Social and Environmental Psychology. Experimental Methodology. Statistics.

Psychology is a science, and an idealistic one. It takes as its goal not only technological discoveries about behavior, but also the expression of new conceptions of what it means to be human. In the words of George A. Miller, former president of the American Psychological Association: "I believe that the real impact of psychology will be felt . . . through a new and different public conception of what is humanly possible and what is humanly desirable. I believe that any broad and successful application of psychological knowledge to human problems will necessarily entail a change in our conception of ourselves and of how we live and love and work together."

The program of the Lake Forest College Psychology Department focuses on the scientific study of behavior. It is the goal of the department to use this study not only to develop the intellect of its students and faculty, but also to develop their sensitivity and wise responsiveness to human problems. The faculty sees psychology as an empirical approach which is to be used toward the understanding of the tasks of life.

The department strongly emphasizes the study of psychology as preparation for those persons who plan to enter graduate school, to become psychological workers, or to join related professions. Our students have established successful records in this regard. The department is equally committed to offering meaningful programs for students who do not intend to utilize psychology professionally. Study is intended to have meaning in itself at this moment in the lives of students and faculty. The curriculum acknowledges that we are not only preparing for future activities, we are living and confronting psychological issues now.

With these goals in mind, the program concentrates on experimental and theoretical courses, practical experience, and heavy involvement in independent study. Close faculty-student contact is maintained. The ability of students to direct and motivate themselves is respected. We believe that students learn best by actively doing, and we encourage work in actual research and service settings. To this end we have available special programs in community, child, family and mental health specialities. This training prepares students to be psychological workers upon graduating.

The department sponsors a chapter of Psi Chi, national honorary society of psychology. The Psychological Services Center, operated out of the department, is a part of our involvement in the total life of the campus.

Majors can specialize in any of the following areas: Experimental (Ms. Michaels, advisor); Social (Mr. Krantz, advisor); Community (Ms. Riger, advisor); Clinical (Mr. Forgus, advisor); Child Development (Ms. Frankel, advisor). The major requires Psychology 220, 310 and 320. The following additional courses are strongly suggested for students planning to undertake graduate study in psychology: Psychology 370, 410 and 420. All professional activity in psychology requires the ability to evaluate original research literature, and much professional activity requires the ability to perform such research. Therefore, applications for professional work or graduate study are ordinarily rejected without study equivalent to Psychology 420.

Psychology majors may, by taking the appropriate courses, prepare themselves for careers as mental health workers, especially in the areas of counseling and psychotherapy, community psychology, and special education. The department will advise interested students about the courses leading to such career specialization.

All courses at the 100-level are open without prerequisites. Psychology 110 is designed as a general overview of the various concerns of psychology. Other 100-level courses are topical introductions to the field; i.e., they introduce psychological principles and methods as applied to specific issues. At least one course from the 100-level sequence is prerequisite to all other courses in the department.

110 SURVEY OF PSYCHOLOGY FS
Mr. Behling, Mr. Forgus, Mr. Krantz, Mr. Groves, Ms. Michaels, Ms. Rindskopf

A review of contemporary psychology, including considerations of learning, perception, motivation, emotion, development, personality, and social interaction.

111 WRITING ON SPECIAL TOPICS: PSYCHOLOGY, FROM COMMON SENSE TO SCIENCE? S
Ms. Rindskopf

An introduction to scientific and analytical approaches to human behavior, designed to help students to understand basic issues in the field of psychology and also to write about them and discuss them with precision and clarity.

114 ENVIRONMENTAL PSYCHOLOGY W
Mr. Groves, Ms. Riger

The relationship between the physical setting and human behavior; the need for privacy and "personal space", the effects of overcrowding, the psychological effects of modern architecture, the impact of the urban setting.

115 TOPICAL INTRODUCTION: HOW TO BE SANE IN A CRAZY WORLD W
Mr. Krantz

"Everybody is crazy except you and me, and sometimes I worry about you." So goes the argument of some recent critics, like R.D. Laing, of contemporary views of sanity. How plausible are the differing positions about sanity? What implications do these views have for successful living in the world? These two questions provide the focus for class lectures and discussions.

117 SOCIAL PSYCHOLOGY OF OPPRESSION Mr. Groves

Sociopsychological consequences of prejudice upon minorities, i.e., women, blacks and religious groups. How does oppression affect intelligence, achievement, attitude, personality and emotional characteristics? What are the societal conditions which breed prejudice and oppression?

118 SOCIAL PSYCHOLOGY, MOVIES, AND MASS COMMUNICATIONS S
Mr. Behling

Influence of movies, television, newspapers, and other organs of mass communications on the attitudes and personalities of their audiences; basic perceptual principles as means of understanding the emotional impact of movies and TV; analysis of psychological themes in movies.

119 PSYCHOLOGY OF AGGRESSION W
Staff

The problem of aggression, including consideration of aggressive behaviors in animals, human evolution, social psychology, learning and psychopathology. Is aggression a human instinct? Is it rational or irrational?

120 TOPICAL INTRODUCTION: THERAPEUTIC APPROACHES TO LOVE AND LONELINESS W Staff

An introduction to humanistic psychology and existential issues. Study will focus on the nature of love and loneliness in the struggle to encounter others authentically. The ramifications of authenticity, including joy and conflict, are explored. Theories and techniques related to interaction styles and communication processes will be examined in the context of enhancing personal relationships. Emphasis will be upon creating greater intimacy and growthful relationships.

210 PERSONALITY DEVELOPMENT: CHILDHOOD AND ADOLESCENCE FWS
Mr. Behling, Mr. Forgus, Mr. Groves, Ms. Rindskopf

The development of personality from conception through adolescence, with emphasis on the adaptive personality and on social issues associated with growth. Consideration of the interactions of cognitive, social, and physical processes in personality development. With special application to the psychology of oppression, prejudice, and racism.

211 ADULTHOOD AND AGING W
Ms. Rindskopf

Examination of developmental processes associated with maturity and old age. Change, crises, and continued growth are assumed to be integral aspects of development during these time periods. Personality development will be approached in a holistic fashion, with attention given to physical and intellectual functioning.

212 PSYCHOLOGY AND ETHICS IN DIALOGUE S Mr. Bartlett, Mr. Behling

Relationships of the individual to society examined from the viewpoints of Psychology and Ethics. Taught by members of the Psychology and Religion Departments. (Also listed as Religion 212.)

220 CONCEPTUAL AND QUANTITATIVE FOUNDATIONS OF PSYCHOLOGY FS Mr. Krantz

Examination of assumptions underlying psychological theorizing, research, methodology, and quantification. Application of research techniques and conceptual measurement.

230 PSYCHOLOGY OF SEX DIFFERENCES F Ms. Riger

Sex differences, real and imagined, from a biological, psychological, organizational, and cultural-historical perspective.

240 ORGANIZATIONAL AND INDUSTRIAL PSYCHOLOGY W Ms. Riger

The human side of management; why people work; increasing worker's motivation; enhancing the productivity of work groups; interpersonal relations in work settings; effective leadership in organizations.

260 SOCIAL BEHAVIOR: INDIVIDUAL PROCESSES F Mr. Groves, Staff

The individual in society: the social psychology of communications, the study of the formation and alteration of social perceptions and attitudes.

310 BASIC PROCESSES: PERCEPTION FS Ms. Michaels

Covers visual and auditory perception from several perspectives. Analysis includes anatomy and physiology, information processing approaches, speech production and perception, and the theoretical and metatheoretical underpinnings of research. Prerequisite: Psychology 220 or permission of instructor.

318 PSYCHOLOGY APPLIED TO EDUCATION W Ms. Frankel

Principles of psychology as applied to the learning process, learning situation, learner and teacher. (Also listed as Education 310.) Open to

underclassmen, but preference given to juniors and seniors. Prerequisite: Psychology 210 or permission of instructor.

320 BASIC PROCESSES: LEARNING WS
Ms. Michaels

The experimental study of learning and its relation to motivation and perception. Comparison of learned and instinctual processes in humans and animals. Behaviorist, cognitive, and ethological approaches. Prerequisite: Psychology 220 or permission of instructor.

325 PSYCHOLOGY OF SELLERS AND CONSUMERS S Mr. Glassman

Academic writings on social psychology compared to practical writings on techniques of selling. Emphasis on class discussion; independent research project.

330 MOTIVATION F Mr. Forgus

Origin and arousal of motives in human personality, including coverage of human values, emotions, conflicts, and frustrations. Prerequisite: Psychology 210 or permission of instructor.

335 GROUP PROCESSES W Mr. Behling

Group processes as techniques by which individuals define themselves, develop, and find support. The method of study recognizes the class as a group, and experiential exercises are utilized.

340 BEHAVIOR AND LEARNING DISORDERS IN CHILDREN

A course dealing with specific problems occurring in early development — covering such areas as mental retardation, emotional disturbance, and learning disabilities. We will focus on special diagnostic problems and specific methods of treatment, including play therapy and classroom techniques for facilitating learning. Field experience will also be required. Prerequisite: Psychology 210 or permission of instructor. (Not offered in 1978-79.)

350 ABNORMAL PSYCHOLOGY F
Ms. Frankel

Origins, treatment, and case studies of common behavior disorders analyzed in the context of adaptive personality development. Prerequisite: Psychology 210 or permission of instructor.

360 DIAGNOSTIC TECHNIQUES OF PERSONALITY EVALUATION S
Ms. Frankel

Personality structure and dynamics through projective techniques and psychometric tests of intelligence. Supervised experience in administering, scoring, and interpreting. Emphasis on diagnostic procedures and appropriate recommendations for treatment. Psychology 210 or permission of instructor.

365 PSYCHOLOGY OF HUMAN SEXUAL BEHAVIOR F Ms. Rindskopf

Integration of available research and theory in psychological, biological, and social aspects of human sexual behavior. Topics include: the anatomy and physiology of sex and reproductive processes, psychosexual development, sexual identity and object choice, sexual relationships and transactions, sexual health, sexual therapies, sexual lifestyles, sexual issues and the law, social and personal sexual value systems.

370 PHYSIOLOGICAL PSYCHOLOGY F
Mr. Glassman

How the brain participates in psychological processes: perception, motivation, learning, movement, language, consciousness. Discussion of the action of drugs that affect awareness. Laboratory involves brain stimulation, recording, and ablation experiments in animals and demonstration of "biofeedback" in humans.

375 HUMAN PERSONALITY S Mr. Forgus

The organization of personality, studied in the context of adaptive behavior and cognitive functioning. Topics include: theories, structure, dynamics, development, assessment, disorders, adaptive behavior and effective personality change.

410 MODELS OF MAN W Mr. Krantz

Differing views of human nature presupposed by psychological theory; emphasizes machine, cognitive, irrational, and existential images. Historical, philosophical and psychological analysis; directions and growth of psychological thought. Prerequisite: Senior standing or permission of instructor.

420 DESIGN AND ANALYSIS OF EXPERIMENTS W Ms. Michaels

Experimental design, statistical inference, and quantitative methods, with emphasis on basic statistical concepts and computer applications.

Prerequisite: Psychology 220 or permission of instructor.

430 COMMUNITY PSYCHOLOGY S
Ms. Riger

Impact of the social and physical environment on the mental health of individuals; the effect of urban and rural settings on people; the theories and methods of changing communities to enhance psychological well-being; utopian communities; historical changes in approaches to social problems. Prerequisite: Psychology 220 or permission of instructor.

440 CLINICAL PSYCHOLOGY W
Mr. Forgus

The course is to help prepare the student to practice clinical psychology by providing intensive instruction and practicum experience in the diagnosis and remediation of individual, child, marriage, family and community problems. This includes psychotherapy. These clinical skills are practiced in the context of theories about the nature of persons, human satisfaction and values. Each student will have practicum experience with clients of his or her choice.

450 SEMINAR IN COGNITIVE PSYCHOLOGY

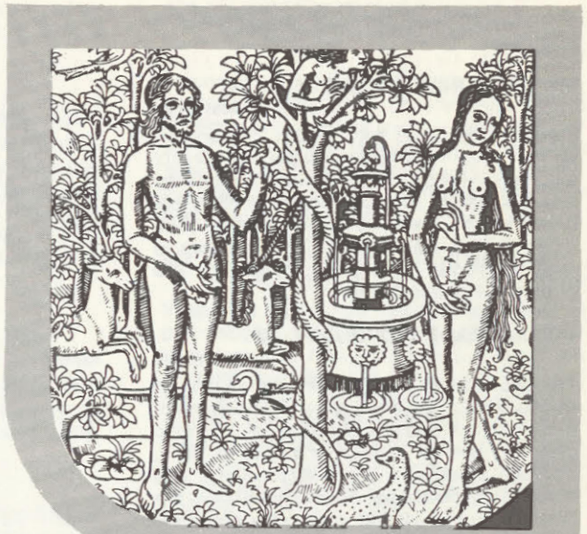
The light side of experimental epistemology. Content will vary. Examination and evaluation of current theory and research in perception, learning, and/or psycholinguistics. Prerequisites: Psychology 310 and 320 or permission of instructor. (Not offered in 1978-79.)

470 PRACTICUM: INTERPERSONAL PROCESSES W Ms. Riger

Supervised practice in applying psychological principles in research or service settings. Open to junior and senior psychology majors with permission of instructor. (Because the practicum experience varies, students may be permitted to repeat.)

485 SEMINAR: COMMUNICATIONS AND INFLUENCE

Recent research in the social psychology of interpersonal and mass communications, with emphasis on techniques of communication, empathy, and influence. (Not offered in 1978-79.)



RELIGION

Professor Donald Bartlett: History of Christianity. Contemporary Theology. Non-Western Religions. Philosophy of Religion.
Associate Professor Dan Cole (Chairperson): Biblical studies. Near Eastern archaeology. Classical Civilization.
‡Lecturer Ronald Miller: Christian and Jewish Studies. Philosophy of Religion.

Courses in the Department of Religion are intended to offer students some understanding of religious thought,art, and literature, to examine the interrelationships between religious expressions and the particular cultural matrix in which they have taken form, and to develop the appropriate tools of analysis for the study of religious literature and history. It is not the purpose of the department to indoctrinate or propagandize, but rather to help equip students to make sound judgments for themselves in an atmosphere of free and serious inquiry, with an academic concern for the application of scholarly methods and the results of modern scholarship.

Some students will be interested in undertaking more extensive work in the department, either because of the perspectives which religion offers for integrating the content of other disciplines or because of professional goals involving seminary or graduate studies in religion. These students are encouraged to consider a major in humanistic inquiry which would combine work in the Department of Religion with work in one or more other departments. (It should be noted that leading seminaries and graduate schools of religion recommend a broadly-based undergraduate preparation for their candidates, involving concentration in several areas of the humanities and social sciences as well as some foundation in the field of religion.) Members of the department will be glad to advise students with regard to appropriate patterns of course work to fit their interests or pre-professional needs.

Most courses in the department are open without prerequisite to any interested student.

‡Part-time Teaching, 1978-79.

200 PROBLEMS OF RELIGIOUS THOUGHT S Mr. Bartlett

Inquiry into the nature of religious concern, the needs and interests religion serves, the validity of religious attitudes. Readings from various sources, discussion and writing. Books used in 1977-78 included *Waiting for Godot, The Plague, Siddhartha, Varieties of Religious Experience, I and Thou,* and *Dynamics of Faith.*

201 BIBLICAL HERITAGE: MYTH, LEGEND AND HISTORY F Mr. Cole

The narrative sections of the Hebrew Bible and the New Testament, with particular attention to the content and themes most significant for later art, literature and religious thought. From the creation account and stories of Israel's patriarchs, kings and heroes to the gospel accounts of Jesus and visions of the final judgment, studied in relation to the history and literature of the ancient Near East.

202 BIBLICAL HERITAGE: LAW, PROPHETS AND TEACHINGS S Mr. Cole

The Biblical laws, books of the prophets, teachings of Jesus and letters of Paul, studied in relation to each other and in the light of the Near Eastern cultures and traditions out of which they emerged.

203 JESUS IN LEGEND AND HISTORY

Various portraits of Jesus, from New Testament gospels and non-canonical "gospels" through treatments in the art of Byzantine and later periods, to recent portrayals in literature, film and rock opera. Attention also to contemporary scholarly attempts to reconstruct the historical Jesus. (In alternate years. Not offered in 1978-79.)

206 READINGS IN INTERPRETATION OF RELIGION F Mr. Bartlett

An examination of various interpretations of religious writings. Readings from such thinkers as Otto, Eliade, James, Tillich and Dewey. Discussion of selections read, supplemented by students' papers on individually chosen topics.

207 READINGS IN CONTEMPORARY THEOLOGY W Mr. Bartlett

Principal developments in 20th century thought: Buber, Barth, Tillich, the Catholic renewal and theology of the secular.

208 THEOLOGICAL INVESTIGATIONS W Mr. Bartlett

Study of a man, school, or issue in theology or constructive religious thought, with emphasis on student participation.

209 ARCHAEOLOGY OF THE BIBLICAL WORLD S Mr. Cole

A survey of archaeological research in the Near East relating to biblical history, religion, and literature. Documentary discoveries, results of excavation at selected sites in Israel, Jordan and related regions. Attention to archaeological field methods and interpretive principles as applied to Near Eastern materials. Slide resources, field trips to museums, practical experience with pottery typological collections. (Also listed as Sociology/Anthropology 209.)

212 PSYCHOLOGY AND ETHICS IN DIALOGUE S Mr. Bartlett, Mr. Behling

Relationships of the individual to society examined from the viewpoints of psychology and ethics. Team-taught by members of the Psychology and Religion departments. (Also listed as Psychology 212.)

216 LIVING RELIGIONS: HINDUISM AND BUDDHISM

Introduction to religions which had their origin in India, with readings from their scriptures. (In alternate years. Not offered in 1978-79.)

217 LIVING RELIGIONS: CHINA AND THE MIDDLE EAST

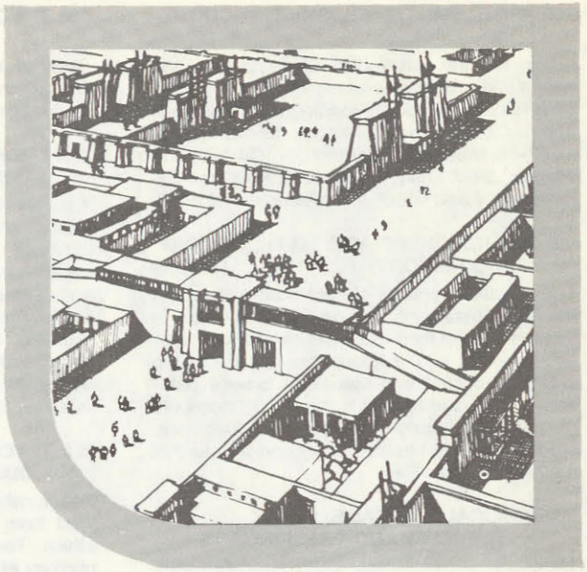
Introduction to religions of China, Japan and the Middle East; especially Confucianism, Taoism and Islam. Readings from the scriptures. (In alternate years. Not offered in 1978-79.)

218 LIVING RELIGIONS: JUDAISM S Mr. Miller

Introduction to Jewish thought, faith and practice, in both historical development and contemporary forms.

219 LIVING RELIGIONS: CHRISTIANITY F Mr. Bartlett

Introduction to Christian thought, faith, and practice, in historical development and contemporary forms. Readings from representative expressions.



SOCIOLOGY AND ANTHROPOLOGY

†Professor Leo F. Van Hoey (Chairperson): Comparative Social Inquiry. Demography, Organization and Transformation of Human Socio-Ecological Systems. Sub-Saharan Africa.
Assistant Professor Arlene Eskilson (Acting Chairperson): Cross-Cultural Sociology and Social Psychology, Methodology. Variations of Leadership, Educational Settings, Dilemnas in Sex Roles.
Assistant Professor Gregory Finnegan: Cultural Anthropology; theory, observation method, demographic film, economic and political anthropology, migration. Sub-Saharan Africa.
Assistant Professor Nancy J. Fairley: African Studies.
Assistant Professor Barbara Kalkas: Theory, Comparative Social Inquiry, Sociocultural Change, Modernization, Middle East, China.
Instructor Gene Muehlbauer: Anthropology and Sociology of complex societies, social inquality, criminology, social services, psychology, anthropology. Western Europe.

Social inquiry, the common discipline of comparative sociology and social anthropology, concentrates upon the cross-cultural exploration of similarities and differences among human ways of living in groups and communities. Central to this endeavor is the search for systematic explanations of diverse human modes of behavior in varying contexts of social organization and ecological setting.

Human Societies (SA 110) is a prerequisite for all other courses unless explicity stated otherwise. The major includes 110, 210, 310, 320 and 410; a selection of at least three other courses in the department; and a research paper to be completed as a group project in the methods courses. Majors planning for graduate training in this field are strongly advised to take statistics and/or computer courses through the Department of Mathematics. 310 and 320 are to be taken in the Junior year, and a grade of C or better is required to major.

†Sabbatical Leave of Absence, 1978-79.

The curriculum of the department is designed to combine flexibility and concentration. It consists of a series of core courses and an open range of electives. Students are encouraged to pursue personal exploratory interests through guided independent studies.

The core courses are offered in the Fall and Spring terms. They jointly cover the principal conceptual and technical tools of basic research in social science. The Winter term is entirely reserved for special topics, subjects of applied research, and short intensive projects, which may vary in content and format from year to year.

The department takes special interest in encouraging senior thesis work leading to the major degree with honors.

101 ETHNOGRAPHY F Ms. Fairley

Brief, intensive survey of the history of ethnographical field work; major questions guiding the exploration of ways of living in different societies in various parts of the world; introduction to the classics of social anthropology. Brief papers on studied case material.

105 YOUTH AND SOCIETY W
Mr. Muehlbauer

Youth, always partly based in biological maturation, varies in content and definition from culture to culture. The course follows research concerning the place and the role of youth in diverse cultural settings and under changing social conditions, with final emphasis on modern industrial society: the formation of peer groups, cultural and counter-cultural movement. No prerequisite.

107 ANTHROPOLOGY AND LITERATURE W Mr. Finnegan

Anthropology in fiction and through fiction. Focus on how anthropologists of the Western and non-Western world have described "alien" cultures and the interaction of such cultures with their own. No prerequisite.

110 HUMAN SOCIETIES FS Staff

Foundations of social inquiry; basic models of human societies; dimensions of social organization; elements of analysis and principles of theory construction in social science; selected domains of investigation and aspects of field work.

120 KINSHIP

Structures of kinship (relations, groups, roles, terms); forms of marriage, households, settlements. The context of kinship; transition in social organization; changing relations between kinship and economy, polity, habitat, and population. No prerequisite. (Not offered in 1978-79.)

150 ENVIRONMENT AND CULTURE S
Mr. Finnegan

The ecological problem from a **social** point of view: systemic relations between the organization of a given society, the size and distribution of population, the state of the technology, and the specific environment in which the society evolves. Comparative studies form the basis for the evaluation of current policy models (e.g. the green revolution idea.) No prerequisite.

160 SOCIAL PSYCHOLOGY W Ms. Eskilson

The relationship between symbolic activity (language) and social behavior; socialization and the development of self; conformity and deviance in human behavior; dynamic and structural aspects of interaction in small human groups. No prerequisite.

201 RACE, ETHNICITY, MINORITIES

Ethnicity in varying contexts of techno-economic and political structures; changing patterns of ethnicity, ethnic groups and communities in America. Prerequisite: Sociology and Anthropology 110. (Not offered in 1978-79.)

202 POWER AND SOCIETY

Social bases of political control and political participation; processes of social stratification (socioeconomic classes, minorities, ethnic communities). Group interests and the development of conflict. Student participation in SIMSOC (Simulated society) provides the vehicle for firsthand observation of power and conflict processes. Prerequisite: Sociology and Anthropology 110. (Not offered in 1978-79.)

205 LEISURE AND LIFE STYLES: T.V. IN AMERICA W Ms. Osako

Analysis of leisure, consumption and voluntary activities as aspects of modernization. Relations between work and leisure examined in cross-cultural perspective. Variations in life style as-

sociated with ethnic, class and sex differences. Prerequisite: Sociology and Anthropology 110.

206 VISUAL ANTHROPOLOGY W
Mr. Finnegan

Anthropological filming, an emerging field. Visual records as documentation in the context of written ethnography. Development of the field. Strengths and weaknesses of various techniques. Problems of rapport and ethics. Not a filmmaking course, although qualified students may produce film projects. Prerequisite: Sociology and Anthropology 110 or 120 or 181, or consent of the instructor.

207 SPORT AND SOCIETY

The examination of sports as **social** phenomena. Emphasis on the functions of various kinds of sport activity in connection with social class and ethnic category, with the maintenance of social boundaries for small groups and for entire nations, with the channeling of individual and group aggression, and with the propaganda devices for prestige hierarchies. Prerequisite: Sociology and Anthropology 110. (Not offered in 1978-79.)

209 ARCHEOLOGY OF THE BIBLICAL WORLD S Mr. Cole

A survey of archaeological research in the Near East relating to biblical history, religion, and literature. Documentary discoveries, results of excavation at selected sites in Palestine and related regions. Attention to archeological field methods and interpretive principles as applied to Near Eastern materials. Slide resources, field trips to museums, practical experience with pottery typological collections. (Also listed as Religion 209.)

210 PRINCIPLES OF SOCIAL ORGANIZATION S Ms. Eskilson

Basic dimensions of group structure: division of labor, authority structure, resource technology, ecological setting. Types of groups in different institutional areas. Group structure and scale of organization. Bureaucracy: theories and methods of investigation. Prerequisite: Sociology and Anthropology 110.

216 PEOPLES AND CULTURES OF MODERN AFRICA

Introduction to contemporary society (rural and urban) in Sub-Saharan Africa, drawing on materials from all major regions of the sub-continent. Particular emphasis: problems of rural development, rural-urban migration and local changes of political, economic and social life. Prerequisite: S&A 110. (Not offered in 1978-79.)

220 CRISES IN THE MIDDLE EAST S
Ms. Kalkas

An interdisciplinary survey of Middle Eastern culture and society designed to explain crises in the contemporary Middle East, including the rise and fall of nation states, inter-group conflict, urbanization, industrialization, population growth and changing life styles. Prerequisites: S/A 110.

230 SOCIOLOGY OF LIFE CYCLES F
Ms. Kalkas

Age groups and social structure in cross-cultural perspective; problems of changing roles of youth, the middle-aged and the elderly in traditional and in modern societies. Prerequisite: Sociology and Anthropology 110 or consent of the instructor.

240 DEVIANCE AND CRIME F
Mr. Muehlbauer

What social structural conditions would give rise to what forms and modes of behavior which are at variance with prevalent social practice? A close look at the relations between "blocked opportunity", poverty, etc. and collective responses from delinquency to organized crime, and the role of control agencies. Prerequisite: Sociology and Anthropology 110.

250 SOCIAL PROBLEMS F Ms. Kalkas

Social problems examined as costs and casulties of modernization; inter-societal comparison of deviant behavior, health conditions, inequality and discrimination. Prerequisite: Sociology and Anthropology 110.

260 POLITICAL ANTHROPOLOGY F
Mr. Finnegan

Analysis of political structure and processes of social control in varying types of traditional societies, including societies without formal political institutions. Examination of the evolution of the state, the social basis of political groups, and forms of parapolitical institutions, as a background for political theory. Prerequisite: Sociology and Anthropology 110 or consent of the instructor.

280 SOCIOLOGY OF SEX ROLES

Theories concerning the acquisition of sex-typed behavior; social and biological influences on the roles of males and females in the 20th century United States as well as in other cultures. Feminist and anti-feminist perspectives. Images of future lifestyles and implications for social policy. No prerequisite. (Not offered in 1978-79.)

290 EKISTICS (SCIENCE OF HUMAN SETTLEMENTS)

The structure and the evolution of the human habitat in relation to social organization: from the tent to megalopolis, from the teepee to the skyscraper. The discovery of architecture without professional architects, of landscaping without certified engineers, and of city building, without official planners, is apt to throw light on the problems and visions of architects, engineers and planners today. Prerequisite: Sociology and Anthropology 110, or consent of the instructor. (Not offered in 1978-79.)

310 SOCIAL RESEARCH: DESIGN F
Ms. Eskilson

Ethical (moral) and political (power) considerations regarding social research; logical links between theoretical perspectives, problem selection, and choice of empirical data; qualitative and quantitative aspects of research; and major forms of design; the research proposal. Recommended for sophomore or junior year. Prerequisite: Sociology and Anthropology 110.

320 SOCIAL RESEARCH: TECHNIQUES S
Ms. Eskilson

Means and styles of seeking relevant information; data in relation to research design; observation, content analysis, questionnaires, interviews, census material. Students formulate and carry through an agreed-upon research project. Prerequisite: 310.

330 URBANIZATION S Mr. Muehlbauer

Levels and rates of urban concentration in function of expanding scale of organization of society; relations between techno-economic system, demographic movement and differentiation of local and regional settlement patterns. Definitions of urban problems and models of planning policy. Prerequisite: Sociology and Anthropology 110.

340 DEMOGRAPHY: POPULATION DYNAMICS

Population size, socio-technical base, and environment; measurement of demographic change (fertility, mortality, migration) and demographic structure (age, sex, education, dependency, life expectancy). Determinants of demographic changes: economy, education, family planning, birth controls. Theories, models, and policies. Prerequisite: Sociology and Anthropology 110. (Not offered in 1978-79.)

350 PRE-INDUSTRIAL ECONOMICS

Analysis of the connection between economic and political systems in varying types of traditional societies; political power, division of labor and economic surplus; ecological bases of political and economic systems. Processes of socio-economic changes in the course of modernization. Prerequisite: Sociology and Anthropology 110. (Not offered in 1978-79.)

360 WOMEN'S ROLES IN CROSS-CULTURAL PERSPECTIVE

This course focuses upon women's roles in societies and in epochs other than our own. The cultural and biological roots of women's subordination will be examined as well as the sources and the social bases of women's power and influence. Prerequisite: SA 280, or Psychology 230, or Philosophy 200, or consent of the instructor. (Not offered in 1978-79.)

370 SOCIAL INEQUALITY

A comparative study of various forms of social inequality from non-human rank and pecking orders to complex social stratifications. Analysis of various dimensions of inequality (e.g. sex, age, education, competence, wealth, power) in different forms of social organization from small intimate groups to large scale social systems. Theoretical approaches concerning the emergence and persistence of hierarchies. Prerequisite: Sociology and Anthropology 110, or consent of the instructor. (Not offered in 1978-79.)

371 TECHNOLOGY AND HUMAN VALUES W Ms. Kalkas

Conditions and processes of industrialization in the Western world; problems related to economic development in underdeveloped nations; impact of industry on life-ways of modern man. Prerequisite: Sociology and Anthropology 110.

380 CULTURE AND PERSONALITY SEMINAR

Are such traits as aggressiveness or subservience, sobriety or greed, etc., constants of human nature or variants of culture? Such questions lead to research in national character and social types in different milieus under vary-

ing conditions. The course follows the development of this research in an effort to weight theory against evidence. Prerequisites: Sociology and Anthropology 110, and junior or senior standing, or consent of the instructor. (Not offered in 1978-79.)

410 SOCIAL EXPLANATION AND THEORY
S Mr. Finnegan

Exposition, comparison, and appraisal of major schools of thought in the history of social inquiry; heuristic orientations, contexts of explanation, and operational problems of systematic theory construction in social science. Faculty-Student Seminar. Prerequisites: Sociology and Anthropology 110 and 310.

420 SENIOR SEMINAR: APPLIED SOCIAL RESEARCH FS Staff

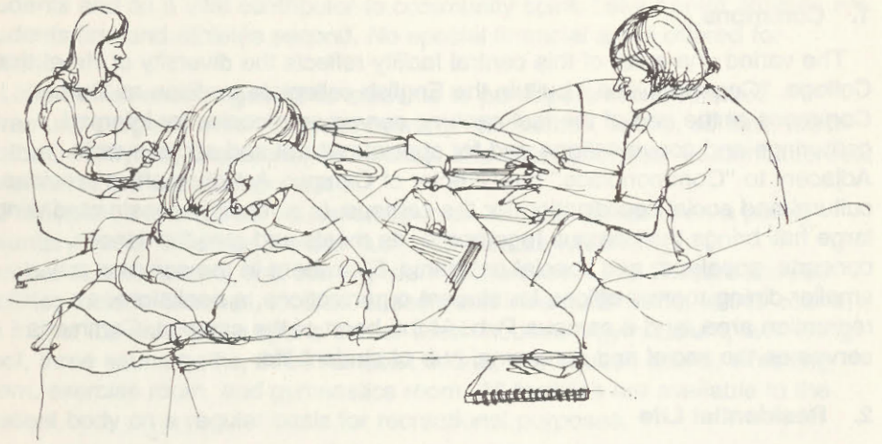
Supervised research in connection with senior papers (by arrangement and agreement between students and research advisors.)

451 INTERNSHIP

453 TUTORIAL

454 RESEARCH, INDEPENDENT STUDY

490 SENIOR THESIS



Student Life

Students in the Campus Community

The small campus environment is an integral part of the liberal arts college tradition. Students at Lake Forest in the late seventies reflect this special tradition both in the range of their activities and also in their participation in campus governance. Students are the primary catalysts at Lake Forest for the promotion and production of campus weekends, special social functions, films, concerts, lectures, and special service activities. The Director of Campus Activities works with student groups in planning and arranging for social and cultural affairs and in maintaining an all-campus calendar of events. Students participate on all academic committees, in the judicial system, and on the Board of Trustees and its relevant committees.

The design of the campus and its buildings encourages community life. In Commons students come together for meals, recreation, and special events — often to be joined by faculty. The residence halls provide students with opportunities to encounter others from different backgrounds and locales while developing individual life-styles. And as in all communities special services are needed — in this one these services have been designed to reflect Lake Forest's particular opportunities and needs. Thus, academic and personal guidance, health care, and cultural offerings are uniquely structured for Lake Forest students.

Student Life

1. Commons

The varied character of this central facility reflects the diversity of life at the College. "Commonplace," built in the English collegiate tradition as Durand Commons at the end of the last century, serves as a center for informal gatherings and conversations and for special cultural and social events. Adjacent to "Commonplace" the Director of Campus Activities office provides cultural and social coordination for the campus. In a recently constructed wing a large hall brings the campus together for its meals and also for dances, concerts, speakers, and special programs. Elsewhere in the complex are smaller dining rooms, offices for student organizations, a bookstore, a recreation area, and a campus Pub. At the heart of the campus, Commons serves as the social and communal hub of student life.

2. Residential Life

At Lake Forest the residential program is a complement to learning in other segments of the campus environment. Ten residence halls and residential clusters provide a range of living environments. The residence halls contain their own lounges, meeting rooms, study and special interest areas, intended to encourage both individual and interpersonal pursuits.

Freshmen may live with upperclassmen or other freshmen in single-sex or coed groupings.

Residence hall student staff and hall councils are selected in order to foster an environment which enhances learning, promotes personal growth and responsibility, and assists students in adjusting to the Lake Forest College community.

Upperclassmen may live off-campus upon approval from the Dean of Student Affairs Office, although housing in the area is limited. In addition, some upperclassmen are affiliated with housing units based on a common interest or purpose.

3. Athletics

Lake Forest College offers an athletic program designed to serve student needs and interests on four levels: varsity intercollegiate athletics, intramurals, physical education, and recreational activities.

The intercollegiate program for men and women includes varsity competition in baseball, basketball, football, field hockey, ice hockey, soccer, handball, swimming, wrestling, water polo, and tennis. Intercollegiate competition is provided in lacrosse, golf, cross-country and track on a club basis. The College is a member of the ten-team Midwest Collegiate Athletic Conference which includes institutions such as Carleton, Grinnell, Lawrence and Beloit. Intercollegiate competition is viewed as a valuable form of self-expression for students and as a vital contributor to community spirit. Lake Forest athletes are students first and athletes second. No special financial aid is offered for athletics.

Lake Forest encourages all its students to participate in a diversified intramural program which includes bowling, racquetball, tennis, softball, touch football, volleyball, basketball, ice hockey, and other activities. Student interest determines the activities provided.

Participation in physical education courses at Lake Forest is on a purely voluntary basis. Offerings include such activities as ice skating, aerobatics, slimnastics, and training-room techniques. Lake Forest's athletic facilities include baseball, football, soccer, and intramural fields; tennis courts; an indoor ice rink; and a sports center which houses a gymnasium, swimming pool, three sauna baths, three handball courts, two squash courts, wrestling room, exercise room, and gymnastics room. All facilities are available to the student body on a regular basis for recreational purposes.

4. Music

In addition to a variety of courses in applied music, theory, and music history, students may participate in the college choir or Madrigal Singers. Qualified musicians may join the Lake Forest Symphony Orchestra. Also, the opportunity exists for students interested in instrumental music to participate in small, informal ensembles. Students and faculty of the music department give recitals during the year and additional concerts are offered by professional musicians.

5. Theatre

Lake Forest students participate in an active campus theatre program, highlighted by a new theatre facility and professional direction. A variety of major and studio productions, open to all students, offer experience in all aspects of theatre; acting, directing, designing, costuming, lighting, stagecraft, promotions and playwriting. The season of productions is managed and staffed by the Garrick Players, an extra-curricular student organization with a campus and community history of excellence, reaching back to the last century.

The theatre program emphasizes practical experience under professional instruction and direction. Guest artists from the Chicago theatre community conduct workshops in such areas as mime, design, make-up, playwriting, audition, combat, improvisation and voice. Productions are directed by Chicago professionals, including an on-campus Director of Theatre. An assortment of credited courses is available. (See index.) These courses are performance oriented, employ professional guest instructors, are coordinated with the Garrick productions and offer opportunity for production credit. Students also enroll in

theatre courses in neighboring Barat College through cross-registration and participate in Barat's productions. In addition, Lake Forest sponsors internship opportunities in various Chicago theatres, offers occasional on-campus bookings of professional groups, as well as excursions into the profuse and exciting Chicago theatre scene.

6. Communications

THE STENTOR, the college newspaper, is the weekly journal of the students. The Campus Activities Office publishes a weekly CAMPUS CAPSULE which includes information on campus events and official College announcements. THE FORESTER, the college yearbook, is published annually. The fine arts magazine, TUSITALIA, includes writing, drawing, and photography by students and, occasionally, by members of the faculty. COLLAGES, the foreign language literary magazine, includes original prose and poetry in French, Spanish, and German by Lake Forest College students and faculty. Two well-equipped college darkrooms are used both by photographers working on student and college publications and by students who are just becoming acquainted with the art and practice of photography.

The campus FM radio station, WMXM, is operated by students and has a daily broadcasting schedule devoted to music, sports, campus news, and special programs.

Students interested in any phase of journalistic writing, editing, or reporting, or in photography, broadcasting, or art are encouraged to participate in these enterprises.

7. Community Service

The College offers several opportunities for community service. The Social Services Club provides information and activities related to courses, research and internships in the field.

Other programs developed over the last few years include a program to teach English to Spanish-speaking children (in Highland Park and Highwood), a high school program (in Waukegan), a project with children from a housing development (in Zion), and a project which brings Lake Forest College students into a school system as assistants to classroom teachers (also in Zion).

In working with pupils from various backgrounds, students have been able to develop a sensitivity to cultural and economic differences; at the same time, tutees have been given access to remedial education on a regular basis. Lake Forest College students also arrange field trips to both urban and rural areas.

8. Religious Activities

The College continues its traditional relationship with the Presbyterian Church. However, the College is not sectarian in its teaching and welcomes a

variety of philosophical and religious points of view. Major denominations are all represented on campus and Protestant, Catholic, and Jewish congregations are located nearby. A Coordinator of Inter-faith Ministry is available to assist all students, and the staff of local churches also counsel students on campus. Two groups, a campus Christian Fellowship organization and Am Yisrael Chai, provide programs of religious activities during the year. Inter-faith services and programs are held regularly in the recently rennovated Lily Reid Holt Chapel.

9. Specialized Interests

A variety of specialized groups are active on campus. Several disciplines provide cultural and social programming for their students through honorary societies. An active Outing Club provides many students with opportunities for sailing, back-packing, camping, and rock climbing on weekend trips.

10. Campus Events

The College sponsors a variety of cultural events on campus and also encourages students to take advantage of cultural opportunities in Chicago. At the Director of Campus Activities office in Commons, students may obtain information about music, art, and theatre in the city and suburbs. The office also offers a series of bus trips to a variety of major Chicago events ranging from Broadway musicals to national dance programs and professional sports. The Gallery in Donnelley Library is another continuing art resource.

A Friends of the Arts group solicits from community residents concert and other tickets which would not otherwise be available. As a result, many Lake Forest students are able to attend Chicago Symphony concerts and other events free of charge.

The Director of Campus Activities office is the planning center for on-campus events, lectures, exhibits, recitals, and other special events.

In addition, each year an Artist-In-Residence through the generosity of the Sonnenschein Endowment Fund is invited to the campus for an extended period of time to give poetry readings, to deliver public lectures, and to meet informally with students and faculty. Speakers representing varied interests and disciplines come to the campus throughout the year as guests of departments, as part of a series, or for short visits combining lectures with other meetings with students.

Developmental Services

A comprehensive guidance program recognizes the need for supportive counseling both in the regular course of a college education and also in the case of special, individual matters of concern. Thus, counseling takes place in a variety of settings, with more or less formality, and at the several stages of progress through a college career.

1. Residence Hall Staff

The Office of the Dean of Student Affairs selects several upperclass men and women to serve as advisers in the residence halls. In each residence hall student residence staffs — led by a Head Resident and supported by Resident Assistants — provide counseling, coordinate social programs, enforce residence hall regulations, and in general, strive to create an environment responsive to individual needs and conducive to study and growth.

2. Career Counseling and Placement

The Career Counseling and Placement office assists all students — at any point during the college years — in the development of their career objectives. Individual and group counseling sessions are available to help students make informed decisions about short and long term plans. Career information conferences are held throughout the year, bringing to campus professionals from various fields to talk about their work. Information is available in the CC&P office on a wide range of careers and internships. Students are encouraged to use the files of background material about specific companies and organizations. The placement process includes the development of a job strategy, interview training, facilitating contacts between students and alumni resource persons, and arranging for on or off campus interviews.

3. Counseling Center

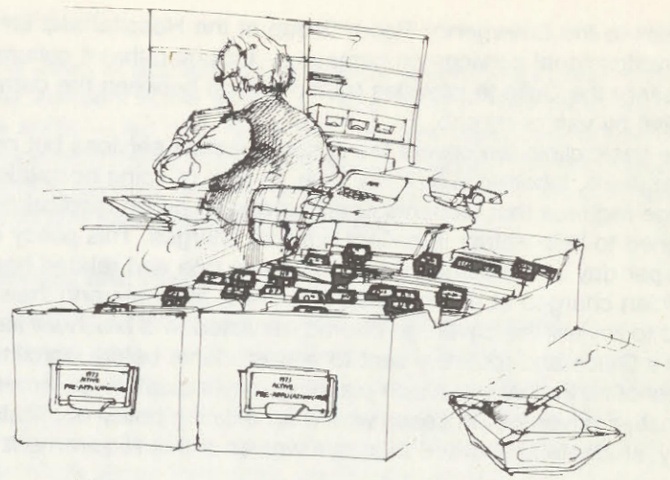
The purpose of the Counseling Center is to aid students to become more effective, self-directed individuals. It offers, free of charge to all Lake Forest College students, professional counseling on personal, educational, or career problems. Service is offered in dealing with emotional difficulties or factors hindering a student's ability to benefit fully from their college experience. In addition, it helps in identifying aptitudes, interests, and personality traits affecting the choice of a vocation or educational program. The Office is also committed to offering Human Potential and communications workshops to students who are seeking to enhance their own growth and development.

Health Services

The College's health care program is administered by the Lake Forest Hospital, under the supervision of the Dean of Student Affairs. Physicians' services are provided at the Hospital, 1½ miles west of the campus, by an Emergency Room Group which consists of fully licensed doctors offering around-the-clock coverage. These physicians treat students in the Hospital's out-patient clinic, following referral from the nurse on campus in other than emergency circumstances. The nurse is available at the clinic in the campus Sports Center from 8:00 a.m. to 4:00 p.m., Monday through Friday, for referral

of cases to the Emergency Room Group at the Hospital and for a wide range of para-professional services on campus — including throat cultures. Where necessary the College provides transportation between the campus and the Hospital by van or by cab.

The basic clinic fee covers the cost of medical services but not medication, prescriptions, laboratory or X-ray fees. In light of rising hospitalization costs, the College requires that students participate in its group medical plan, which is designed to help defray in-patient hospital charges. This policy covers up to $100 per day of the standard hospital room rate and related hospital and physician charges at nearby hospitals. Thus, students and their parents are urged to review the coverage offered, as listed in a brochure issued from the Dean's Office and routinely sent to new students before enrollment, detailing the benefits. Family insurance planning may indicate supplementary or alternative coverage. In cases where an existing policy duplicates the College's policy, students are invited to sign a waiver of this requirement.



Admissions, Financial Aid College Expenses

ADMISSIONS

During its selection process the Admissions Staff at the College is primarily concerned with knowing the individual candidate. The criteria for selection include assessment of a student's program of study, academic achievement, aptitude, intellectual curiosity, qualities of character and personality, and activities both within and out of school. Lake Forest College unequivocally selects its students without regard to social background, religious affiliation, race, national origin, sex, handicap, or financial position. And this policy is manifested by the diverse nature of the student community — a diversity so necessary to the educational vitality of a liberal arts college.

Admission Procedure

Candidates for admission may obtain the required application forms by writing the Office of Admissions, Lake Forest College, Lake Forest, Illinois 60045.

Students are urged to begin the application procedure early in their final year of secondary school. Non-traditional students are encouraged to consult with the Admissions Office. There is no formal closing deadline for receipt of the application. Admissions decisions are rendered in mid to late March for all freshman candidates whose applications are complete as of March 1. For applications received after March 1, decisions will be announced as the file becomes complete.

Students who also are candidates for financial aid should make certain to file the Lake Forest Application for Financial Assistance.

Lake Forest College subscribes to the Candidates Reply Date Agreement and all regular candidates for admission (i.e. those not applying under the Early Decision Plan) will have until May 1 to notify the College of their decision to accept or decline the College's offer of admission.

Secondary School Requirements

There are no formal course requirements for entrance to Lake Forest. However, it is strongly recommended that candidates present four years of English, at least three years of mathematics, three years of one foreign language, and one or two years of work both in history and the natural sciences. All applicants are encouraged to take as much accelerated course work as possible, including formal advanced placement offerings.

Examinations

All candidates are required to present the results of the Scholastic Aptitude Test (SAT) of the College Entrance Examination Board (CEEB) or of the American College Testing Program (ACT) test battery. These tests are used by Lake Forest College for purposes of admission, guidance, and placement. It is the applicant's responsibility to arrange with the College Entrance Examination Board or the American College Testing Program to have the test results forwarded to the College. These tests may be completed in the candidate's junior or senior year of secondary school.

The Admissions Staff may require a candidate to submit the results of one or more subject achievement tests of the CEEB where such scores are judged to be beneficial to a student's candidacy.

Personal Interview

Although an interview is not required, the Admissions Staff welcomes and encourages visits to the campus by prospective candidates and their parents. An appointment arranged in advance is appreciated. The Admissions Office is open for interviews and tours from 9 a.m. to 4:30 p.m. Monday through Friday during the calendar year, and Saturdays, 9 to 11:30 a.m. during the academic year. Telephone (312) 234-3100.

Early Decision

The purpose of the Early Decision Program is to allow a student who has determined that Lake Forest is his or her first choice to receive early notification of the admissions decision. Candidates requesting an early decision are permitted to apply to other colleges, but implicit in such a request is the

commitment to attend Lake Forest College if admitted. Upon notification of admission under this plan candidates will be expected to withdraw all other college applications and to post a $100 non-refundable tuition deposit within two weeks of notification of admission.

The Admissions staff will review the applications of Early Decision candidates as soon as all required materials have reached the Admissions Office. Candidates normally will be notified of the decision two or three weeks after completion of their application.

Early Decision candidates who will require financial assistance should make certain that the Lake Forest Application for Financial Assistance (LFAFA) is filed early in the candidate's final year of secondary school in order that both admissions and financial aid decisions may be rendered simultaneously.

Deferred Admission

Students who may wish to defer their enrollment in College should complete the application procedure during the final year in secondary school. Questions and specific requests for deferred admission should be addressed to the Director of Admissions.

Admission by Transfer

Students enrolled at other colleges and universities and desiring admission to Lake Forest College are eligible to apply for admission. Generally, a transfer applicant should have achieved an overall college average of at least "C" or its equivalent and be eligible to return to his or her previous institution. If a candidate is not eligible to return to the former college or university, at least six months must have elapsed before consideration will be given.

Graduates of accredited junior colleges and recipients of the AA degree in an applicable field, if admitted to Lake Forest College, will be granted full junior standing. (The only course evaluation to be considered will be that of determining those courses applicable to the student's declared major field.)

When a transfer student is admitted to the College from a four-year college or university or from a two-year institution but is not a recipient of an AA degree, all of the courses in an applicable field he or she has taken and passed toward fulfillment of the Bachelor of Arts degree at the former institution, or the Associate of Arts degree in the case of the junior college, will be accepted toward fulfillment of the B.A. degree at Lake Forest College provided a "C" average or better has been achieved at the previous institution.

Transfer students are admitted at the beginning of all terms, although most commence their study at the College in September. For further details concerning the College's credit and residence requirement, see the section Requirements for Graduation.

All candidates for admission on a transfer basis (anyone who has been

enrolled in another college or university) are required to submit the following credentials:

1) Application for admission
2) Secondary school transcript
3) Transcripts of all college work complete through the most recent term
4) A letter of recommendation from the academic dean or a teacher of the most recent college attended

FINANCIAL AID

Financial aid at Lake Forest College is not awarded as a "prize" but is granted to men and women who are unable to provide the full cost of a college education through their own reasonable efforts or through those of their family. Lake Forest is committed to the philosophy that insofar as resources are available, no student who is otherwise qualified should be prevented from attending because of financial limitations.

An application for financial aid does not hinder a student's application for admission; indeed, the two applications are considered separately. But a student is notified of the result of both the application for admission and for financial aid simultaneously.

The College is also committed to providing prospective students and their parents with **quick** access to **accurate** information concerning the amount of aid for which a student may qualify. To this end, the College has designed an institutional aid application, the Lake Forest Application for Financial Assistance. This form may be filed with the College **at any time** during the student's final year of secondary school. Students filing the LFAFA will be notified of their estimated financial need within two weeks of the College's receipt of the form. Obviously, no aid funds will be committed to a student until he or she has applied for and been granted admission. It is the College's hope, however, that the early and accurate guidance provided by the Lake Forest Application for Financial Assistance will be of help to those families who are concerned about meeting the costs of a Lake Forest College education.

Financial aid awards at Lake Forest are made for a one-year period. But if the student continues to evidence need and maintains an academic record commensurate with ability, the financial aid award will be renewed each year. Awards are always based on need.

Computation of Financial Need

In computing a student's financial need, the College calculates the total resources of the family (parents and student) that can be used as a contribution toward college expenses. Most calculations are based on several sources of funds:

•EXPECTATION FROM PARENTS: The College assumes that each family will provide the maximum amount possible from income, savings, and other assets. In addition to the family income and assets, the College takes into account the number of dependents, number of children in college, extraordinary medical expenses, certain types of debts, and unusual situations.

•EXPECTATIONS FROM THE APPLICANT: The College believes that recipients of financial aid should contribute toward the cost of their own education. In calculating a student's need, therefore, summer earnings available to be applied toward college expenses are normally assumed to be $500 prior to the freshman year with a slight increase in subsequent years.

•OUTSIDE FUNDS: Candidates for financial assistance are strongly encouraged to apply for national, state, and local scholarships for which they may be eligible and which may be used at the college of their choice — National Merit Scholarships, National Presbyterian College Scholarships, various state scholarships (e.g. Connecticut, Illinois, Massachusetts, New Jersey, Pennsylvania, Rhode Island, and Vermont), and other scholarships offered by local foundations, clubs, or business organizations.

The ability of a student to secure outside assistance almost always works to his or her benefit and never to his or her disadvantage. Even though the gift dollars from Lake Forest College may be reduced (all awards must remain within the computed need figure), the total amount of gift funds available to the student when all sources of gift aid are added together will be equal to or greater than the gift aid provided by Lake Forest College alone.

Gift Awards

Most students who qualify for financial aid can expect much of their need to be met by grants. For the 1978-79 academic year, the Board of Trustees authorized a total of $645,000 to be awarded in the form of Lake Forest College gift dollars.

Basic Education Opportunity Grant (BEOG)

Under this provison of The Higher Education Act of 1972, each student would be "entitled" to $1,600 a year in student aid, minus his or her "expected family contribution," which would be determined by, among other things, the "effective family income, the number of dependents in the family and the number of dependents attending a college or university, the amounts of the assets of the student and/or the family, and unusual expenses."

Supplemental Educational Opportunity Grants

This program is designed to provide grant assistance to students of exceptional financial need who, without such assistance and because they lack personal financial means, would be unable to enter or remain in an institution of higher education.

The maximum amount of a single-year grant is $1,500, but the cumulative amount a student can receive is limited to no more than $4,000 over a four-year period. The Commissioner of Higher Education will prescribe to institutions of higher education the basic criteria for identifying eligible recipients.

Students do not need to make direct application for SEOG consideration. The Director of Financial Aid at Lake Forest College will notify eligible recipients when grant funds have been appropriated and the Commissioner's guidelines received.

National Direct Student Loans

In 1958 Congress passed the National Defense Education Act which provides loan funds for needy undergraduate and graduate students. While the loan program will vary slightly from year to year, Lake Forest College does apply and has received funds which allow student participation in the National Direct Student Loan Program. Students receiving financial assistance and who have additional questions regarding this program should contact the Director of Financial Aid.

Guaranteed Student Loans

A state guaranteed loan program is available in all states. Participating banks and other financial institutions provide loans to full-time students; interest subsidies are made available to students who meet the need criteria established by the program. Information on this program can be obtained from your local banker, your high school counselor, or from the Office of Financial Aid at the College.

Part-Time Employment

In most cases, part-time employment on the campus or jobs established through the Federal Government's Work-Study Program range in remunerative value from $500 to $800. The majority of student jobs are in the dining hall, library, and various administrative offices. These jobs normally involve six to twelve hours per week. Students assigned campus employment are expected to work the entire term including examination periods.

In addition to on-campus employment, opportunities exist for employment in the community. Since Lake Forest is a residential and academic town (rather than commercial), off-campus employment generally involves jobs in local

restaurants, tutoring, secretarial duties, babysitting, general housework, gardening, and others.

COLLEGE EXPENSES

Students enrolling at the College in September are expected to continue through the academic year. The programs of the College are planned and budgeted accordingly.

Senior students with fewer than eight courses needed to graduate will be charged only for courses required.

For the convenience of the student, the College has established two pay periods. The first period covers expenses for the Fall term and the first half of the Winter term; the second pay period covers expenses for the second half of the Winter term and the Spring term. Refunds for tuition, room and board, and fees will not be granted after the stated withdrawal deadlines.

Course Overload Charge

An extra course taken during any pay period will be charged at the course fee.

Special Charges

When available a room used for double occupancy may be requested as a single for an additional charge of $250 per year. This is known as a differential single. A differential triple will require an additional charge of $125 per year per student.

If a student from Lake Forest College enrolls at Barat College in a course providing less than a full Lake Forest College credit, (e.g., dance) and where the additional hours earned in these courses when added to fractional credits remaining from other transferred courses will result in a credit, the student will be charged the proportional rate of the hours taken at Barat as an overload.

Reinstatement

A $25 reinstatement fee will be charged at time of re-registration should a student's registration have been cancelled by the College as a result of non-payment of bill.

Program Leave Reimbursement

Students who enroll in academic programs at other institutions as part of an official "Program Leave" will be reimbursed for actual tuition — not to exceed the comparable course cost at Lake Forest — upon acceptance of credit by the College. They will be required to make the regular payments on their account. (See page 16.)

Health Clinic and Hospitalization Fees

The $35 health clinic fee, which does not cover hospitalization insurance, is mandatory for all students. Hospitalization coverage is required of all resident students and is optional for non-resident students. The cost to the students for the 1977-78 year was $77. A waiver form for this coverage may be obtained from the Business Office if family coverage is carried. Waivers must be approved by the Business Office by October 1, 1978, for full cancellation and by March 1, 1979, for partial cancellation.

Fines and Damage

Students will be assessed library fines, for on-campus traffic violations, and for damage they may cause to college property.

Schedule of Payments For the 1978-79 Academic Year

		Resident	Non-Resident
1st Billing			
Tuition		$2132.50	$2132.50
Activity Fee		60.00	60.00
Room ($20.59 per wk. 34 wks.)		350.00	
Board ($26.62 per wk. 34 wks.)		452.50	
Clinic Fee		35.00	35.00
Hospitalization Insurance		77.00	Optional
Key Deposit		5.00	
	TOTAL:	$3112.00	$2227.50
1978-79 deposit		$ 100.00	$ 100.00
By September 5, 1978		3012.00	2127.50
	TOTAL:	3112.00	$2227.50
2nd Billing			
Tuition		$2132.50	$2132.50
Room		350.00	
Board		452.50	
By January 16, 1979	TOTAL:	$2935.00	$2132.50
TOTAL CHARGES:		$6047.00	$4360.00

The Board of Trustees has specified that **all** tuition and fees are due on the dates indicated above. Any other arrangements must be made prior to such

dates. The College reserves the right to evict students from residence halls and the dining hall, and to cancel registration unless the account is cleared. Past due accounts are subject to charges to one-half of one percent per month on the unpaid balance. Diplomas and transcripts are withheld from those who have not met their financial obligations to the College.

Three basic payment procedures are used:

- Standard Plan-Full payment by the dates shown above.
- Lake Forest College Prepayment Plan.
- Scheduled payments by use of an outside plan.

Billing Procedures For Partial Academic Year

Students enrolling January 2, 1979:

	Resident	Non-Resident
Due December 15, 1978 (Detailed on page 127 at first ½ Term students)	$718.25	$545.75
Due January 16, 1979 (Detailed below as students enrolling at the beginning of the second billing period, less key deposit)	3021.00	2180.00
TOTAL:	$3739.25	$2725.75

Student enrolling January 29, 1979, the beginning of the Second Billing period:

Tuition (four courses)	$2132.50	$2132.50
Activity Fee	30.00	30.00
Room	350.00	
Board	452.50	
Clinic Fee	17.50	17.50
Hospitalization Insurance	38.50	Optional
Key Deposit	5.00	
By January 16, 1979	$3026.00	$2180.00

Student enrolling February 28, 1979:

Tuition (three courses)	$1599.75	$1599.75
Activity Fee	25.00	25.00
Room	280.00	
Board	362.00	
Clinic Fee	12.50	12.50
Hospitalization Insurance	38.50	Optional
Key Deposit	5.00	
By February 16, 1979 TOTAL:	$2322.75	$1637.25

Students enrolling January 2, 1979 will be billed as special students the first one-half term period only. These charges will be made for each one-half term:

	Resident	Non-Resident
Tuition	$533.25	$533.25
Activity Fee	7.50	7.50
Room	70.00	
Board	90.50	
Clinic Fee	5.00	5.00
Hospitalization Insurance	7.00	Optional
Key Deposit	5.00	
By December 15, 1978 TOTAL:	$718.25	$545.75

No refunds are made to special students who subsequently withdraw.

Refunds

A normal course load for a full-time student is four courses in a billing period. Refunds are not normally given for reductions below the four-course level in a billing period. In exceptional circumstances, a student may petition the Tuition Refund Committee (convened by the Dean of Faculty). If a refund is awarded, it will not exceed 80% of the fee for each course dropped. For procedures for withdrawing from a course, see page 30.

Withdrawal From The College

Withdrawal from the College is handled through the Office of the Dean of Student Affairs. The official date of withdrawal is determined by that office. Students who participate in pre-registration, but not in room-draw, and subsequently withdraw before July 16, are entitled to a refund of the $100 deposit. There is no refund for those participating in room draw. Tuition refunds for withdrawal from the College are awarded according to the following schedule:

1st Billing Period	2nd Billing Period	AMOUNT REFUNDED Resident	Non-Resident
On or before September 22, 1978	On or before February 2, 1979	$2600.00	$1900.00
On or before October 13, 1978	On or before February 28, 1979	2200.00	1650.00
On or before October 27, 1978	On or before March 9, 1979	1750.00	1280.00
On or before November 10, 1978	On or before March 23, 1979	875.00	640.00
After November 10, 1978	After March 23, 1979	-0-	-0-

Other Expenses

Part-Time Students:
- Per course $533.25

Auditing Students:
- Per course $150.00
  (when the student is not enrolled full-time)

Special Charges:

Application Fee		$ 15.00
Course Overload for credit (includes credit by exam)*	per course	533.25
Music Fees (not for credit)		
Fall and Spring terms	per term	85.00
Winter term		50.00
Choir for credit as extra course	per course	533.25
Late Registration Fee		5.00
Change in registration after classes begin		3.00
Reinstatement		25.00
Room Differential Privileges		
Single		250.00
Triple		125.00

*No special fee will be charged if credit by examination is established by a freshman student in a subject that is not covered by advanced placement tests.

Harris E. Wilder (1933-1968), Vice President, The Illinois Company Incorporated
J. Howard Wood '22 (1944-1967), Director, The Tribune Company

THE FACULTY

Eugene Hotchkiss (1970) A.B., Dartmouth College; Ph.D., Cornell University
President of the College

Martha Lydia Biggs (1937-1972), B.A., Lake Forest College; M.S., University of Illinois
Librarian, Emerita

John Clifford Converse (1949-1975), B.S., M.A., Kent State University
Assistant Professor of Dramatic Art, Emeritus

Esther DeMerritt (1959), Grinnell College
Associate Director of Admissions, Emerita

Marvin C. Dilkey (1955-1976), B.A., DePauw University; Ph.D., Cornell University
Professor of German, Emeritus

Richard Watson Hantke (1942-1973), Ph.B., Ph.M., Ph.D., University of Wisconsin
Professor of History, Emeritus

Harald Christen Jensen (1942-1973), B.A., Iowa State Teachers College; M.S., State University of Iowa; Ph.D., Northwestern University
Beidler Professor of Physics, Emeritus

Elizabeth Teter Lunn (1930-35, 1946-70), B.A., Wellesley College; M.A., Ph.D., Northwestern University
Professor of Biology, Emerita

Herbert A. Nicholaus (1942-1974), B.A., Lawrence College; Ph.M., Ph.D., University of Wisconsin
Professor of Economics, Emeritus

Edward Oscar North (1941-1963), B.S., Beloit College; M.S., Ph.D., University of Illinois
Professor of Chemistry, Emeritus

Walter W. Pese (1946-1974), Abiturium Goerlitz; M.A., Ph.D., New School for Social Research
Professor of History, Emeritus

Edwin Clark Reichert (1946-1974), B.A., University of Wisconsin; M.A., Ph.D., University of Minnesota
Professor of Education, Emeritus

Bertha L. Reynolds (1946-71), B.S., Mississippi State Teachers College; M.S.C., University of Denver
Assistant Professor of Economics, Emerita

Ruth Baker Sharvy (1967-1975), B.A., University of Wisconsin
Assistant Librarian, Emerita

Arthur W. M. Voss (1941-42, 1946-1976), B.A., M.A., University of Kansas; Ph.D., Yale University
Professor of English, Emeritus

Ronald Boal Williams (1932-1967), B.A., M.A., Ph.D., State University of Iowa
Professor of Spanish, Emeritus

Luis Alonso (1978), B.F.A., Rhode Island School of Design; M.F.A., Rutgers University
Instructor in Fine Arts

Stephen R. Antrim (1975), B.S., M.B.A., Pepperdine University
Physical Educator and Coach

Robert A. Baade (1973), B.A., University of Wisconsin (Whitewater); M.A., Ph.D., University of Wisconsin (Madison)
Assistant Professor of Economics

Donald E. Bartlett (1958), B.A., William Penn College; M.A., Haverford College; B.D., McCormick Theological Seminary; Ph.D., Yale University
Professor of Religion on the William Bross Fund

Charles F. Behling (1968), B.A., M.A., University of South Carolina; M.A., Ph.D., Vanderbilt University
Associate Professor of Psychology and Staff Member, Counseling Center

†††**Kenneth C. Bennett, Jr.** (1961), B.A., University of Wisconsin; M.A., University of Illinois; Ph.D., Indiana University
Associate Professor of English

‡**Randy Berlin** (1978), B.A., Lake Forest College, M.A., University of Chicago
Lecturer in English

Ruthane I. Bopp (1960), B.A., Lake Forest College; M.A., Northwestern University
Registrar and Instructor in Mathematics

Ann D. Bowen (1952), Mus.B., Oberlin College; M.A., Columbia University; Mus.D., Northwestern University
Professor of Music

Michael Boyd (1978), B.A., M.A., University of Texas, Austin; Ph.D., University of Wisconsin, Madison
Assistant Professor of English

Douglas L. Brown (1976), B.A., Bellarmine College; Ph.D., Stanford University
Assistant Professor of Biology

David M. Byers (1975), B.A., College of Wooster; M.A., Columbia University; M.Div., Union Theological Seminary
Dean of Student Affairs

Joseph H. Carens (1975), A.B., College of the Holy Cross; M.Phil. (Religious Studies), M.Phil. (Political Sciences), Yale University
Assistant Professor of Politics

Warren Robert Carlin (1972), B.A., St. Bonaventure University; M.A., Laval University; Ph.D., Northwestern University
Assistant Professor of French

David S. Cochran (1970), B.A., M.Sc., Dublin University (Ireland); M.A., Ph.D., Dartmouth College
Director of the Computer Center and Assistant Professor of Mathematics

Dan P. Cole (1965), A.B., Columbia University; B.D., Union Theological Seminary; Ph.D., Drew University
Associate Professor of Religion

Jonell Comerford (1977), B.S., Ohio State University; M.S., Ph.D., University of Illinois
Assistant Professor of Mathematics

John W. Coutts (1955), B.Sc., M.Sc., University of Manitoba; Ph.D., Purdue University
Professor of Chemistry

Rosemary E. Cowler (1955), B.A., New Jersey College for Women; M.A., Indiana University; Ph.D., Yale University
Professor of English

‡**Gary Cross** (1978), B.A., Washington State University; M.A., Ph.D., University of Wisconsin, Madison
Lecturer in History

*__Michael Benet Croydon__ (1968), Associate, Royal College of Art (London)
Professor of Art

Michael Edward Dau (1966), B.A., Lake Forest College
Director of Athletics; Physical Educator and Coach

Michael B. Davis (1974), B.A., Michigan State University; M.A., Ph.D., Princeton University
Assistant Professor of Physics

Bailey L. Donnally (1961), B.S., M.S., Auburn University; Ph.D., University of Minnesota
Dean of the Faculty and Professor of Physics

W. Clarke Douglas (1974), B.S., B.A., University of Cincinnati; M.A., Ph.D., University of Wisconsin
Assistant Professor of History

Daniel Dyer (1978), A.B., Hiram College; M.Ed., Ph.D., Kent State University
Assistant Professor of Education, Chairperson of the Department of Education

Michael H. Ebner (1974), B.A., University of Toledo; M.A., Ph.D., University of Virginia
Assistant Professor of History and Secretary of the Faculty

Arlene Eskilson (1972), B.A., M.A., Roosevelt University; Ph.D., University of Illinois (Chicago Circle)
Assistant Professor of Sociology and Anthropology

Roger J. Faber (1965), B.S., Calvin College; Ph.D., Michigan State University
Professor of Physics

Nancy Fairley (1978), B.A., Richmond College C.U.N.Y., Ph.D., State University of New York at Stony Brook
Assistant Professor of Politics and of Sociology/Anthropology

Gregory Allan Finnegan (1973), B.A., Raymond College of the University of the Pacific; Ph.D., Brandeis University
Assistant Professor of Sociology and Anthropology

Paul B. Fischer (1971), B.A., M.A., City College of New York; Ph.D., University of Massachusetts
Director, Local and Regional Studies and Associate Professor of Politics

‡**Kristina Follrath** (1977), A.B., Washington University; M.A., New York University
Lecturer in Music

Ronald H. Forgus (1958), B.Sc., M.Sc., McGill University; Ph.D., Cornell University
Professor of Psychology and Staff Member, Counseling Center

Phylis M. Frankel (1968), B.S., M.A., Ph.D., Northwestern University
Associate Professor of Psychology; Director and Staff Member, Counseling Center

Jonathan Fuller Galloway (1966), B.A., Swarthmore College; Ph.D., Columbia University
Associate Professor of Politics

Jean-Luc Garneau (1964), B.A., Université Laval, Quebec; M.A., University of Illinois (Chicago Circle), Licence es Lettres Libre, Universite Laval
Assistant Professor of French

THE ALUMNI ASSOCIATION

Through a network of Regional Councils under the governance of a national Board of Governors, the alumni keep aware of and active in the ongoing life of the College. The Office of Alumni Affairs is responsible for coordinating and promoting the various programs put forward by the Associaion and functions as the liaison between the Regional Councils and the College.

Among the many alumni volunteer activities is the Alumni Admissions Representative Program. Through it, alumni representatives assist the Admissions Office in identifying potential candidates for admission. The representatives also are frequently called upon to follow-up in their areas on students who are in various stages of the admissions process. Informal receptions for newly-admitted students and their parents, attended by the director of admissions and members of the faculty, are hosted each spring by the alumni. Other activities include: assisting the placement office in finding jobs for graduating seniors or summer employment for currently enrolled students; supporting the academic-professional internship (work-study) program by making positions available to students; representing the College at appropriate civic and academic functions; assisting in the identification of fund raising potential among foundations, friends, and alumni; and helping to develop regional programs of local interest.

Locally, the Office of Alumni Affairs participates in activities designed to bring the college community and the greater Chicago area into closer contact by presenting student faculty programs on campus and off, and by coordinating arrangements for the annual Homecoming celebration. The Office also maintains files of current addresses and biographical data on all former students.

The major College publication which provides a continuing relationship with the alumni is SPECTRUM, a tabloid published six times annually.

Alumni Board of Governors

President: J. David Brock '66
Executive Vice President: Constance Turner Kenney '68
Vice President for Alumni Activities: Phoebe Fabricant Goldman '63
Vice President for Alumni Athletics: Frederick Broda '68
Vice President for Regional Councils: Jean Whyte Mohr '52
Vice President #1 for Special Projects: Frank Hamilton '65
Vice President #2 for Special Projects: Edward I. Farley, Jr. '72
Secretary: (ex-officio) William Woodard '74, Director of Alumni Relations

THE ADVANCED MANAGEMENT INSTITUTE (AMI)

The Advanced Management Institute (AMI), located on the College campus, offers management development programs for middle- and upper-management personnel in cooperation with more than 50 companies in the Chicago metropolitan area. The Institute confers both a certificate of management and a master of science in management degree, and holds special topic seminars under its continuing education program.

Lake Forest College and the Advanced Management Institute have shared facilities since the AMI was originally founded as the Industrial Management Institute in 1946. Each is independently governed; both cooperate in many ways. For the Advanced Management Institute, the College offers a physical and academic environment of a nationally known collegiate institute. For Lake Forest College, the AMI provides academic opportunities for its community and brings to the campus a number of students and the attention of industries, all concerned with quality education.

INDEX

Due to the nature of a college bulletin, some subjects are not covered in depth in this book. For that reason the following index is cross-referenced to the Lake Forest College Student Handbook to provide more information for those who wish full details. The Handbook is available upon request to the Office of the Dean of Student Affairs, Lake Forest College.

ADDITIONAL INFORMATION
about Lake Forest College is available by writing to the

DIRECTOR OF ADMISSIONS
. . . for admission forms, publications about the College, and materials outlining special academic programs on campus and off

DIRECTOR OF FINANCIAL AID
. . . for further details on requirements for and availability of financial aid

REGISTRAR
. . . for specifics on transcripts, registration, and transfers of credit

DEAN OF STUDENT AFFAIRS
. . . for particulars on housing arrangements and on extra-curricular student activities.

SHOULD YOU BE VISITING LAKE FOREST COLLEGE
. . . the campus is located in the North Shore community of Lake Forest, just 32 miles north of Chicago via Edens Expressway and U.S. 41. The College Admissions Office is found on Middle Campus, corner Sheridan and College Rds., and is open for interviews and campus tours Monday through Friday, 9 a.m. to 4:30 p.m. the calendar year, Saturdays, 9 to 11:30 a.m. the academic year.

It is suggested that appointments for interviews and tours be made in advance of your visit to the Lake Forest College campus.
Telephone (312) 234-3100.

Lake Forest College does not discriminate against any persons because of race, color, sex, religion, or national or ethnic origin in its education program, activities, or employment. In addition, Lake Forest College is required by Title IX and regulations thereunder not to discriminate on the basis of sex in educational programs, activities, and employment. Lake Forest College does not discriminate on the basis of handicap against any otherwise qualified person by denying participation in, or the benefits of, any College program or activity.

The campus coordinator for Title IX (prohibiting sex discrimination) is the Personnel Officer, to whom inquiries concerning Title IX may be referred. The campus coordinator for Section 504 of the Federal Rehabilitation Act of 1973 (prohibiting Handicap discrimination) is Mr. Gordon White, Assistant to the President of the College.

RE: Errors and Omissions in LFC Bulletin 1978-79

Here are three important errors in the 1978-79 Bulletin. I would be greatful if you could send me notes about any others you may be aware of, so that I can either bring them to everyone's attention or file them for correction in next year's edition.

1. On page 141, Jean-Luc Garneau is listed as Assistant Professor of French. Please change this to Associate Professor of French. Jean-Luc was promoted last winter.

2. On page 29 of the Bulletin, the section on Grades has been cut and much of the detailed stuff is in the Student Handbook (Section I, p. 9-10). Unfortunately, in our cutting zeal we omitted all mention of Incompletes and Credit Only in the Bulletin, and forgot to refer you to the Student Handbook for further information, especially regarding the important deadlines for registering for Credit Only and for completing an Incomplete. NB. THE DEADLINE FOR REGISTERING FOR CREDIT ONLY IS TWO WEEKS, NOT ONE WEEK AS THE HANDBOOK SAYS.

3. On page 113, under Sociology and Anthropology, the course description of S&A 107 is now out of date. The course this year is to be taught as a composition course. For a full description see Bulletin, page 36, Writing on Special Topics. This course should have been cross-listed as WST 107 and S&A 107. Mr. Finnegan will teach it in the Winter term, assisted by yours truly. The syllabus has been drastically revised.

(PLEASE NOTE THAT THIS YEAR WE MADE A START ON CUTTING DOWN ON THE AMOUNT OF OVERLAP BETWEEN THE BULLETIN AND THE STUDENT HANDBOOK. PLEASE DO NOT RELY ON THE BULLETIN FOR DETAILED INFORMATION ON VARIOUS ACADEMIC REGULATION. THE BULLETIN'S INDEX HAS BEEN EXPANDED TO INCLUDE MANY MORE ITEMS AND ALSO TO PROVIDE CROSS-REFERENCES TO THE STUDENT HANDBOOK. FOR EXAMPLE, THERE IS AMERE SENTENCE ON ACADEMIC PROBATION IN THE BULLETIN (P. 29) BUT IN SECTION I OF THE HANDBOOK THERE IS A DETAILED PARAGRAPH. PLEASE MAKE A HABIT OF USING BOTH AND ENCOURAGE YOUR ADVISEES TO DO THE SAME.)
